# Gould's Anniversary Offer of Beautiful Gladioli

*The King of All Flowers*

One Each of The Following Seven Select  
Varieties of Gladiolus Postpaid for \$1.00

(Regular price \$1.45)

Six Each of This Collection

**\$5.00, Postpaid**

(Regular price \$7.25)

**Baron Hulot**—A free bloomer, vigorous grower of dark velvety purple spikes. 10c each.

**Eveleyn Kirtland**—A brilliant flower of rose pink color, shading to shell pink towards the center, bright scarlet blotches on lower petal. 15c each.

**Crimson Glow**—Produces large beautiful flowers of brilliant crimson. A strong grower and good multiplier. 35c each.

**Schwaben**—Very vigorous grower of large canary yellow, shading to sulphur yellow with blotch of garnet in throat. 10c each.

**Mrs. Frank Pendleton**—Another of the most popular Gladioli. Spikes are very large of delicate pink with large blotches of blood red. 10c each.

**Rev. Ewbank**—A most beautiful light blue, with a delicate lavender shade. The petals are marked with darker shades of blue. The blend of colors is so delicate and beautiful that it is almost impossible to describe them. 50c each.

**Red Emperor**—A beautiful bright scarlet color. Flowers are very large. 15c each.

*All of the above collection are reproduced in color on our rear cover page. See page 43 for additional Gladioli and cultural directions.*

These Gladiolus bulbs are some of the finest that it is possible to produce. The price that we are making on this Anniversary Collection is unusually attractive; one that no lover of flowers can afford to miss.

Gladioli are so easy to grow and send forth such wonderful blooms, that no flower garden is complete without them. They are unsurpassed as a cut flower, as they will stay fresh for two weeks in the house.

Gladiolus

Gladioli will be sent about April 1st,  
weather permitting.

## GOULD'S SPECIAL ANNIVERSARY FLOWER SEED OFFER

**\$1.25 worth of packet seeds—Postpaid \$1.00.**

Select any of your favorite flowers from our catalog in the packet size, amounting to \$1.25, and send us only \$1.00. Order will be filled and sent you from our regular full size packets. You will have reason to celebrate with us. Remember this special offer applies only on the packet seeds.

Please mark this collection No. 2 on your order blank and list it separately if ordering other seeds. Use same order blank whenever possible.

## GOULD'S SPECIAL ANNIVERSARY VEGETABLE SEED OFFER

**\$1.25 worth of packet seeds—Postpaid \$1.00.**

Make your own selection of any varieties you want of vegetable seeds in the packet size only, from the large list in our catalog, totaling \$1.25 and send us \$1.00. Your order will be filled promptly from our regular full size packets. This special Anniversary offer, at the reduced price, applies only to the packet size.

Please mark this Collection No. 3 on your order blank and list it separately, if ordering other seeds. Use same order blank whenever possible.

## Prices

All prices quoted are subject to change without notice. Prices on field, and grass seed, fluctuate so greatly during the season that no values are printed in this catalog. At frequent intervals during the season, we issue a special Red Figure price list which will be mailed to those who receive our catalog, or to anyone on request, giving latest market quotations on the above mentioned seeds.

In the Spring we issue a special catalog supplement on shrubs, bulbs, fruit trees, berry bushes, plants, etc., containing prices and descriptions of many hundreds of well known hardy varieties. A special Bulb list is also issued in the Fall giving a large list of selected and imported Dutch and French bulbs for Autumn planting. Please write us if you do not receive a copy.

## PARCEL POST RATES

All seeds, plants, bulbs and roots take the pound rate on packages weighing over eight ounces. On eight ounces or less the rate is one cent per each two ounces, regardless of distance.

All goods except seeds, bulbs, roots and plants take pound rates on packages weighing over four ounces. On four ounces or less, rate is one cent per ounce for any distance.

## Order Early

It has always been our policy to fill orders the day that they are received, but on account of the uncertainty of weather conditions, it is advisable to anticipate your needs early and purchase your supply while our stocks are complete. You are then prepared to take advantage of the arrival of suitable weather for planting at any time. The heavy spring demand for seeds and other goods, also tends to slow up the transportation service somewhat. There is also the danger of running out of some varieties, in the latter part of the season. So, order early.

## When Ordering

Fill out your order on one of Gould's order blanks whenever possible, being sure to write your name and address and articles wanted plainly. State how you wish goods sent. We recommend the sending of larger packages by Express, or Freight but smaller packages can be forwarded by Parcel Post at a considerable saving in the cost.

## Garden and Flower Seeds

Unless otherwise noted, all Garden and Flower seeds are sent prepaid by us, including pound lots of Peas, Beans and Sweet Corn. The last three items in larger than pound lots, will be sent by Parcel Post if postage is added at the Parcel Post rates given on this page. On Peas, Beans and Corn in larger quantities than pounds mailed to Canada, add 12c per pound to cover postage.

## Grass and Field Seeds

All Grass and Field Seeds, Onion Sets, or Potatoes are shipped at purchaser's expense, by Express or Freight, as ordered. Prices quoted in this catalog, or on Red Figure price list, are F. O. B. St. Paul. Small quantities of Field Seeds will be sent by Parcel Post if sufficient amount is added to the remittance.

## By Parcel Post

Parcel post service and rates are so satisfactory that small packages or shipments to nearby points are best sent in that manner.

Seeds or other goods ordered by Parcel Post must have amount included in the remittance for postage charges, excepting on packet seeds or where otherwise stated postage prepaid in our catalog.

Packages will be insured if desired at the regular parcel post rate. In case you send more money than is required either for seeds or for postage, refund will be made promptly.

## Terms

Please send money with order, for it is only by adopting a cash-with-order-policy that we are able to sell goods on a very small margin of profit. Goods will be sent C. O. D. provided order is accompanied with a reasonable partial payment.

## How To Send Money

The better way to send money is by Post Office or Express Money Order, Bank Draft, or money in registered letter. When the amount of the order is less than \$1.00, please send stamps or money-order, as the banks charge an exchange of 10c on all checks.

## Disclaimer

As seeds, plants and bulbs are subject to climatic and other conditions over which we have no control, after once being placed in the ground, R. L. Gould & Company therefore give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, plants or bulbs that they send out, and they will not be in any way responsible for the crop; and every order for articles named in this catalog will be executed on these conditions only. If the purchaser does not accept same on these terms, they are to be at once returned.

# 1923 GOULD'S 25TH YEAR

To secure a world-wide reputation for Reliable seeds during the course of a quarter of a century is an achievement that should make anyone feel proud. We naturally feel on this our 25th Anniversary happy to have obtained the confidence of so many friends and customers, and especially grateful to the writers of the many nice letters—a few of which we have reproduced throughout our catalog—that these kind people have sent us.

It has been the constant ambition and policy of R. L. Gould & Company to serve its customers only with the highest grade seed, and the eagerness and willingness of so many of our customers to express their satisfaction obtained from our Reliable seed, has added to our wealth of knowledge, gained through our long experience in the seed business.

As our business grows, we are able to sell many things considerably cheaper on account of handling such a large volume. This is especially true of Flower Seeds this year, as prices are in many instances 50% lower. But we never shave down our price and sacrifice quality. It is always our aim to raise the quality if it can be done.

Our Mail Order Department is as usual prepared for a busy season and ready to fill orders promptly. Last year with an increase of nearly 100%, this department filled orders nearly always on the same day that they were received.

May we urge you to keep this catalog for future reference. There is sure to be many times during the course of the year when you will want to consult this book on some subject. The section devoted to Poultry Supplies is especially valuable to anyone who raises poultry.

Whether you order or not, please feel free to write us at any time on subjects concerning the growing of grains, vegetables, flowers, shrubs, their culture, etc. Also on anything pertaining to the raising of poultry; their diseases, etc. Our staff of experts will be pleased to answer you by return mail.

R. L. GOULD, President  
and founder of R. L. Gould & Co.

## GOULD'S PLANTING CHART FOR THE SMALL VEGETABLE GARDEN

**NOTE**—\*Denotes the quantity of seed that should raise sufficient plants to transplant into a row 100 feet long. The seed should be sown in hot-bed from February to March, and later sown in a cold frame, or sow the seed in a well prepared seed bed in the open when danger from frost has passed.

Variety	Seed required for 100 feet of row	Plant Rows apart	Plants apart in rows	Time of plant- ing in open ground	Matures in about
Artichoke, Globe.....	1½ oz.	2 to 3 ft.	2 to 3 ft.	Early spring	15 mos.
Asparagus, Seed.....	2 oz.	1 to 2 ft.	3 to 5 in.	Early spring	3 to 4 yrs.
Asparagus Plants.....	60 plants	30 to 36 in.	18 in.	Early spring	1 to 3 yrs.
Beans, Bush.....	1 lb.	15 to 24 in.	2 to 3 in.	April to July	40 to 65 days
Beans, Pole.....	1½ lb.	3 to 4 ft.	3 to 4 ft.	May and June	50 to 80 days
Beets.....	2 oz.	12 to 16 in.	3 to 4 in.	April to Aug.	60 to 80 days
*Brussels Sprouts.....	1 pkt.	24 to 30 in.	16 to 24 in.	May and June	90 to 120 days
*Cabbage, Early.....	1 pkt.	24 to 30 in.	12 to 18 in.	March and Apr.	90 to 130 days
*Cabbage, Late.....	1 pkt.	24 to 36 in.	16 to 24 in.	May and June	90 to 130 days
Carrot.....	1½ oz.	12 to 15 in.	3 to 4 in.	April to June	75 to 110 days
*Cauliflower.....	1 pkt.	24 to 30 in.	24 to 30 in.	April to June	100 to 130 days
*Celeriac.....	1 pkt.	14 to 24 in.	2½ to 3 in.	May and June	100 to 150 days
*Celery.....	1 pkt.	6 in.	4 to 8 in.	May and June	120 to 150 days
Corn, Sweet.....	1½ lb.	30 to 36 in.	15 to 24 in.	March to May	60 to 100 days
Cucumber.....	1 pkt.	4 to 6 ft.	4 to 6 ft.	April to July	60 to 80 days
*Eggplant.....	1 pkt.	24 to 36 in.	24 to 30 in.	April and May	100 to 140 days
Endive.....	1½ oz.	18 in.	8 to 12 in.	April to July	90 days
*Kale, or Borecole.....	1 pkt.	18 to 24 in.	18 to 24 in.	August	90 to 120 days
*Kohl Rabi.....	1 pkt.	15 to 24 in.	6 to 8 in.	March to May	60 to 80 days
Leek.....	1½ oz.	12 to 16 in.	4 to 8 in.	March to May	120 to 180 days
Lettuce.....	1 pkt.	10 to 15 in.	6 in.	March to Sept.	60 to 90 days
Melon, Musk.....	1 pkt.	6 to 8 ft.	Hills, 6 ft.	April to June	120 days
Melon, Water.....	1 oz.	8 ft.	Hills, 6 ft.	March and June	100 to 120 days
Mustard.....	1 pkt.	12 in.	3 in.	May	60 to 90 days
New Zealand Spinach.....	1 oz.	24 to 36 in.	12 to 18 in.	Early spring	60 to 100 days
Okra, or Gumbo.....	2 ozs.	3 to 4 ft.	24 to 30 in.	May and June	90 to 140 days

# VEGETABLE SEED SECTION

PAGES  
4 to 33

## ASPARAGUS SEED

**CULTURE.** To start an asparagus bed from seed, sow 1 oz. to 50 feet of row early in the spring and transplant to permanent bed the following spring.

One pound of seed will produce about 3,000 to 4,000 plants. Sow 1 to 1½ inches deep in rows 15 inches apart. Cultivate and thin the plants to about 3 inches apart in the row.

Careful weeding and hoeing are required throughout the growing season. Watering between the rows with liquid manure is of great help to the young plants.

**FERTILIZERS.** Nitrate of Soda may be applied several times during the season to stimulate and quicken growth.

### Bonvallet's Giant

The earliest and a heavy producer of fine white stalks with purple tips, of finest quality. The most disease resisting of any variety. Pkt. 5c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.50.

### Columbian Mammoth White

A most distinct variety with pure white shoots. Gives an immense yield. The shoots remain white without earthing, or artificial blanching, as long as fit for use. Pkt. 5c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.40.

*As I am using your seed two years now I must say I am very, very satisfied. The seed was good and true to name. I had three heads of Enkhuizen Cabbage to the county fair and got first premium. One cabbage weighed 20 pounds, the second 21½ pounds and the third 22½ pounds. I had some Cauliflower this year weighed 7½ pounds. I am very pleased and satisfied with every kind of seed I sent for.*

Albert Strauch,  
Walton, Ind.

### Washington Rust-Resistant

This has already proven to be one of the very best varieties, and although new, will in time no doubt replace many of the old sorts, that are subject more or less to rust. The Department of Agriculture propagating this variety many years before being able to perfect this rust-resisting strain. Pkt. 10c; oz. 50c; ¼ lb. \$1.50; 1 lb. \$5.00.

### Conover's Colossal

An old well known variety with deep green stalks, yields from 15 to 30 sprouts from a single plant. Spreads less than other sorts. Pkt. 5c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.40.

### Palmetto

The standard variety for market gardeners. Will stand shipping better than any other. Plants are vigorous in growth, producing large, thick, dark green shoots with a distinctly pointed tip. Pkt. 5c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.40.

### French Giant Argenteuil

A splendid vigorous variety that grows very large, the stalks sometimes weighing four ounces each. This is a very prolific variety and forms the greater part of the fine bundles admired in the Paris markets. Pkt. 5c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.50.

**ORDER EARLY.** Your order is sure to receive more prompt attention during the early part of the season, for the rush during the flush of the season is bound to slow up the filling of orders to some extent, and there is always the danger of running short of some varieties.

## ASPARAGUS ROOTS

The easiest way to obtain an asparagus bed is to set out the root. By using good strong year old or two year old roots fairly good results are obtained the second year, but should not be cut any later than June 20th until the 3rd or 4th year.

In preparing the bed for asparagus roots the soil should be worked up at least 12 inches deep and a very heavy application of well rotted barnyard manure should be given. Make furrows 6 or 7 inches deep and spread roots 18 inches apart in row and cover with two inches of soil gradually filling as shoots appear until surface is level.

**BONVALLET'S GIANT, White.**  
**COLUMBIAN MAMMOTH, White.**  
**CONOVER'S COLOSSAL, Standard Green.**  
**PALMETTO, MAMMOTH, Light Green.**  
Roots: 1 doz. 25c; 100 \$1.50; 1,000 \$12.50.

Postage Extra: 10c, per doz.; 5c, for each additional dozen. We will refund if amount sent is more than enough to cover mailing.

Palmetto Asparagus

## BEANS

**CULTURE.** To obtain a continuous supply of Beans throughout the season, make plantings every two weeks from about May 10th to July 1st. Beans may be planted in drills 15 to 18 inches apart or in hills 12 inches between and rows 24 inches apart. Plant about 1 to 2 inches deep depending upon the condition of the soil.

### DWARF WAX VARIETIES

#### Gould's Reliable Black Wax

Is an improved strain of Currie's. It is stringless, hardy and rust-resistant. The pods are long and wide but thicker than Currie's. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 35c, 5 lbs. \$1.50.

#### Gould's Reliable Kidney Wax

An excellent early round podded variety for the private garden and home canning. It is very tender and absolutely stringless. The seed is white kidney-shaped with a brownish black eye. The vines yield abundantly. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 35c, 5 lbs. \$1.50.

#### Currie's Rust Proof Black Wax

A very early and productive variety. The pods are large, flat and straight, free from rust, of excellent quality and flavor. It is a big favorite with Market Gardeners. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

#### Davis Kidney Wax

A most hardy and productive wax bean. The bean is pure white, of kidney shape, producing a large, straight pod of fine appearance. The purity of the pod and beans makes it a favorite for canning. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

#### Pencil Pod Black Wax

The pods are long and pencil-like, very tender and brittle. The color is a rich yellow. Much in demand for both Home and Market Gardens. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

#### Improved Golden Wax

A well known standard variety. Bears an abundance of large flat pods slightly curved. The seed is white and of good quality. Rust-resisting to a marked degree, one of the earliest to mature. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

#### Wardwell's Kidney Wax

A popular variety for Market Gardeners. Produces long flat pods which are very attractive and of good quality. Matures a little later than the Golden Wax. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

Gould's Reliable Black Wax Beans

Gould's Reliable Kidney Wax Beans

### Hodson Wax

An extremely vigorous, hardy, and productive variety, though rather late. It is noted for its very large, flat, gently curved wax pods which are generally 6 to 6 $\frac{1}{2}$  inches long. It holds up well and is a great favorite for late marketing. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

*Everything purchased from you gave excellent satisfaction. The seed was all right, but our season was so dry that we had a pretty general failure with most of what was tried to raise. But things got far enough along to demonstrate the quality of your seed. I could not anticipate all my seed wants in advance and so had to trouble you with several small orders for extra planting, re-planting etc. Your promptness in filling such orders at a busy season gave special satisfaction.*

Samuel S. Forrest, Zumbro Falls, Minn.

### DWARF GREEN PODDED VARIETIES

#### Bountiful

This is one of the very earliest of the green podded beans. The pods are large, flat, and slightly curved, of a light green color and stringless. Is very hardy and continues to bear for several weeks. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

#### Longfellow

An early long slender green pod, very tender and brittle when not too old. Very desirable for canning, having no strings when broken. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

#### Black Valentine

Pods are long, round and straight, very attractive in appearance and of good quality. Vines are very hardy and vigorous, producing an excellent bean for shipping. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

Kentucky Wonder Pole Beans

## POLE BEANS

**CULTURE.** Beans being very tender and delicate when coming out of the ground and also very quick in making their appearance after being planted, care should be taken not to plant while there is still danger of frost. May 10th to 25th is, as a rule, the best time for bean planting.

Pole Beans require better soil than the dwarf varieties owing to the longer period required to produce the stocks and pods. Plant 6 seeds in a hill two inches deep and three feet apart each way.

### Kentucky Wonder or Old Homestead

This climbing variety is very vigorous and productive and bears its pods in large clusters. The pods are green and almost round often measuring 8 to 10 inches long. They are stringless, very tender and will bear all summer. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 40c, 5 lbs. \$1.75.

### Kentucky Wonder Wax

Very similar to the green podded Kentucky Wonder, but the pods are a little broader. They are fleshy and stringless and are of excellent quality. The pods are very long and light yellow. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 40c, 5 lbs. \$1.75.

### Lazy Wife

So named on account of the large number of pods, making it easy to obtain a mess. One of the best varieties for snaps of the large late green-podded pole beans. The pods grow in large clusters, are 5 to 7 inches long, broad, thick, fleshy and stringless. They have a rich buttery flavor. The dry bean, which is white is also fine for winter use. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 35c, 5 lbs. \$1.50.

### Horticultural Pole or Cranberry

Is a very fine bean with a long straight pod that is quite flat and stringless. The color is dark green, splashed with red. The bean, which makes a beautiful shell bean is cream color with maroon spots. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 35c, 5 lbs. \$1.50.

## BEANS

### DWARF GREEN PODDED VARIETIES—Cont.

#### Dwarf Horticultural

Very productive and compact in growth. Pods broad, thick, curved and splashed with red. Is very fine for early shell bean. Seed is large, oval, and plump, splashed with red. Matures early. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

#### Early Red Valentine

Pods are round, of medium length, very fleshy, crisp, and tender. A very superior snap variety for both the Home and Market Gardener. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

#### Refugee or 1000 to 1

A very productive, hardy, late variety. Pods are long, round and slender, very much in demand for late pickling. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

#### Stringless Green Pod

The finest green pod, stringless Bean. The earliest and hardiest of all green-podded sorts and produces large, handsome pods, some of which measure fully six inches in length. The plants are very productive, bearing profusely the beautiful green pods, which are perfectly round, straight, broad, tender, brittle, finest flavor, very fleshy and entirely stringless. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 35c, 5 lbs. \$1.50.

#### Giant Stringless Green Pod

An excellent variety to follow Stringless Green Pod, being later and larger. Plants are strong, pods meaty and brittle. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 35c, 5 lbs. \$1.50.

*Of all the seed we ever received from you people, which amounted to no little amount, all grew well and we must say we were very much pleased at the outcome of them all.*  
R. F. Wilhelmy,  
Pepin, Wis.

Stringless Green Pod Beans.

## BEANS

### POLE VARIETIES—Continued

#### Scarlet Runner

A bean that is edible as well as ornamental. It is a fine climber, quick growing, and has large beautiful leaved and bright scarlet blossoms. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 40c, 5 lbs. \$1.75.

#### King of the Garden Pole Lima

The vines are very vigorous and prolific. Pods are of large size filled with 4 or 5 large white beans of very fine quality. The beans are easily shelled and of handsome appearance. A great favorite with market gardeners. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 35c, 5 lbs. \$1.50.

#### Large White Lima

A vigorous grower. Vines are tall and slender, producing an abundance of long dark green pods in clusters. Very good for the market or home garden. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 35c, 5 lbs. \$1.50.

### FIELD BEANS

#### M. A. C. Robust

A new navy bean of exceptional merits. It is recommended as the most uniform in size and the most productive navy bean ever introduced. We have a very limited amount of these beans on hand and would advise placing your orders early, if you wish this special strain. Mam. Pkt. 5c, ¼ lb. 10c, 1 lb. 25c, 5 lbs. \$1.15.

#### Choice Navy

The old standard white navy bean hand picked selected stock. Mam. Pkt. 5c, ¼ lb. 10c, 1 lb. 20c, 5 lbs. 75c.

#### Brown or Swedish

This is a fine field bean of a light brownish color and medium size. Very fine for baking. Mam. Pkt. 5c, ¼ lb. 10c, 1 lb. 20c, 5 lbs. 75c.

**CULTURE.** Any well prepared light garden soil will produce good beets, although a rich, sandy loam brings the best results. Sow the seed about 1 inch deep in rows 15 to 24 inches apart. When plants are about 6 inches high they should be thinned to 3 or 4 plants to the foot. Those taken out at this time make excellent greens. For winter keeping, the turnip varieties should be sown in June or July, so as to mature late.

#### Gould's Early Bunching

In this new beet which we are offering this year for the first time, we feel that we have a beet that the market gardener has been looking for; an early beet that is smooth, red, globe shaped, small top, and maturing very early. Gould's Early Bunching Beet is not only attractive in appearance but, tender and fine flavor. It is ready for market at least 8 to 10 days ahead of the Crosby Egyptian Beet. Gould's Early Bunching Beet is the ideal beet for the home garden also. Pkt. 5c, oz. 15c, ¼ lb. 50c, 1 lb. \$1.50.

#### Gould's Reliable Red Beet

Is especially selected for its uniformity in size, shape and color, being a very dark red. We do not hesitate to recommend it either for market or home garden. It grows to a large size and is unsurpassed as to quality and for winter use. Pkt. 5c, oz. 15c, ¼ lb. 45c, 1 lb. \$1.25.

#### N. K. & Co's. Sterling

A very attractive variety of high quality. It is a heavy yielder, a good keeper and of very fine appearance. Is exceedingly sweet and tender for table use. Pkt. 5c, oz. 15c, ¼ lb. 45c, 1 lb. \$1.25.

### DWARF OR BUSH LIMA BEANS

#### Burpee's Bush Lima

Plants are large and hardy, spreading occasional runners. It is medium early, producing pods 4 to 4½ inches long, containing 3 to 4 large, flat white beans. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 35c, 5 lbs. \$1.50.

#### Burpee's Improved Bush Lima

This is by far the most popular of the Bush Lima type. The bushes grow from 18 to 24 inches high of stout, erect growth, forming bushes of two to three feet in diameter. The pods are frequently borne in clusters of five to eight each containing 4 or 5 large, thick white beans. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 35c, 5 lbs. \$1.50.

#### Henderson's Bush

A vigorous hardy, very early and small type of Bush Lima. The beans are small, white and of very good quality. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 35c, 5 lbs. \$1.50.

#### Fordhook Bush

A most excellent variety that is exceedingly popular with Market Gardeners. The pods are about 5 inches long each having 4 or 5 large oval shaped thick white beans of fine quality. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 35c, 5 lbs. \$1.50.

*All the seed I bought of you grew without fail. Your Scarlet Turnip White Tip Radish can't be beat for quality and color and I can say the same for Chantenay Carrot. Your Cucumbers did fine and I had a big crop. Cabbage and Tomatoes did fine. Your Dows Early Sweet Corn was ready for table before any of my neighbors had any.*

*Geo. E. Welander, Stillwater, Minn.*

## BEETS

Plant Reliable  
Seed for Sure  
Crops. Gould's  
Seed is of the  
very best.

Gould's Reliable Red Beet

#### Early Model

This variety is medium early in maturing, and one of the best for table use. Roots are of globe shape and nice size, with a smooth tap-root. The flesh is tender and has a sweet and delicate flavor. Its fine appearance makes it a ready seller. Pkt. 5c, oz. 15c, ¼ lb. 45c, 1 lb. \$1.25.

## BEETS—Continued

### Crosby's Egyptian

A splendid extra early beet of slightly flattened globe shape. It is sweet and tender and a much desired table beet. It is grown and recommended by market gardeners for easy bunching. One of the earliest and best strains of beets. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.

### Detroit Dark Red

Roots are globe shaped, smooth with short tops. The skin is dark red. The flesh is tender and sweet. It is a good keeper and is very desirable both for market and home garden, being in demand for either bunching or canning. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.

### Edmand's Blood Turnip

A handsome, clean, turnip-shaped blood beet. Skin and flesh are of a deep blood red. The roots grow regular of good marketable size and is a good keeper. This variety is of the second early maturing crop, also popular with gardeners. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 30c, 1 lb. \$1.00.

### Extra Early Egyptian

One of the very earliest small top varieties. Roots are decidedly flat with a dark skin. Flesh is purplish zoned to a lighter shade. This variety is the best for the first early crop or planting. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 30c, 1 lb. \$1.00.

*I received all your seeds in good condition and am more than pleased to let you know that the results were satisfactory as everything grew fine. And one thing about Holland Cabbage, it is one of the best I ever grew, for keeping.*

Otto Pfeifferle,  
Brillion, Wis.

## MANGEL WURZEL (For Stock Feeding)

**CULTURE.** Sow 6 pounds to the acre in May or June, in rows three feet apart, and thin to nine inches in the row. Cultivate frequently with horse tools.

Farmers and stock raisers of the United States do not appreciate so fully the value of Mangels for feeding cattle, hogs, sheep, etc., as do the farmers of Europe. In France, Great Britain and other European countries, it is the exception rather than the rule where Mangels are not grown on a large scale on every farm. The immense yield which may be secured from an acre, with very little expense either for material or labor makes the Mangel crop one of the most profitable on the farm. 15 to 20 tons of roots an acre is not an unusual yield; some specimens weigh 20 to 30 lbs. each. Where properly seeded cultivated and harvested the cost of growing a bushel of Mangel should not exceed 10c. When fed in combination with grain they are worth almost as much, pound for pound, as the grain. Experience has proved that Mangels so aid digestion and assimilation, by keeping the animals in a healthy condition, that they increase the feeding value of other feeds consumed, besides the nutrients the roots contain.

### Gould's Reliable Sludstrup Barres

Has been recognized by the Danish Government as having the largest per cent of nutriment found in any sort. It is of a reddish yellow color, is very hardy and grows well above ground making it easy to pull. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, 1 lb. 60c.

### Improved Mammoth Long Red Mangel

Is a selection of the very best type of long red mangel. The roots are extra large, straight, uniform in size and of a deep red color. They grow very large, some weighing as much as 15 to 20 pounds apiece, and yielding 15 to 20 tons to the acre. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, 1 lb. 60c.

### Crimson Globe

A late or main crop variety of medium size and of a perfect Globe shape. Flesh is a deep purple. The foliage is small, and a dark bronze color. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.

### Half Long Blood

An excellent second early variety and a good keeper. The shape is half long and the flesh is a deep red. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 30c, 1 lb. \$1.00.

### Improved Long Red

A very good fall beet, especially for pickling. The root is long and slender, making a very nice slicing beet of a dark red color. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 30c, 1 lb. \$1.00.

### Swiss Chard or Spinach Beet

Is cultivated largely for its leaves. The midrib may be stewed and served in the same manner as asparagus and the balance of the leaves cooked similar to spinach. Should be grown in every home garden. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 30c, 1 lb. \$1.00.

### Giant Lucullus

The largest and the favorite of the Chard family. The leaves are very large and curly and make a very attractive dish when cooked up as greens. As it grows up so quickly it is also very valuable for keeping the poultry supplied with a green feed. Leaves may be trimmed to the ground and new leaves will grow and take their place quickly. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 30c, 1 lb. \$1.00.

### Improved Mammoth Long Red

Is a selection of the very best type of long red mangel. The roots are extra large, straight, uniform in size and of a deep red color. They grow very large, some weighing as much as 15 to 20 pounds apiece, and yielding 15 to 20 tons to the acre. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, 1 lb. 60c.

### Golden Tankard

As its name denotes it is of tankard shape and a bright golden yellow and is very desirable for dairy stock feeding. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, 1 lb. 75c.

### Mammoth Golden Giant

Grows very large, yet it has a very fine even shape and smooth skin. Flesh is white, firm and sweet. Cattle are very fond of them. In spite of the size they are easily lifted from the ground. Grow enormous crops. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, 1 lb. 75c.

### Yellow Globe

A perfect globe shaped Mangel with small top. The root grows almost entirely above ground with one tap root, making it adapted to shallow soil and very easy to harvest. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, 1 lb. 75c.

### Giant Red Eckendorf

This variety is raised extensively in Europe where root crops are grown on a much larger scale, and has also become very popular in the United States since being introduced here. The roots are red in color smooth, long and cylinder shaped. They grow to enormous size, weighing up to 15 and 20 pounds each. The flesh is firm and of high feeding quality. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, 1 lb. 75c.

### Giant Yellow Eckendorf

Is very similar to the Red Eckendorf, excepting that the color is yellow. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, 1 lb. 75c.

## SUGAR BEETS

**CULTURE.** Sugar Beets are now extensively grown in many sections of the country. The large yield per acre and the price paid by sugar factories make them a very valuable crop. Sugar Beets may also be grown for stock feeding. The seed bed should be thoroughly pulverized and worked for some time before planting, thereby destroying the early growing weeds before seeding time. The best time for seeding Sugar Beets is from May 15th to 25th. The seed should be sown in drills 20 to 24 inches apart, 1 to 1½ inches deep at the rate of ten pounds to the acre and when plants are 3 or 4 inches high they should be thinned to 6 inches apart.

### White American Sugar

Has perhaps a wider cultivation than any other Sugar Beet. While not as rich in saccharine it is as a rule more productive. Pkt. 5c, oz. 10c, ¼ lb. 25c, 1 lb. 75c.

## BROCCOLI

### Snow White

Broccoli is very much like the cauliflower in appearance but is not as desirable in climate that is warm and dry. It is very hardy and does very well where season is cool. But it stands greater extremes in temperature than cauliflower. Cook up in the same way as cauliflower. Pkt. 15c, oz. 50c, ¼ lb. \$2.25, 1 lb. \$8.00.

**CULTURE FOR EARLY CABBAGE.** Seed of the early varieties should be sown ¼ of an inch deep in a greenhouse, hot-bed, or in boxes in the house, about 6 weeks before the plants are needed for planting out.

If, when the second leaves appear, the plants can be transplanted, spacing them 3 inches apart, better and more hardy plants will be obtained.

As soon as the soil can be worked in the Spring the plants should be removed to the open field and set in rows 2 feet apart each way. Cultivate occasionally to keep out weeds and preserve the moisture in the soil until the plants shade the ground. One-half lb. of seed will produce plants for one acre.

**CULTURE FOR LATE CABBAGE.** The seed may be sown in rows 1 foot apart or broadcast in the garden, about the middle of May, and the plants set in the field the latter part of June.

Cultivation must begin as soon as the plants are set in the field, and continued as long as it is possible to get through them with a cultivator without injury to the plants.

### Early Jersey Wakefield

The earliest cabbage grown. Heads are very solid and conical in shape with very few outside leaves. Gardeners as a rule prefer this cabbage for early planting on account of its hardiness and ability to resist cold and unfavorable weather. Pkt. 5c, oz. 30c, ¼ lb. 90c, 1 lb. \$3.00.

### Gould's Reliable Wakefield

Is much larger than the Jersey Wakefield but not quite as early. Very much in demand both for market and the home garden. The heads are far superior to other strains of Wakefield Cabbage, being nearly double the size and of superior quality. Pkt. 5c, oz. 30c, ¼ lb. 90c, 1 lb. \$3.00.

### Early Winnigstadt

Very early and one of the very best varieties. The leaves are dark green and very tightly folded making it the hardest of any early cabbage. Does not suffer as much from cabbage worm and keeps better than most early cabbage. This cabbage is very popular for home gardens and when planted late makes very good winter cabbage. Pkt. 5c, oz. 25c, ¼ lb. 75c, 1 lb. \$2.50.

### Allhead Early

This is a second early variety, producing heads that are deep, but flat and very solid. They grow very rapidly making them very sweet and tender and much desired for kraut making. Is especially adapted for early and early winter use. Pkt. 5c, oz. 25c, ¼ lb. 75c, 1 lb. \$2.50.

### Gould's Reliable Sugar Beet

This we consider the very best Sugar Beet for sugar production. Is rich in sugar content. Try some in your garden. Make your own syrup and use for sweetening. Pkt. 5c, oz. 10c, ¼ lb. 25c, 1 lb. 75c.

### Gould's Giant Feeding

#### Half Sugar Mangel (For Stock Feeding)

Is a very large growing sugar beet which makes a good share of its growth above ground, making it easy to harvest. It is a heavy yielder, an excellent feeder, but is not fit for sugar production. Pkt. 5c, oz. 10c, ¼ lb. 25c, 1 lb. 75c.

## BRUSSELS SPROUTS

### Perfection

The stems are thickly set with large solid sprouts which may be boiled like cabbage or creamed like cauliflower. Makes a very delicious dish. Small heads or sprouts about one or two inches in diameter form on the stalks at each leaf joint. The sprouts are very hardy and will stand considerable cold. Pkt. 5c, oz. 20c, ¼ lb. 60c, 1 lb. \$2.00.

### Early York

Heads are small, heart shaped, firm and tender, also very early. Pkt. 5c, oz. 25c, ¼ lb. 75c, 1 lb. \$2.50.

Copenhagen Market Cabbage

### Copenhagen Market

A new early variety which has become very popular with the market gardeners. It is the finest large round-headed early cabbage in cultivation. The heads mature very much at one time allowing the gardeners to clean up with one cutting. The heads average about 10 pounds each and are very sweet and tender, also hard and solid with small core, while used extensively by market gardeners it is to be recommended for the home garden. Pkt. 5c, oz. 45c, ¼ lb. \$1.35, 1 lb. \$4.50.

### Early Summer

Deservedly popular with market gardeners throughout the country. The heads are large and solid, weighing 8 to 10 pounds each. This cabbage is also much in demand for kraut making, being sweet and tender and of excellent quality. Pkt. 5c, oz. 25c, ¼ lb. 75c, 1 lb. \$2.50.

## CABBAGE—Continued

### Glory of Enkhuizen

A very valuable sort on account of its earliness and good keeping qualities. The heads are globe shaped and very solid, weighing 8 to 11 pounds each. The outer leaves set close, permitting heavier planting, and resulting in a larger yield. Pkt. 5c, oz. 35c,  $\frac{1}{4}$  lb. \$1.00, 1 lb. \$3.50.

### All Seasons

Is an old standard and true to its name. It does well planted at all seasons. An excellent variety for fall and winter use. The heads are somewhat flattened but nearly round, very solid and of fine quality. The plants are very vigorous and are noted for withstanding the hot sun or a long dry spell. Pkt. 5c, oz. 30c,  $\frac{1}{4}$  lb. 90c, 1 lb. \$3.00.

Holland Cabbage

### Drumhead Savoy

The best of the Savoy or curly leaf type of cabbage. Produces a large solid head upon a short stem. It is very sweet and delicious especially after being touched by frost. Pkt. 5c, oz. 30c,  $\frac{1}{4}$  lb. 90c, 1 lb. \$3.00.

### Succession

A well known sort that is a good cropper for late summer or winter use. Is one of the surest crops. Grow to about 10 to 12 lbs. each, heads being hard and solid. Pkt. 5c, oz. 30c,  $\frac{1}{4}$  lb. 90c, 1 lb. \$3.00.

### Surehead

Heads are large, round, flattened uniform, very hard, firm and sweet. The average weight is 10 to 15 pounds. Is grown extensively for main crop of late cabbage, being hardy and an almost sure crop that stands up well in shipping. Pkt. 5c, oz. 30c,  $\frac{1}{4}$  lb. 90c, 1 lb. \$3.00.

### Late Flat Dutch

A low growing variety, heads large, bluish green, round, solid, broad and flat on top. An excellent fall and winter keeping variety. Pkt. 5c, oz. 25c,  $\frac{1}{4}$  lb. 75c, 1 lb. \$2.50.

### Rock Red

The best, largest and surest heading red cabbage. The head is large, round, very solid and of deep red color averaging about 8 pounds each. This variety is used mostly for cole slaw and pickling. Pkt. 5c, oz. 30c,  $\frac{1}{4}$  lb. 90c, 1 lb. \$3.00.

### Danish Roundhead

Is an improved strain of the Danish Ballhead, being slightly earlier, shorter stemmed and heavier. It is less liable to blight and is an excellent keeper. Pkt. 5c, oz. 30c,  $\frac{1}{4}$  lb. 90c, 1 lb. \$3.00.

### Danish Ballhead

This is one of the most largely grown varieties for fall shipping and winter keeping. It is large, round and solid. Grows well on all soil and resists most any kind of weather. Has few outside leaves, is tender and unsurpassed for boiling, slaw, and kraut making. Pkt. 5c, oz. 30c,  $\frac{1}{4}$  lb. 90c, 1 lb. \$3.00.

### Holland

The standard winter cabbage, and most remarkable late cabbage produced. The heads though not as large as some other varieties are hard and solid, fine grained and tender. If placed in a cool dry cellar they will keep until Spring, and be as firm and sound as when put away. Pkt. 5c, oz. 30c,  $\frac{1}{4}$  lb. 90c, 1 lb. \$3.00.

## CHINESE CABBAGE

Resembles the Cos lettuce somewhat and may be eaten raw, in a salad, or cooked same as cabbage. Does well in nearly all parts of the country and should be planted in July, and grown like late cabbage. Pkt. 5c, oz. 30c,  $\frac{1}{4}$  lb. 90c, 1 lb. \$3.00.

*The seeds we got from you were all first class. We surely liked the Chinese Cabbage.*

*Mrs. Fred Kern, Stillwater, Minn.*

## CAULIFLOWER

**CULTURE.** For early use the seed should be sown indoors either in a green house, hotbed or in the house about six weeks before setting out. Sow the seed  $\frac{1}{2}$  to  $\frac{3}{4}$  of an inch deep. When plants are one or two inches high they can be transplanted to about 3 inches apart thereby developing into stronger plants. As soon as the soil can be worked and pulverized, the plants may be set out in the open field 2 to 2  $\frac{1}{2}$  feet each way.

Cultivate freely until plants shade the ground completely. As soon as the heads start to form tie the leaves together over the head to keep out the light thereby keeping the heads pure white. For later crop seed may be sown in the garden any time after soil works up nicely.

### Snowball

The most popular variety for early and general crop. Produces nice snow white heads 6 to 8 inches in diameter, of extra fine flavor. Is considered a standard by the market gardener, also very desirable for the home garden. Pkt. 25c, oz. \$2.50,  $\frac{1}{4}$  lb. \$8.00.

### Model

A week later than the Snowball, but somewhat larger. Very attractive in appearance and delicious in flavor. It is not only suitable for early planting but superior for late planting. Heads are large and solid and weigh from 4 to 8 pounds. Pkt. 25c, oz. \$2.50,  $\frac{1}{4}$  lb. \$8.00.

### Danish Giant or Dry Weather

A larger and later variety that is generally planted for a fall crop. It will stand the hot dry weather of the summer months better than any other variety.

Pkt. 25c, oz. \$2.50,  $\frac{1}{4}$  lb. \$8.00.

Snowball Cauliflower

# CARROT

**CULTURE.** For the best results the soil should be well worked to a good depth. For early use sow seed in rows 15 inches apart as early in the Spring as the soil can be worked, sowing about 2 lbs. of seed per acre and cover the same with  $\frac{1}{4}$  inch of soil; but for main crop, sow about corn planting time, using 3 lbs. of seed per acre and the seed should be covered with nearly an inch of soil. One ounce of seed will sow

200 feet of drill. Make the rows two feet apart to allow for horse cultivation. Keep free from weeds and cultivate occasionally until the roots are large enough for table use and if grown for commercial purposes they may be cultivated with profit throughout the season.

When the plants are 3 inches high thin to 3 inches apart in the row.

## Chantenay (Select Stock)

The Chantenay Carrot has been the favorite with the market gardeners for many years. The flesh is of a beautiful orange color and of very fine quality. The roots taper slightly and are uniformly stump rooted and easy to pull. A very desirable variety for the home garden, as well as market gardeners. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.

## Improved Danver's Half Long

Is a well known stump rooted variety. The root is of a rich dark orange color, smooth and heavy yielding, making it very desirable for both marketing and stock feeding. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.

## Oxheart or Guerande

Earlier than the Danver's but not so long. It will produce a large thick carrot that can be very easily lifted from the ground. The flesh is bright orange, fine grained and sweet, roots growing to a length of about five inches long when mature. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.

## Early Scarlet or Short Horn

Is one of the best early varieties for outdoor planting. It has a short stump shaped root, flesh of a deep orange color. Very desirable for table use. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.

Improved  
Danver's  
Half Long

## Early French

The earliest variety, largely grown for forcing purposes. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.

Chantenay

Half Long  
Scarlet Nantes

## Half Long Scarlet Nantes, Stump Rooted

Tops of medium size; roots cylindrical, smooth, bright orange; flesh orange, becoming yellow in center but with no distinct core. Of the finest quality and one of the most symmetrical and handsome of the medium sized sorts; excellent for the market or home garden. Are about 5 to 6 inches long at maturing time. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.

## Amsterdam

A very select strain of the half long stump rooted type. The flesh is of a bright orange color. Roots are about 5 inches in length and are almost coreless. Our supply is very limited. Order early. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.

Oxheart Guerande

## Improved Long Orange

A well known standard sort with long pointed root, of a deep orange color. Suitable for the table and main crop. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.

## James Intermediate

A splendid variety, in shape midway between the half long and the long sorts. It is quite broad at the top and tapers to a blunt point. Flesh is rich reddish-orange, tender and sweet. Very desirable as a market variety, on account of the heavy yield, fine shape, appearance and excellent quality. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 30c, 1 lb. \$1.00.

## Large White Belgium

For stock feeding. The largest producer of all carrots one root often measuring 15 to 20 inches in circumference. It will produce as high as 20 to 30 tons per acre. Very fine for all kinds of stock, but is not a carrot for table use, being strictly a stock feed. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 30c, 1 lb. 90c.

## Victoria

A large yellow stock carrot by far the largest yellow carrot grown. The roots are exceptionally fine for all kinds of stock feeding, possessing high feeding properties. It is a heavy cropper on all kinds of soil, but is especially adapted for rich, sandy loam. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 30c, 1 lb. 90c.

## CELERY

**CULTURE.** For early planting sow in greenhouse or hotbed from the 1st to the 15th of March. Celery seed being so small and slow in germinating it is very essential that the seed bed be well prepared. Sow the seed in rows two inches apart and do not cover with more than  $\frac{1}{4}$  or 1-10 of an inch of fine soil, press down firmly and cover with burlap. Moisten daily by sprinkling the burlap until seed is germinated. When plants are 2 inches high they should be transplanted into a different bed of fine rich soil 3 inches apart each way to give them a chance to grow stocky. When 4 to 6 inches high they may be planted in the open if the weather permits and the soil can be well prepared. Celery requires very rich soil and for the home garden may be planted 6 inches apart both ways with earth or board on the outside of bed when time for bleaching. For this method the self blanching varieties are necessary.

### Gould's Reliable Self Blanching

This is a strain of French grown seed that we have sold for many years and we do not hesitate to recommend it as the best celery grown. The outer ribs assume a beautiful golden yellow, while the heart or vine stalks are deliciously tender, brittle and sweet. Is extensively grown for both market and private use. Pkt. 15c; oz. \$1.00;  $\frac{1}{4}$  lb. \$3.00; 1 lb. \$10.00.

### White Plume

The earliest celery grown. It is hardy and requires very little effort to produce. Is in much demand for market on account of its fine appearance, also because it requires very little time for blanching. Pkt. 5c; oz. 35c;  $\frac{1}{4}$  lb. \$1.00; 1 lb. \$3.50.

### Giant Pascal

A very popular variety for winter use. It has very large stalks which when bleached are of a creamy yellow color. Stalks are exceptionally thick with heavy hearts. Pkt. 5c; oz. 35c;  $\frac{1}{4}$  lb. \$1.00; 1 lb. \$3.50.

## CELERIAC

**CULTURE.** Celeriac seed may be treated the same as celery until outdoor planting. Plant in rows 14 inches apart, 3 or 4 inches apart in the row.

### Large Smooth Turnip Rooted

The best there is. This vegetable deserves a wider recognition by growers or home gardeners. Is fine for flavoring soups or roots may be cooked up creamed. Pkt. 5c; oz. 25c;  $\frac{1}{4}$  lb. 75c; 1 lb. \$2.50.

## WHITLOOF CHICORY

### Or French Endive

Used as a winter salad. May be used as a Cos lettuce, and is delicious when served with French dressing. The plants form long parsnip-shaped roots that are lifted in the fall, trimmed of leaves, and stored in soil in a cool place until wanted for forcing. Pkt. 5c; oz. 30c;  $\frac{1}{4}$  lb. 90c; 1 lb. \$2.75.

## SWEET CORN

### Varieties Listed According to Earliness

**CULTURE.** Have your soil well prepared but do not plant sweet corn until the ground is warmed up thoroughly. Then the early varieties may be planted in hills 30 inches apart both ways while the later varieties

Gould's Reliable Self Blanching Celery

## CHIVES

Are hardy perennial plants of the onion type. The tops are used for flavoring. Quicker results are obtained by setting out plants than by seeding as seedlings will not do much the first year, while the sets or plants will multiply very rapidly. Pkt. 10c; oz. \$1.00;  $\frac{1}{4}$  lb. \$2.50; 1 lb. \$8.00.

## CRESS

**CULTURE.** Sow seed thickly in shallow drills 12 inches apart in the spring, and for a succession every two weeks. One ounce of seed required for 200 feet of drill.

### Fine Curled (Pepper Grass)

Quick growing; leaves finely cut like parsley; growth dwarf and compact; crisp and pungent. Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 30c; 1 lb. 90c.

### Water Cress

Sow the seed in cool, moist soil in the early spring or if a shallow slow running stream or ditch is near, the seed may be sown within the same near the bank. When sown in a location of this kind it grows luxuriantly for years. Highly esteemed as a salad; also used as a garnish. Pkt. 10c; oz. 50c;  $\frac{1}{4}$  lb. \$1.50; 1 lb. \$5.00.

### GOULD'S NORTHERN GROWN SEED

Market gardeners and private planters should keep in mind the important fact that Sweet Corn produced in the North is earlier and more hardy than the same varieties grown farther south. We do not think it too much to claim that nearly all of our varieties of Sweet Corn matures, easily a week to ten days earlier than the same varieties produced elsewhere. This means a great deal to the gardener who wishes to have his Corn first to market, for it is then that the best prices are obtained. It is equally as important also to the private planter growing Corn for his own table, as it lengthens the season for all varieties.

### Early Dow.

A week earlier than Golden Bantam. The ears are small but well shaped. Being the first on the market it commands a good price. Mam. Pkt. 10c;  $\frac{1}{4}$  lb. 15c; 1 lb. 30c; 5 lbs. \$1.25.

### Peep O'Day

A very early white sweet corn of excellent quality. Stocks grow only about 4 feet high, but very often yield 2 or 3 well shaped ears on each stock. The ears are from 5 to 6 inches in length having 8 to 12 rows of pure white kernels which are very tender and sweet. Mam. Pkt. 10c;  $\frac{1}{4}$  lb. 15c; 1 lb. 30c; 5 lbs. \$1.25.

# SWEET CORN—Continued

To have the finest Sweet Corn it must be picked in just the right condition, that is, when the skin of the grain breaks at the slightest puncture. It will be of inferior quality if it is either a few days too young or too old.

The Golden Giant is all that you claim for. It is about 3 to 4 days later than the Bantam; yields just as many ears, twice as large as the Bantam.

Jos. J. Le May, Mendota, Minn.

We have used your seeds almost exclusively for many years, and with few exceptions they have given entire satisfaction, and have proved true to name, and of the highest germination.

The Early Dow Sweet Corn proved very good. Your Squash and Melon seed of last year were particularly good, ninety five percent of the seed coming up and making practically a perfect stand from the first planting. We have just cut some Winter Melons (December 26) grown from your seed, and they are sound and sweet.

Eugene Marien, Highwood, Minn.

Country Gentleman Sweet Corn

I am well satisfied with the seed I got. Some of the best I have had in years.

Mrs. O. D. Shumway, Castle Rock, Minn.

Your seeds were very satisfactory.

A. E. Belanger, Moberidge, S. D.

I have harvested my garden products which was planted with Gould's Reliable Seeds last spring and everything was very satisfactory.

Mrs. Clarence Larson, Scandinavia, Wis.

I have found your seeds to be reliable. If they hadn't been reliable I wouldn't have bought year after year from you. Your seeds have always germinated well and produced a good crop.

Ben Nelson, Centuria, Wis.

## Gould's Early Golden Giant

Gould's Golden Giant excels all other early varieties in size, productiveness and quality, and all of the late varieties in quality and early maturity. Because of the extreme tenderness, combined with the exquisite rich sugary flavor, the Golden Giant has become the standard of perfection for sugar corn.

Mam. Pkt. 10c;  $\frac{1}{4}$  lb. 20c; 1 lb. 40c; 5 lbs. \$1.75.

## Golden Bantam

Recognized by most every one as the sweetest corn grown. It produces a fair sized ear of beautiful golden yellow kernels. May be planted at intervals of two weeks until July 1st. Is very hardy and productive.

Mam. Pkt. 10c;  $\frac{1}{4}$  lb. 15c; 1 lb. 30c; 5 lbs. \$1.25.

## Early Minnesota

Is a standard early sort of very good quality, just a few days later than Golden Bantam but with little larger ears of white grains. Very desirable where seasons are short. A fine corn for market, home and canning use. Mam. Pkt. 10c;  $\frac{1}{4}$  lb. 15c; 1 lb. 25c; 5 lbs. \$1.00.

## Extra Early White Cory

A well known early variety. Ears are about 6 inches long with 8 rows of broad kernels. Grows well where seasons are short, and can be recommended for general planting. Mam. Pkt. 10c;  $\frac{1}{4}$  lb. 15c; 1 lb. 25c; 5 lbs. \$1.00.

## Mammoth White Cory

One of the very best for early market or home garden. The stalks usually reach a height of four feet, bearing two ears of fine corn. The grain is pure white, large and of fine quality considering its earliness.

Mam. Pkt. 10c;  $\frac{1}{4}$  lb. 15c; 1 lb. 25c; 5 lbs. \$1.00.

## Howling Mob

Is a second early variety of very good quality. The stalks will grow 5 or 6 feet high, producing one or two ears on each stalk. The ears are 7 to 9 inches in length and are well covered with a heavy husk, affording protection from green worms which so often are destructive to early varieties. Mam. Pkt. 10c;  $\frac{1}{4}$  lb. 15c; 1 lb. 30c; 5 lbs. \$1.25.

## Pocahontas

A large early variety of very uniform growth. The ears are 6 to 8 inches long and are evenly filled with broad, white kernels which are tender and sweet.

Mam. Pkt. 10c;  $\frac{1}{4}$  lb. 15c; 1 lb. 30c; 5 lbs. \$1.25.

## Golden Giant Evergreen

A large yellow Sweet Corn obtained by crossing Golden Bantam with Stowell's Evergreen. The ears are 8 to 9 inches long and contains 12 to 14 rows of beautiful yellow kernels. The flavor is very much like Golden Bantam and it matures about two weeks later. Mam. Pkt. 10c;  $\frac{1}{4}$  lb. 15c; 1 lb. 30c; 5 lbs. \$1.25.

## Early Evergreen

Although called Early Evergreen it is not real early, but rather should be classed as a late sweet corn. It is however, the earliest of the late varieties. It produces large white ears of extra fine quality, which mature about 10 to 15 days ahead of Stowell's Late Evergreen. We recommend it very highly for both home and market gardens. Mam. Pkt. 10c;  $\frac{1}{4}$  lb. 15c; 1 lb. 30c; 5 lbs. \$1.25.

## Country Gentleman

A great favorite for the home garden. It does not grow very large but the kernels being very deep and packed so tightly together that the food value from one ear is almost as great as that on larger ears. The flavor is delicious. Mam. Pkt. 10c;  $\frac{1}{4}$  lb. 15c; 1 lb. 30c; 5 lbs. \$1.25.

## Stowell's Late Evergreen

The best known and most popular late variety. It is distinguished by its large ears with long deep kernels, of a rich sugary flavor which can not be surpassed. Mam. Pkt. 10c;  $\frac{1}{4}$  lb. 15c; 1 lb. 30c; 5 lbs. \$1.25.

Golden Bantam  
Sweet Corn

Stowell's Evergreen  
Sweet Corn

# CUCUMBER

**CULTURE.** Plant in hills 6 feet apart each way, 10 to 20 seeds may be planted in each hill, covering a circle 15 inches in diameter. When plants are three or four inches high they may be thinned to 5 or 6 to a hill, allowing for cut worms and beetles destroying one or two. Cultivate frequently until the vines cover the ground. The seed may also be started in berry boxes by placing them in a hot-bed. When weather is suitable—settled and warm—remove the box as plants are placed in the garden. The fruit should be gathered as soon as large enough for use, or else the productiveness of the vines will be permanently injured.

## N. K. & Co's. Sterling

One of the earliest cucumbers of the White Spine type. For general use it is unsurpassed. It can be picked at any size and used for pickles if desired, and will also make a fine large cucumber. Is one of the most attractive and heaviest producers, coloring up to a very deep green. Its excellent quality, being brittle and crisp with a delicate flavor, has made it suitable for market, shipping and home gardens alike. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.50.

## Davis Perfect

A selected strain of Long White Spine which retains its dark green color and good qualities long after being picked. The flesh is crisp, solid and fine flavor, and has but few seeds. Will average about ten inches or more in length, is quite slender, tapering slightly at both ends. The vines are very vigorous and good producers. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.50.

## Gould's Pickling

Fruit is of medium size slightly tapering at each end, and of a deep green color. The flesh is crisp and tender. It is very productive. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.

## Long Green

Produces dark green fruit from 10 to 14 inches long. Flesh is firm and crisp. Fine for slicing, also desirable for ripe cucumber pickles. The bulk of the crop matures late, and is in much demand for both the home garden and for market gardeners. Pkt. 3c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.50.

## Cool and Crisp

A strain of the White Spine, large, of dark green color, fine for table use, also for pickling. Matures early. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.35.

## Boston Pickling

Very productive, and grown mostly for pickles. The fruit is medium size, bright green in color, and smooth, with the flesh crisp and tender. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.

## Chicago or Westerfield Pickling

Is medium in length, jointed at each end, and has large spines. Is very prolific, and a favorite of many who grow pickles on a large scale. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.

Davis Perfect Cucumbers

## Arlington White Spine

One of the earliest and true to type of the White Spine family, has a bright deep green color. Measures 8 to 10 inches in length, and is somewhat slender and pointed at both ends. Is much used for the home garden and for bulk pickles. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.50.

## Extra Long White Spine

An extra fine variety for either greenhouse or outdoor crop. It grows to a large size in a very short time and commands fancy prices on account of its fine appearance. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.50.

## White Spine Evergreen

A fine strain of White Spine bearing smooth, round, dark green fruit 10 to 12 inches long of fine quality. Especially recommended for hotbed culture. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.50.

## White Spine Improved

Produces a large handsome fruit of uniform size, is crisp and of fine flavor. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.50.

## Green Prolific

Very productive; planted both for slicing and pickling. Grows to medium size, with flesh crisp and tender. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.

## Klondike

One of the best varieties for slicing. Produces handsome, very dark green fruits slightly striped at the ends, equal in appearance to hot-house specimens. A white spined cucumber of medium early maturity, fruits averaging about eight inches in length and two inches in diameter, uniform in size and shape.

The vines are very hardy and productive and continue long in bearing. Market gardeners find this variety especially desirable because it retains its dark green color much longer and is less affected by the hot sun than most other sorts. Much used as a shipping cucumber, but is also adapted for the home garden. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.50.

## Japanese Climbing

A vigorous grower. Very desirable for planting along fence or trellis in small gardens. Fruit 10 to 12 inches long, tender and crisp. Very fine for table use. Pkt. 5c, oz. 20c,  $\frac{1}{4}$  lb. 60c, 1 lb. \$2.00.

# EGG PLANT

**CULTURE.** Sow in hotbed in March and April, and when two inches high transplant to pots or boxes to develop growth. About June 1st plant in field or garden 2½ to 3 feet apart each way and cultivate same as cabbage or tomato. Protect young plants from sun as much as possible, also see that potato bugs do not infest the plants and destroy them.

## New York Spineless

The standard for the garden. The plants are stocky and low branching and produce extra large dark purple fruit of perfect shape. Is the handsomest type and most perfect strain of Egg Plants, usually bearing eight to ten large fruits of the finest quality during a season. Pkt. 10c, oz. 60c, ¼ lb. \$1.75, 1 lb. \$6.00.

## Black Beauty

Slightly earlier than the N. Y. Spineless but not so large. The skin is of a rich dark purple color, and very desirable for market as the skin holds its color for a long time. Pkt. 10c, oz. 60c, ¼ lb. \$1.75, 1 lb. \$6.00.

# ENDIVE

This plant furnishes attractive and appetizing salad for the fall and winter months, or by repeated sowings a supply may be had nearly all the year round. Useful in flavoring soups, stews, etc. Makes delicious greens if cooked like spinach.

**CULTURE.** Cultivation same as for lettuce.

## Broad Leaved Batavian

One of the best varieties for salads. Leaves are broad, more or less twisted and waved with bright deep green, with nearly white midrib. Inner leaves form a fair head which blanches to a creamy white. Crisp tender, and of fine flavor. Pkt. 5c, oz. 15c, ¼ lb. 45c, 1 lb. \$1.25.

## Green Curled

A hardy and vigorous grower, with bright deep green leaves finely cut. The leaves should be tied up in the shape of a head for 3 or 4 weeks before using. This variety is also very popular with Market and Home Gardeners. Pkt. 5c, oz. 15c, ¼ lb. 45c, 1 lb. \$1.25.

## White Curled

Leaves are of a very light yellowish green that bleaches almost white. Pkt. 5c, oz. 15c, ¼ lb. 45c, 1 lb. \$1.25.

Green Curled Endive

# GOURDS

Plants about June 1st wherever a screen is wanted to cover an old fence or shade for poultry. Fruit is used largely for ornamental purposes. Mixed varieties. Pkt. 5c, oz. 35c, ¼ lb. \$1.00, 1 lb. \$3.50.

New York Spineless Egg Plant

# KALE

**CULTURE.** Sow in May or June and cultivate the same as cabbage. Makes excellent greens and is improved by light frosts.

## Dwarf Curled

A very finely curled dwarf spreading variety. Foliage is long and bright green. Is even more hardy than cabbage, and produces excellent greens for winter and spring use. Pkt. 5c, oz. 15c, ¼ lb. 45c, 1 lb. \$1.25.

## Tall Curled

This variety grows to a height of two and three feet, bearing long plume-like leaves of a light green color. Is another very hardy Kale that is rather improved than injured by fairly heavy frosts. Pkt. 5c, oz. 15c, ¼ lb. 45c, 1 lb. \$1.25.

# KOHL RABI

**CULTURE:** Sow in drills 15 inches apart, ½ to ¾ inch deep. When a few inches high thin to 6 to 8 inches apart in the row and cultivate same as beet. Bulbs grow above ground. Roots should be prepared like turnips or cauliflower for cooking, having a much sweeter and finer flavor than the turnip.

## Early White

Very early, producing small white bulbs. Used especially for forcing. One of the best for table use. Pkt. 5c, oz. 25c, ¼ lb. 75c, 1 lb. \$2.50.

## Early Purple

Very much the same as White excepting in color, the skin being purple. Bulbs are of medium size, with the flesh white. Much used for early outdoor planting or for forcing. Pkt. 5c, oz. 25c, ¼ lb. 75c, 1 lb. \$2.50.

# LEEK

## American Flag

Sow about May 1st in drills 12 inches apart from ½ to 1 inch deep. When 8 inches high transplant to rows 15 inches apart and 8 inches apart in row, setting the plants in the ground up to their center leaves and drawing the ground up as they grow, causing them to bleach. This makes the leek more palatable. Pkt. 5c, oz. 30c, ¼ lb. 90c, 1 lb. \$3.00.

# LETTUCE

**CULTURE.** Lettuce is the most popular of all salad plants and at the same time is one of the easiest to grow due to its comparative freedom from disease and insects. All types of lettuce will do very well on rich, loose, light loams or on any good garden soil, but should never be planted on heavy compact soil. Seed may be sown in the open from April 20th to August 1st, or planted in the house or in frames any time after March 10th. Rows to be  $1\frac{1}{2}$  feet apart, plants two inches apart in row after thinning. One ounce of seed will sow 150 feet of row, 2 to 2  $\frac{1}{2}$  lbs. required per acre.

## LOOSE LEAVED VARIETIES

### Grand Rapids

The most popular variety to grow for market. When exposed for sale it retains its handsome fresh appearance longer than any other variety. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.50.

### Black Seeded Simpson

One of the best for outdoors. It has large, thin, loose leaves of light green color, which are very tender and crisp. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.25.

### Prizehead

The name is rather deceiving, it being a crisp and tender, loose leaf sort with a reddish brown tint of fine quality. One of the best for the home garden, for it is easily grown. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.25.

Grand  
Rapids  
Lettuce

## Culture for Head Lettuce

If lettuce plants have been started indoors as suggested at the top of page, they should be transplanted as soon as they begin to crowd. Place them six inches apart in the row in extra rich soil and if the sun has become very hot, it will be best to furnish partial shade. Keep the soil well cultivated around the plants to destroy weeds and preserve a soil mulch. Water frequently during dry weather.

When the heads start to develop work up the soil around them so as to induce close, compact growth. As soon as the outside leaves are large enough they should be brought together and tied over the top with raffia. This should be done more loosely than with cauliflower and the plants must be closely watched so that they can be used at the right stage of development. Tying the heads in this manner helps to blanch them and make them deliciously tender and crisp.

## HEADING VARIETIES

### Sterling

The earliest of the Heading Varieties, fine for forcing, as well as for the home garden. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.50.

### Black Seeded Tennis Ball

One of the best medium size for forcing or early outdoor planting. Heads are solid, sweet and tender. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.25.

### Big Boston

A standard head lettuce and a favorite with the Market Gardeners. Is very hardy and vigorous and quite tender. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.50.

### Crisp as Ice

A large solid head with outer leaves variegated brown and green. Has a delicious flavor and is the ideal lettuce for the home garden. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.50.

### Iceberg

Heads are large and firm and well blanched. Color of leaves is light green with faint brown tracing on the border. Is a quick grower, heads being always crisp and tender. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.50.

Crisp as Ice Lettuce

### Hanson Head

An old reliable sure heading sort. Color clear light green. A fine variety for midsummer planting as it stands the hot weather better than most sorts. Much in demand by both the Market and Home Gardener. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.50.

### May King

A large early compact heading variety, unequaled for early spring planting. The outer leaves are of a light yellowish green, tinged with reddish brown. The heart bleaches to a rich golden yellow, having a fine, rich buttery flavor. Heads weigh nearly a pound on the average. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.50.

### New York or Wonderful

A very large, late popular heading variety. It roots deeply and therefore can resist the hot dry weather, making it very desirable for late planting. The color is a clear dark green, the heart blanching beautifully, being crisp, tender and delicious. This lettuce is sometimes erroneously called Iceberg, but should not be confused with the real Iceberg which has a slight brown tracing on the border. Pkt. 5c; oz. 30c;  $\frac{1}{4}$  lb. 90c; 1 lb. \$3.00.

### Tenderheart

A large early head lettuce of very fine appearance. The heads are very compact and tender, with a delicious flavor. The color of the outside leaves is pale green with a reddish brown tinge. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.50.

### Salamander

It forms large solid heads of thick, smooth, tender leaves of fine quality. It withstands hot weather remarkably well, and remains in head a long time before going to seed. Therefore can be planted any time during the summer. One of the best heading varieties to grow outdoors. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.50.

### Paris White Cos

A very distinct variety of lettuce, having large, elongated, compact heads of oblong shape. Bleaches mild and crisp, especially if tied like cauliflower. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.50.

Winter Melon.

## WATERMELON

**CULTURE.** The soil must be rich, light, sandy loam to obtain best results. Plant in hills 8 to 10 feet apart each way, putting 10 to 15 seeds in each hill from  $\frac{1}{2}$  to 1 inch deep. When 3 inches high, thin to about 4 plants in each hill. Cultivate often.

### Winter Melon

This melon is without a doubt the sweetest, firmest, most crisp and delicious of any watermelon grown. The rind is but  $\frac{1}{4}$  to  $\frac{1}{2}$  inch thick. If picked from the vines before frosted, and placed in a cool dry place or buried in dry sand, it will keep until the Holidays. The Winter Melon will, however, keep well most any place, for two or three months after being picked. They differ from other melons, being slow to decay, very much like an apple.

Although we offered the Winter Melon seed for the first time in 1922, it has more than met up with our expectations of being the sweetest, most crisp and delicious water melon grown. It has proven a distinct surprise to the hundreds who tried it out last year.

One St. Paul Institution that secured a few of these melons came back the following day with an order for one hundred more.

The Winter Melon is late to mature, is nearly round, and looks very much like a citron, but is very light in color. A wonderful Melon. **Pkt. 5c; oz. 20c;  $\frac{1}{4}$  lb. 60c; 1 lb. \$2.00.**

*The seeds you sold me were A No. 1. I received a very good return and if the ground had been better I sure would have had a good crop of Carrots, Beets and Parsnips, but it was new-ly broke and still I got better than any one around here.*

*M. Mortensen, Earl, Wis.*

**StimUpland**  
Makes a  
Wonder Garden

A tablet every two weeks until three or four have been used—will make melons fairly jump. See page 55.

### Klondike

One of the earliest and best watermelons for the Northwest. It is almost round and grows to a fair size. Skin is of the light striped green colors. The flesh is a deep scarlet, very sweet and firm. The rind is thin, making it an ideal melon for the home gardens. **Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 30c; 1 lb. \$1.00.**

### Phinney's Early

Very early, of medium size. A good producer, of oblong shape, with thin smooth rind, and fine quality. **Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 30c; 1 lb. \$1.00.**

### Kleckley's Sweets

Oblong, medium early and of fair size. Skin is dark green and flesh a bright scarlet. One of the best early varieties for home use. **Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 30c; 1 lb. \$1.00.**

### Harris' Earliest

A large early melon of oval shape. Skin green striped. Flesh bright red, and very delicious and tender. One of the first maturing melons. **Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 30c; 1 lb. 90c.**

### Ice Cream or Peerless

Rind thin, of a light green color. Flesh bright scarlet and solid to the core. Is very sweet. **Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 30c; 1 lb. 90c.**

### Gypsy or Georgia Rattlesnake

One of the largest and finest melons grown. Is finding favor with Northern growers, as it is a splendid keeper and shipper. Is oblong in shape, striped and mottled with green. Flesh is brightest scarlet, of sweet and delicious flavor. **Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 30c; 1 lb. 90c.**

### Citron for Preserves

Fruit is round and smooth, and very prolific. It is not edible raw, but makes very fine transparent preserves, of a peculiar fine flavor. **Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 30c; 1 lb. \$1.00.**

## Gould's Osage Muskmelon

Reproduced in Color on Front Cover Page True to Life

Gould's Osage Muskmelon is by far the finest, most luscious and pleasing Muskmelon grown. The vines are especially hardy insuring nearly always a heavy yield of wonderful melons every year. It is the ideal melon for the market gardener, the dealer, and the consumer as well as for the family garden. In fact it is the melon for everybody.

*We have used your Reliable seeds for eight years and have no failure of any kind. I have nothing but the best to say for Gould's Reliable Seeds. They have always proved satisfactory to us folks.*  
Mrs. I. L. Walrath,  
Eden Valley, Minn.

The special strain that we offer, has been selected with great care year after year until we feel now that Gould's Osage Muskmelon has attained the height of perfection in flavor, shape, and color. Shape is nearly round, slightly ribbed, skin dark green and partly netted. The flesh is of a deep salmon color, very thick and having a small seed cavity. Pkt. 5c; oz. 20c;  $\frac{1}{4}$  lb. 60c; 1 lb. \$1.75.

*Your Gould's Standard is the best tomato that I have ever grown. I had a wonderful yield last summer of some of the finest tomatoes I have ever seen. Some weighed close to a pound each.*  
Henry Kruschke,  
St. Paul, Minn.

Gould's  
Osage  
Muskmelon

### What Expert Gardeners Say of Gould's Osage Muskmelon

I have grown Osage melons from your seed for the past ten years and always had splendid results.

The summer of 1922 being extremely hot and dry, some parts of my crop did not do so well, but others that were on low ground gave an abundant yield. I have always had good results from all your seeds.

A. G. Willie, Inver Grove, Minn.

Regarding Gould's Osage Muskmelon Seeds which I purchased of you last spring. They were exceptionally good as to yield; for quality they were the very best I have grown. I cannot recommend this strain too highly, either for home or commercial garden.

J. Roy Marien,  
Highwood Park, Minn.

## MUSKMELON—Continued

**CULTURE.** Muskmelons do best on moderately rich light, warm mellow loam. Do not plant until the ground has warmed thoroughly, as they will start quicker and be able to withstand the attacks of insects so much better.

Plant in hills 5 or 6 feet apart both ways. Mix in the hill before planting, one large cupful of Garden Fertilizer. Plant 1 inch deep, 10 to 15 seeds to the hill. When plants are 3 inches high, thin to 4 or 5 in a hill, leaving the best plants.

### Rust Resistant Pollock

These melons run uniform in size and are exceptionally heavily netted. The flesh is green, shading to salmon color near the seed cavity which is unusually small. The meat is firm and the flavor unexcelled. **Pkt. 5c; oz. 20c; ¼ lb. 60c; 1 lb. \$1.75.**

### Netted Rock

A heavy meated cantaloupe of the Rocky Ford type. The flesh is green, tinged with salmon pink around the seed cavity. The flavor is delicious, being sweet, luscious, melting. **Pkt. 5c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.50.**

### Imp. Rocky Ford Cantaloupe

The fruit is small, almost round, showing no ribs but densely covered with a heavy gray netting. The flesh is thick, of deep green color and highly flavored, with a golden lining around the seed cavity, also vigorous and very productive. It is a very desirable melon for both the market and home garden. **Pkt. 5c; oz. 20c; ¼ lb. 60c; 1 lb. \$1.75.**

### Yellow Meated Japan

The melon is nearly round, grows to a large size, often weighing from 10 to 12 pounds each. It is unevenly ribbed, the skin turning from greenish white to yellowish white when ripe. The flesh is very thick of extremely delicious flavor, the color deep salmon. A very fine melon. **Pkt. 5c; oz. 20c; ¼ lb. 60c; 1 lb. \$1.75.**

*The seeds that I purchased from you last spring proved very satisfactory, especially the Yellow Meated Japan Must Melon which proved to be just fine. I have raised Melons for twenty-five years and never had better results than I did this year from the seeds purchased of R. L. Gould & Co. Oliver Lowry, Colfax, Wis.*

**StimUplant**  
Makes a  
Wonder Garden

A tablet every two weeks until three or four have been used—will make melons fairly jump. See page 55.

## MUSTARD

### Giant Southern Curled

Used largely for salads or greens. **Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 75c.**

### White Seeded

This seed is used for Pickles. **Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 75c.**

**Culture.** Sow the seed thickly in rich ground as soon as the ground has become warm, in drills 3 feet apart and one inch deep. Thin out to ten inches apart and cultivate freely.

### Mammoth Long Podded

Very productive and bear dark green pods from 8 to 9 inches long. **Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 75c.**

### Early Netted Gem

Slightly oval in form, finely netted, being a light golden hue when fully ripened. Flesh light green in color, ripens close to the skin and is very sweet. **Pkt. 5c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.25.**

### Paul Rose or Petoskey

An oblong melon of the Osage type but smaller. The fruit is deep green slightly ribbed and fairly netted. The flesh is a rich orange color, very sweet and highly flavored. Ripens close to the rind. **Pkt. 5c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.50.**

### Honey Dew Melon

Is in a class by itself. It is almost round; the skin is smooth and of a creamy yellow color. The flesh is light green and very sweet. We recommend starting in cold frames. **Pkt. 5c; oz. 20c; ¼ lb. 60c; 1 lb. \$2.00.**

### Late Hackensack or Turk's Cap

Fruit is large, round, heavily ribbed and netted. Meat is green, very thick and sweet. A heavy yielder. **Pkt. 5c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.50.**

### Extra Early Hackensack

Is the earliest of the large netted varieties. The skin is green netted; with flesh also light green and very sweet, having a delicious, rich, sugary flavor. **Pkt. 5c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.50.**

### Emerald Gem

A very early richly flavored melon of yellow colored flesh. The skin is quite smooth of a deep green color. Vines are vigorous and very productive. **Pkt. 5c; oz. 20c; ¼ lb. 60c; 1 lb. \$1.75.**

### Extra Early Citron or Nutmeg

Fruit is round, slightly flattened, 6 to 8 inches in diameter, ribbed and netted. Flesh, thick and pale, green in color, and very sweet. Matures early and is a good producer. **Pkt. 5c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.25.**

## MUSHROOMS

### Lambert's Pure Culture Spawn

In bricks of 18 to 24 ounces each. 1 brick will spawn 10 square feet of bed. Prices per brick postpaid; 40c each; by express or freight 10 bricks \$2.50; 25 bricks \$5.00; 100 bricks 18.00 F. O. B. St. Paul, Minn.

## OKRA

### Dwarf Green

Grows low, but stocky and is very prolific. **Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 75c.**

### White Velvet

Has long smooth white pods which are very tender until almost full grown. **Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 75c.**

# ONIONS

**CULTURE.** Sow just as early as possible, that is, when the ground can be worked up nicely. Have your seed bed in perfect shape, for onions are slow in coming up and require close cultivation. It is sometimes advisable to mix a few radish seeds with your onion seed so as to allow for earlier cultivation. One ounce of seed will sow 200 feet in drill  $\frac{1}{2}$  inch to 1 inch deep, 4 to 5 pounds of seed to an acre drilled 13 to 14 inches apart for hand cultivation or 20 to 22 inches apart for cultivating with horse. Cultivate often. Do not allow soil to bake.

See  
Page 21

Gould's Minnesota White Globe Onion

## QUALITY

The importance of high quality is especially emphasized in Onion Seed. The difference in yield between the best and ordinary seed may be 50 to 100 bushels per acre. Buy the best seed you can get. It will pay.

*We are very much pleased with the seed you sent us last spring. That fifty cents of Onion we got ten bushels back and the potatoes were the best we had.*

Andrew Kaiser,  
Dubuque, Iowa.

Gould's Minnesota Yellow Globe Onion

See  
Page 21

## Gould's Minnesota Globe Onions

Everywhere Globe Onions bring the best prices and since our Minnesota Red, Yellow and White strains are the most highly developed of all globes we confidently recommend them to growers who want onions that will top the market.

A sound, well-ripened onion crop can be put away in the Autumn and held for 6 to 8 months under suitable conditions with a shrinkage of not much more than a pound per bushel per month. Experienced growers are careful, however, to plant a select strain of seed which has been bred to produce long-keeping, perfectly ripened bulbs. Consequently the demand for our Minnesota strains is continually increasing; many growers now place their orders a year in advance.

## RED VARIETIES

### Gould's Minnesota Red Globe

This beautiful strain of Red Globe onions is the result of many years' selection. For trueness of type, perfection of color and long keeping qualities, it is recognized as the best there is. The color of Minnesota Red Globe is a deep blood-red, extra dark, while the surface is smooth and glossy. The flesh is white, tinged with light purple, fine grained and unsurpassed in flavor. **Pkt. 5c; oz. 25c;  $\frac{1}{4}$  lb. 75c; 1 lb. \$2.50.**

## FERTILIZERS

The two principal fertilizers for onions are Nitrate of Soda and Muriate of Potash; the latter being used on rich lands. For fertilizers of all kinds see page 58.

Gould's Minnesota Red Globe Onion

### Southport Red Globe

A standard Red Globe onion of very good quality, and attractive in color. This onion is very uniform both in size and shape. Grows to a diameter of from two and a half to three and a half inches. **Pkt. 5c; oz. 20c;  $\frac{1}{4}$  lb. 60c; 1 lb. \$2.00.**

### Large Red Wethersfield

One of the oldest and best known types of red onions. It is large and quite flattened. Used extensively now for growing sets. Skin is purplish red, smooth and glossy; flesh white, slightly tinged with pink, and strong flavored. Grows well on poor or dry soil, and is a sure cropper and heavy yielder. **Pkt. 5c; oz. 20c;  $\frac{1}{4}$  lb. 60c; 1 lb. \$1.75.**

### Large Red Globe

A handsome, dark red, globe-shaped Onion. It averages three inches in diameter and nine to ten ounces in weight. The bulbs have thin necks, which ripen down forming a hard, solid, globular bulb. **Pkt. 5c; oz. 20c;  $\frac{1}{4}$  lb. 60c; 1 lb. \$2.00.**

### Red Bermuda

Bulbs of this variety are similar in form and early ripening to the Bermuda White, but grow large in size, ranging from three to four inches in diameter, very flat and of a light pink color. The flesh is white, slightly suffused with pink. **Pkt. 5c; oz. 30c;  $\frac{1}{4}$  lb. 90c; 1 lb. \$3.00.**

## ONIONS—Continued

### WHITE VARIETIES

#### Gould's Minnesota White Globe

Without a doubt the best White Globe onion grown. It is pure white, mild, and a good keeper. Being much milder than the red or yellow varieties, it is much preferred for family use. Our Minnesota White Globe Onion is one of the very finest varieties in existence. Pkt. 5c, oz. 35c,  $\frac{1}{4}$  lb. \$1.00, 1 lb. \$3.50.

#### Southport White Globe

Is a standard of the White Globe varieties. Flesh is crisp, mild, fine grained and pure white. Bulbs should be stored in a cool dark place as soon as matured. Pkt. 5c, oz. 30c,  $\frac{1}{4}$  lb. 90c, 1 lb. \$3.00.

#### White Bunching

An extra early round white variety. It is exceptionally fine for early bunching, table, and for boiling. Matures large, snowy white onions. Pkt. 5c, oz. 30c,  $\frac{1}{4}$  lb. 90c, 1 lb. \$2.75.

#### White Welsh

A very hardy perennial onion. Used only for early bunching or table onion. Grows a very tender stem. Seed may be shown in August and September in drills 14 inches apart, for spring onions. Pkt. 5c, oz. 30c,  $\frac{1}{4}$  lb. 90c, 1 lb. \$2.75.

#### Mammoth Silver King

A very beautiful onion of silvery white color, tender and mild in flavor. Very desirable for bunching, as a boiling onion, or for creaming. Grows large, is a good producer. Pkt. 5c, oz. 30c,  $\frac{1}{4}$  lb. 90c, 1 lb. \$2.75.

### YELLOW VARIETIES

#### Gould's Minnesota Yellow Globe

This variety of Yellow Globe onion, like our Minnesota Red Globe, is a most select strain of Yellow Globe onion. It is perfect in shape, and in color, also having all the best keeping qualities obtainable. Pkt. 5c, oz. 25c,  $\frac{1}{4}$  lb. 75c, 1 lb. \$2.50.

#### N. K. & Co's Prizetaker

Is without a doubt the largest onion that can be successfully grown in a Northern climate. It has a straw colored skin of a beautiful appearance, and is a great favorite for Hotel and Restaurant trade. Is very solid and an excellent keeper. Pkt. 5c, oz. 20c,  $\frac{1}{4}$  lb. 60c, 1 lb. \$2.00.

#### Southport Yellow Globe

A very popular strain of Yellow Globe onion. Matures early and is a good keeper. Skin is of rich brownish yellow, the flesh white, crisp and fine grained. Pkt. 5c, oz. 20c,  $\frac{1}{4}$  lb. 60c, 1 lb. \$2.00.

#### Yellow Globe Danvers

The bulbs are large and globular with very thin necks. The flesh is white and mild and the skin is orange yellow. Is an enormous yielder, a fine keeper, and excellent for shipping. Pkt. 5c, oz. 20c,  $\frac{1}{4}$  lb. 60c, 1 lb. \$2.00.

## ONION SETS

We make a specialty of onion sets for Spring planting. Our sets this year are exceptionally fine, having had very favorable weather for maturing and harvesting. Prices listed are for small quantities only. If in the market for bushel lots or more please write for prices. All transportation charges on onion sets are to be paid by the purchaser. See Red Figure List for prices on Onion sets in bushel lots.

#### White Bottom Sets

The favorite for the home as well as the market garden. They are small, solid and of a beautiful silvery white color. 1 lb. 25c, 5 lbs. \$1.15; 10 lbs. \$2.00.

White Bunching Onions

White Welsh Onions

#### White Portugal or Silver Skin

Of medium size, ripening early and uniformly. Has a delicate and mild flavor. Used largely for pickling and early bunching, also for white bottom sets. Pkt. 5c, oz. 25c,  $\frac{1}{4}$  lb. 75c, 1 lb. \$2.50.

Your seeds gave good satisfaction in every way.  
Julius Peters,  
Rochester, Minn.

Northrup,  
King & Co.'s  
Prize Taker  
Onion

#### Red Bottom Sets

Bright deep red in color, and uniform in size. Are northern grown, and a very popular variety. 1 lb. 20c, 5 lbs. \$5c, 10 lbs. \$1.50.

#### Yellow Bottom Sets

Are grown from select seed, producing sets that are fine and dry, and medium in size. 1 lb. 20c, 5 lbs. \$5c, 10 lbs. \$1.50.

Hollow Crown Parsnip

## PARSNIPS

**CULTURE.** Work the soil very deep and pulverize the seed bed thoroughly. Sow the seed in early Spring,  $\frac{1}{4}$  to 1 inch deep, in rows 18 inches apart.

As soon as the young plants appear, cultivate and hand weed them, and when 3 inches high thin to 4 inches apart in the row.

Cultivate sufficiently to keep the soil loose throughout the season. Freezing improves the quality of Parsnips for table use, so it is customary to take up in the Fall when the ground begins to freeze what will be needed for winter use, leaving the remainder to winter over in the ground, or better still, pitting them as is often done with other roots so that access may be had to them at any time.

One ounce of seed for 200 feet of row; 3 lbs. seed required for an acre.

### Hollow Crown

Better known and more generally grown than any other sort. The roots are smooth, large, tender and sweet and of the best quality. This variety is easily distinguished by the leaves arising from a cavity on the top or crown of the root. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.50.**

### Sweet Marrow

A very desirable variety for both home garden and market. Is fine grained and exceedingly sweet, with roots smooth and attractive in appearance. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.50.**

### Guernsey

A very good parsnip for the home garden. Being shorter than other varieties it is easier to dig up. Roots are very smooth, the flesh fine grained and excellent quality. A heavy producer. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.50.**

## PARSLEY

**CULTURE.** Sow in early Spring in drills 14 inches apart,  $\frac{1}{2}$  to 1 inch deep. Parsley requires from 20 to 30 days to show above the ground, therefore it is advisable to sow a few radish or lettuce seeds with the parsley seed as a guide for early cultivation.

### Dark Moss Curled

The leaves are of an extra dark green color. It is a heavy producer, and on account of the densely curled character of its leaves a quantity can be gathered in a short time. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.**

### Double Curled

Fine dwarf crimped leaves. Very similar to the Dark Moss Curled excepting that leaves are a little finer curled. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.**

### Hamburg or Turnip Rooted Parsley

The edible roots of this variety resemble a small thick parsnip in shape and color. They may be stored for the winter and used for flavoring soups, stew, etc. The flesh is white, a little dry, with the flavor of Celeriac. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.**

### Fern Leaved

This is one of the best in form and color, and very suitable for mixing with dwarf ornamental foliage plants in the garden. Also very fine for garnishing. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.**

### Plain

The leaves of this variety are flat, deeply cut, but not curled. Is very hardy, leaves being a very dark green, of excellent flavor for soups, etc. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, 1 lb. \$1.25.**

Dark Moss Curled Parsley

Turnip Rooted Parsley

## PEAS

### Hardy, Northern Stock

Our Peas are Northern Grown. They are produced at an altitude of 5,000 feet or more, making them the earliest, hardiest, and most productive Peas obtainable. In addition, the localities where they are raised are free from insects and other damaging pests. Much skill and knowledge is required to grow Seed Peas properly. Our Peas are carefully grown, kept true to type, are bright, handsome, sound and of strong germination.

#### CULTURE FOR GARDEN PEAS

Sow seed 2 inches deep in rich soil very early in the Spring and for a succession put in varieties that mature at different periods, or if dwarfs only are desired, sow a few rows every 10 days throughout the season. For hand cultivation sow in rows 15 inches apart, but if grown on a large scale it is best to sow in rows from 2 to 3 feet apart and cultivate them with a horse.

Tall growing Peas may be sown in double rows eight inches apart and stretch the wire support between the rows. Fasten securely at each end with posts using stakes between the posts.

One lb. of seed will plant 100 ft. of row; 75 to 100 lbs. of seed required to an acre.

### EXTRA EARLY ROUND SEEDED VARIETIES

These sorts are most largely grown by gardeners for the early market. They ripen more uniformly than any other Peas and where the stocks have been properly bred and kept rogued, from 75 to 80 per cent of the pods can be stripped from the vine at the first picking, enabling the grower to secure the highest prices. Round seeded varieties are not as sweet as the wrinkled sorts. Round seeded or smooth Peas weigh 60 lbs. per bushel.

#### Alaska

A very early smooth bluish green pea. Height 2½ feet. Pods are 2½ inches long, containing 6 smooth green peas. The vines are very productive, bearing four to seven pods and in large use of commercial canners, market and home gardeners. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

#### First and Best

A standard extra early smooth white seeded pea of very good quality. Vines are vigorous and hardy, grow to a height of 2½ to 3 feet with pods containing 5 to 7 peas of medium size. Matures well together and a single picking will often be all that is necessary to gather the crop. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

### EXTRA EARLY DWARF WRINKLED VARIETIES

These require no brushing and are in large demand for family use.

Most of these varieties are nearly or quite as early as the round seeded extra earlies, but they do not grow so uniformly. This, while making them less desirable for early market purposes, makes them better for family use as they will stand longer in fit condition for the table. They are much sweeter than the round seeded sorts. Wrinkled Peas are sold at 56 lbs. per bushel, complying with the Minnesota State Law.

#### American Wonder

This variety heads the list of Peas in flavor and quality. The vines bear a great abundance of good sized pods containing 5 to 8 large, exceedingly sweet, tender and well flavored Peas. This is the earliest of the dwarf, wrinkled varieties, being nearly as early as the smooth sorts. The seed is medium sized, wrinkled and pale green. These Peas are especially adapted to family use as they require no brush or other support. Grow to a height of about 10 inches. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

#### Little Gem

Height 15 to 18 inches. It is a few days later than the American Wonder, but slightly larger and will bear for a longer period than other varieties. The Peas are green, wrinkled, of sweet delicious flavor, and excellent quality. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

American Wonder Peas

#### Little Marvel

An extra fine dwarf pea of the early wrinkled variety, with vines growing to about 14 inches high. Pods are about 3 inches long of a dark green color. Peas are very sweet and tender. Especially suited for home gardens and early market gardening. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

#### Not's Excelsior

A standard extra early dwarf wrinkled pea. The foliage is stout and heavy, about 12 inches high with an abundance of pods containing 7 light green wrinkled peas each. The Peas are unsurpassed in sweetness and quality and are very desirable for both the home and market gardener. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

### LARGE EARLY WRINKLED VARIETIES

#### Carter's Daisy or Early Dwarf Telephone

This pea is always in great demand owing to its earliness combined with its large pods and excellent quality. It is very desirable for early market, always obtaining top prices. Vines are very vigorous reaching about 18 inches, with well filled pods measuring from 3 to 4 inches. Vines require no support, so it is an ideal variety for use where brush or stakes are not available. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

#### Gradus

(Prosperity.) The earliest wrinkled variety. This large podded, prolific variety has won the hearts of market gardeners everywhere. The vines are very vigorous and robust, growing to a height of about 3 feet. It is not only an abundant producer, but bears continually throughout the season. It is exceedingly early for a wrinkled variety, being only a few days later than the earliest, small, smooth sorts. The pods are very large and are invariably well filled with from six to nine sweet, tender, wrinkled Peas of large size and delicious flavor. The Peas remain tender for some time after they are large enough to use. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

#### Stutton's Excelsior.

Produces an abundance of light green pods of medium size. Vines grow to a height of about 18 inches. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

## PEAS—Continued

### LARGE EARLY WRINKLED VARIETIES

#### Thomas Laxton

Large podded, extra early Pea. This fine early Pea was raised by crossing Gradus with the Alaska. In earliness the Thomas Laxton is only two or three days behind the Alaska, but the pods are very much larger, containing on the average seven or eight large, sweet, wrinkled Peas of the very richest flavor. The vines attain a height of from three to three and one-half feet. It is of harder constitution than the Gradus, and is earlier and of darker colored pod. In flavor this Pea is unsurpassed. A very popular variety for the market gardener. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

#### Laxtonian

A new first early Pea of unexcelled value. It is not only early but is of splendid quality and unusually productive. Although it is a dwarf sort, growing only to 18 inches in height, it excels in yield and equals in size of pod, the Gradus. The pods are deep bluish-green, pointed at the end, generally borne singly and measure 4 to 4½ inches in length. The peas number 7 to 10 to the pod, are large in size and of delicious flavor. The vines are vigorous in growth, deep green in color and require no support. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 35c, 5 lbs. \$1.50.

*I am so pleased over my crop of peas I want you to see them. I have not time to come in but will do so later. I got two pounds seed of the Potlatch variety and I can say they are the best I ever had. I am only an amateur gardener, but you can do lots better with good seed and I believe in telling the one I got them from so he can get his due credit for selling good seeds. I have picked over 15 bushels already and can pick more. I sold lots, canned all I want for winter. With the money I got for Peas I bought my fruit for winter's sauce. I wish I had sent them before, now the dry spell has made them small and also dry spots on, but the peas are as sweet and tender yet. Sorry pictures are not so good will try to get better ones later, as they are so nice and large. I am satisfied with your seeds. The Sweet Corn is wonderful. Mrs. Geo. A. Feltier, White Bear, Minn.*

Teddy Roosevelt

### MAIN CROP VARIETIES

#### Teddy Roosevelt

One of the best of the large dark podded Telephone types and one of the most productive and surest yielders. The vines grow to a height of 4 feet, producing in large numbers, large, well filled pods of a dark green color, each pod containing from 8 to 9 large wrinkled peas of splendid quality. This grand Pea resembles the Telephone in color of pod and foliage, and in habit of growth; but the pods are larger and contain more Peas. A bushel of pods will shell out nearly twice as many Peas as the Telephone. Nothing in the long line of Peas excels the Teddy Roosevelt in richness, sweetness and flavor, and it ought not take a gardener long to figure out that a bushel of pods that will give as many Peas as two bushels of other varieties is the kind to grow. The demand is so great every year for Teddy Roosevelt Peas that our stock is usually exhausted early in the season. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 35c, 5 lbs. \$1.50.

#### Potlatch or Dwarf Defiance

A splendid large podded variety. Height of vines 24 inches, with strong, heavy dark green foliage and pods borne in pairs. The pods are about 5 inches long and very broad, containing 8 to 10 large light green wrinkled peas of high quality. It is wonderfully productive and matures early. A very satisfactory variety to grow. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

#### Telephone

Another leading Pea with market gardeners. It comes into bearing fairly early, yields abundant crops of large, fine appearing pods and Peas that are sweet and luscious. This variety meets with the ready approval of buyers, when placed on sale and is therefore a popular sort with Pea growers. It is a great cropper, continues long in bearing, and fills the basket quickly. The vines grow about 3½ to 4 feet in height, are very vigorous and strong and have large, coarse, light colored leaves. Each vine bears on an average seven to ten pods, which are ready for picking in about 65 days. The immense pods are straight, and of fine appearance, and contain eight to nine large, wrinkled Peas, closely packed, tender, sweet and of exquisite flavor. The seed we offer has been carefully selected and is very prolific and is sure to please all who grow this popular variety. Mam. Pkt. 10c, ¼ lb. 15c, 1 lb. 35c, 5 lbs. \$1.50.

Potlatch Peas

## PEAS—Continued

### Champion of England

An extra large pea, vines growing to a height of 4 and 5 feet. The pods are vigorous and very productive, bearing an abundance of large well filled pods. Peas are light green, wrinkled, of fine quality and delicious flavor. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

### Alderman

This is a very large podded Pea, very robust and vigorous, producing pods of the largest size. The pods are even larger and longer than the average large podded sorts, and are well filled with large Peas of most excellent flavor. In habit, the vines are strong and branching, bearing rich, deep-green, straight, handsome pods averaging  $4\frac{1}{2}$  to 5 inches in length, pointed at the end. This variety belongs to the tall growing main crop of Peas. The vines are from  $3\frac{1}{2}$  to 4 feet in height. A point of superiority which must not be overlooked is the unusual flavor and quality of the Peas. As is true of most wrinkled varieties they are delicious, but the Alderman is of a quality surpassing many of the others. Also a good sort for shipping. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 35c, 5 lbs. \$1.50.

### Everbearing

Reaches a height of  $2\frac{1}{2}$  to 3 feet. As name indicates this variety continues long in bearing and is very prolific. The peas are very large green wrinkled and of excellent quality. Cook up very quickly, are tender and of superior flavor. One of the best for late summer and autumn use. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

### Duke of Albany

A fine strain of dark podded peas of the Telephone type. A few days earlier than the Telephone but vine is not so large and tall. The pods are however, larger than the Telephone and produce more abundantly. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 35c, 5 lbs. \$1.50.

### Stratagem

Vines reach a height of 20 to 24 inches. Pods are 4 to  $4\frac{1}{2}$  inches long, containing 8 to 9 medium green wrinkled peas of fine quality, rich and sweet in flavor. Mam. Pkt. 10c,  $\frac{1}{4}$  lb. 15c, 1 lb. 30c, 5 lbs. \$1.25.

*The garden seed you sold me was as good as any seed can be.*

*H. O. Soberg, Kensington, Minn.*

## PEPPERS

**CULTURE.** Seed should be planted in hot bed or green house about March 10th to 20th. When plants are 3 inches high they should be transplanted to 2 or 3 inches apart until weather and soil conditions permit for outdoor planting. Then plant in rows  $2\frac{1}{2}$  feet apart and 18 inches apart in row. Cultivate same as tomatoes.

### Crimson Giant or Ohio Crimson.

One of the earliest of the very large varieties. The flesh is mild, and very thick. The plants are very vigorous and heavy yielders. The color is deep green, turning to a deep crimson when matured. Pkt. 10c; oz. 60c;  $\frac{1}{4}$  lb. \$1.75; 1 lb. \$6.00.

### Ruby King.

A very popular sort of the bell peppers. It is very prolific, large and mild. Grow to a size of 4 to  $4\frac{1}{2}$  inches long, turning from a deep green to a bright red when ripe. One of the best for Mangoes or stuffed peppers. Pkt. 10c; oz. 50c;  $\frac{1}{4}$  lb. \$1.50; 1 lb. \$5.00.

### Large Bell or Bull Nose.

A large early bright red variety, very mild and a great favorite. Plants are vigorous, heavy producers of fruit that is thick and of excellent quality for use in salads, etc. Pkt. 10c; oz. 50c;  $\frac{1}{4}$  lb. \$1.50; 1 lb. \$5.00.

### Pimiento.

A very thick flesh, heart shaped, smooth, mild crimson variety, much used for salads. Also in demand by canners. Another vigorous variety that turns to a deep red when it matures. Pkt. 10c; oz. 50c;  $\frac{1}{4}$  lb. \$1.50; 1 lb. \$5.00.

### Chinese Giant.

The largest of the mild red varieties, very thick and blocky. In spite of its large size plants carry an enormous amount of fruit and mature early. Fruit can be sliced and eaten like tomatoes. Pkt. 10c; oz. 60c;  $\frac{1}{4}$  lb. \$1.75; 1 lb. \$6.00.

### Long Red Cayenne.

Fruit is small cone-shaped and very pungent. Used for pickling both green and ripe. Fruit grows deep green, to a bright red when matured. Pkt. 10c; oz. 50c;  $\frac{1}{4}$  lb. \$1.50; 1 lb. \$5.00.

### Neapolitan

The earliest and most productive of the large varieties. The fruit is oblong and has a light green color gradually changing to golden and finally to a bright red. Very mild and sweet. Pkt. 10c; oz. 60c;  $\frac{1}{4}$  lb. \$1.75; 1 lb. \$6.00.

Chinese Giant Pepper.

*I could not get better seeds any other place than seed I got from you. I had a very fine crop from the three pounds seed of White Carrots. I got 22 tons nine large Carrots, I had seeded about one acre.*

*John Ludvigsen, Sheldon, Wis.*

# SEED POTATOES

Prices on seed potatoes will be listed on Red Figure price list.

In selecting our stock of seed potatoes we endeavor to secure the best that money can buy. Some varieties are grown for us in the Red River Valley, while others are obtained in Wisconsin and Northern Minnesota.

We exercise the greatest care in sending out stock that is true to type, sound, and free from disease, but still we would advise treating with Formaldehyde before planting, as the soil may be previously infected.

**Directions for treating potatoes with Formaldehyde to prevent scab and several other equally destructive potato diseases:** Soak the tubers (before cutting) one and one-half hours in a solution made at the rate of one pound of Formaldehyde to thirty gallons of water or for small quantities, 1 ounce to  $8\frac{1}{2}$  quarts of water. Then cut and plant as usual.

Prices on  
Seed Potatoes  
Will be Found on  
Red Figure Price List.

Early Ohio Potato

## Early Triumph

This is the earliest potato grown in many states. The size is from medium to small and almost round. The skin is red but the flesh is white and firm. It is a good keeper and a favorite with many as it is about 7 to 10 days earlier than the Ohio.

## Early Ohio Red River Valley Stock

The Early Ohio potato is so well known that a description of it is unnecessary. Our stock is exceptionally fine being clean, bright and uniform in size. For early market it has no equal. It is a good keeper notwithstanding its earliness. This potato is in more demand than any other variety and can be depended on to give a uniformly good yield under almost all conditions and soils. Has a very smooth pinkish skin, shallow eyes and blunt ends.

## Irish Cobbler

Our stock of Irish Cobbler is grown in the Red River Valley where the potato scab is practically unknown. It is a very early round white potato somewhat flattened with rather deep eyes and medium to large in size.

The Irish Cobbler is a very vigorous grower and is not as liable to be diseased as other varieties. It is a heavy yielder and a good keeper.

## Carman, or Green Mountain

This type of Carman is one of the most popular varieties of late potatoes grown. It is a large, slightly oblong white potato of fine appearance. It has few and shallow eyes, with skin smooth and clean. It is a very heavy yielder and an excellent keeper and unsurpassed as a table variety. Will do far better on heavy soil than the Burbank.

See Red Figure  
List for Prices.

Irish Cobbler Potato

## Rural New Yorker

A very distinct and valuable main crop potato. The tubers attain a large size and are of round oval shape. The eyes are few, distinct and shallow. It is a very good keeper and much in demand for shipping. Cooks up pure white of very fine flavor. A vigorous grower and big cropper.

## Burbank

A standard late variety which continues in good demand and is more largely used than any other.

It is of a type which is not so well adapted to any kind of soil, producing abundant crops and growing to a very large size on rich light soil, while not doing so well on heavy soil as the Carman or the Rural New Yorker.

The flesh is white, very mealy and of fine quality. It is an exceptionally good keeper. The shape is oblong and the skin is smooth and clean. Especially adapted for baking.

We had excellent results with the seeds purchased from you last spring. In fact, can say that they are some of the best seeds that we have ever used. You may be sure that we have no hesitancy in recommending them to our friends.

Asp Bros., Rush City, Minn.

Carman  
Potato

# PUMPKINS

Connecticut Field Pumpkin

## Connecticut Field.

The standard field Pumpkin. It is largely grown for stock feeding, but is also generally used for pumpkin pie and canning. The outside is reddish orange in color, the inside flesh orange yellow. Is very solid, fine grained and slightly ribbed. Strong and vigorous grower. Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. 80c.

## Large Cheese or Kentucky Field.

Large, round, flattened, hardy and productive. About 2 feet in diameter. A fine keeper. Thick flesh of extra fine quality. A fine sort for family and market use. It is also grown quite extensively for stock feeding. Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 65c.

## Winter Luxury.

Round, medium in size with a golden yellow skin, closely netted. Exceptionally fine for pies and a good keeper. Flesh is thick, sweet, tender, and of fine flavor. Pkt. 5c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.50.

Extra Early Triumph Potato—See Page 26.

**CULTURE.** Pumpkins may be planted with corn by planting the pumpkin seed in every 4th or 5th row of corn one way by every 3rd or 4th row across, dropping 4 seeds in a hill. When raised alone, the hills should be 10 feet apart each way, dropping 6 or 7 seeds in a hill and cultivating both ways. Cultivate with a section of the harrow. Use Paris Green and Land Plaster or Corona Dry to control the striped squash bugs. One ounce of seed will make 15 hills, and about 2 pounds are needed for an acre.

## Early Sugar or Pie.

This pumpkin is small, round, slightly ribbed, skin and flesh deep orange. Flesh is very thick, sweet and of fine quality. One of the best for pies.

Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. 90c.

*R. L. Gould Seeds are the best garden seeds I have used. I have been sending to other states for seeds and my gardens have been a failure. I certainly had a beautiful garden from yours.*

*Mrs. Chas. Bentley,  
Borup, Minn.*

Early Sugar or Pie Pumpkin

## Gould's Mammoth Field.

The largest of all pumpkins, some having attained the weight of 225 pounds. Grown for stock feeding, although it is good for pies in spite of its immense size. Also a good keeper. Pkt. 5c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.50.

*The seeds received from you were O. K. and satisfactory in every way, and produced excellent results.*

*Geo. Dahl, Benson, Minn.*

*I am well pleased with the seeds I purchased from you last spring. The Primost Flax is a wonderful variety of flax yielding from 12 to 15 bushels more per acre than some ordinary flax I saw threshed. I can heartily recommend R. L. Gould & Co. for seeds of quality and quick service to their customers.*

*Curtis C. Wood, Rock Elm, Wis.*

*The seeds I purchased last spring from you were very satisfactory. Owing to the late fall weather I could still pick fine flowers after Nov. 1st, and my Honeysuckle vine had a splendid growth.*

*Mrs. W. A. Munro, Hudson, Wis.*

## RADISH

**CULTURE.** Radish should be grown on good rich sandy loam. Avoid seeding in soil where you have had any root crop that became infested with root maggot, if possible. As a preventative of maggots it is well to treat your soil with a good dressing of Mag-O-Tite, Tobacco Dust, or Carbola. By using these preparations at intervals of about ten days, you will be able to overcome the maggot nuisance.

Plant your radish one-half inch deep in rows 12 to 14 inches apart as soon as the soil is in condition to work nicely in the spring. When the plants are about one inch high, thin enough to avoid crowding. Cultivate often and allow plenty of moisture.

### EARLY ROUND RADISHES

#### Gould's Reliable Forcing

Is the earliest of the forcing type. It is of a beautiful bright scarlet, producing a very small top, making it very desirable for forcing. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.25.

#### Gould's Scarlet Turnip White Tip

A special strain of white tip radish, the best of its kind ever offered. It is very early and does equally well for forcing and for outdoor culture. The flavor can not be excelled, it being sweet, mild and crisp. The color is a bright scarlet with white tips, making a particularly fine appearance on the table. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.25.

#### Early Deep Scarlet or Non Plus Ultra

This is an early forcing variety with small tops. The roots are small, globe shape, very deep red. The flesh is white, crisp and tender. Roots usually grow up ready to pull in about 3 weeks. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.25.

#### Gould's Early Scarlet Globe

A selected forcing strain especially adapted to hotbed growing, but may be grown outdoors also with good results. The shape is a little longer than round and the color, which it holds long after pulling, is very brilliant and attractive. A standard for the market gardener. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.25.

#### Gould's Crimson Giant

A round radish of exceptionally fine quality. The roots are nearly globe shaped, of a beautiful crimson carmine color. It is a very desirable variety for general outdoor planting and is also suitable for forcing. Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 30c; 1 lb. 90c.

#### Early Scarlet Turnip

Round, red, turnip shaped radish. Grows quickly. Of rich scarlet red color, flesh white, crisp and tender. Very popular for early out door planting. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.25.

*In regard to the seed I got from you last spring will say that they grew just fine. I never had as good a garden as I had last summer. Am also well pleased with your poultry supplies.*

Mrs. O. N. Rinnan,  
Chamberlain, S. D.

#### Early White Turnip

A medium sized round variety grown very largely for summer use. Has a small top and pure white skin. The flesh is waxy, mild and crisp. Matures in about 30 days, and is also a good variety for forcing. Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 30c; 1 lb. \$1.00.

#### Rosy Gem

An old well known popular variety, used both for forcing and outdoor growing. It is round, bright scarlet, and has a handsome white tip. Matures in about 25 days. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.25.

#### Sparkler

Another old time favorite with the market gardeners. The roots, even when fully developed, are solid, crisp and sweet. The color is a rich carmine with a pure white tip. The tops are small, but large enough for bunching. Equally well adapted for forcing in frames or growing in the open ground. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.25.

#### Yellow Ball

A fine summer variety of quick growth. The root is a perfect globe shape with a golden yellow skin, while the flesh is pure white, very firm, mild and crisp. A good producer even in the hottest kind of weather. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.15.

#### Early Scarlet Olive

An excellent variety, maturing in about 25 days. Color, bright scarlet, flesh crisp and tender. A very good main crop sort. Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 45c; 1 lb. \$1.25.

Gould's Early Scarlet  
Globe Radish

### LONG VARIETIES

#### Long White Summer or White Strasburg

A large medium long sort with heavy tapering shoulders. Flesh and skin pure white. Firm and crisp. A fine summer variety that resists drought. Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 25c; 1 lb. 80c.

#### White Icicle

Matures long and slender radishes of pure white skin and flesh. It is crisp and tender both when young and until it attains a large size, making it a desirable sort for the home gardens. Makes a very attractive appearance on sale or on the table. Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 25c; 1 lb. 80c.

#### Glass or Cincinnati Market

Very early with small tops. Grows slender and smooth and the flesh is tender and delicious. The color is bright red. Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 25c; 1 lb. 75c.

Gould's Scarlet  
Turnip White Tip  
Radish

# RADISHES—Continued

## LONG VARIETIES

### Chartier

The largest and best of the long summer radish. It is very quick growing and remains firm and crisp for a long time. The color is a vivid crimson at the top gradually fading to a white tip. Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 90c.

### French Breakfast

A great favorite for open ground or forcing. Beautiful bright scarlet, with pure white tip. Oblong in shape, of medium size, and a rapid grower. It is a fine table variety on account of its excellent quality and attractive appearance. Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. \$1.00.

### Long Scarlet Short Top

A standard and popular well known long red radish of good quality. Matures to a size of about 6 inches but it can be used before fully grown. Used extensively by both market and home gardeners. Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 90c.

## WINTER RADISHES

The merits of winter Radishes are little appreciated, probably because they are seldom grown and few people have knowledge of their worth. These grow to large size and keep well for winter and spring use. Sow seed in the middle of June. Include some of these in your order.

### China Rose

Of a bright rose color, flesh solid and crisp. The shape is long, but stump rooted, tapering abruptly to a small top. One of the best winter varieties. Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. \$1.00.

French Breakfast Radish

### Long Black Spanish

One of the largest, latest, as well as the hardest of all radishes. The shape is oblong tapering to a point, the skin almost black, flesh white and very firm. Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. \$1.00.

### Round Black Spanish

A large round turnip shaped root, growing to as much as 3 to 4 inches in diameter. The skin is black, but the flesh is white and an excellent keeper. Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. \$1.00.

## RHUBARB

**CULTURE.** Sow the seed in a cold frame in the Spring and as soon as the plants are large enough transplant into rows 1 foot apart each way and cultivate. The following Spring plant out in rows 5 feet apart each way and each Spring work into the soil a liberal supply of decomposed stable manure. Rhubarb roots are set out and cultivated as the above and this method gives edible Rhubarb in a very short time. One oz. of seed will sow 75 ft. of row.

### Rhubarb Seed.

The growing of Rhubarb from seed is a rather slow process, as it will require at least three years for the plants to develop enough to give results. Pkt. 5c; oz. 25c; ¼ lb. 75c; 1 lb. \$2.25.

### Rhubarb Roots.

The planting of Rhubarb roots saves both time and labor, especially for the home garden. Two to six good sized roots will supply the average home with all the Rhubarb they can use after the first year. Do not pull the stocks the first year after planting, except the blossom stock. These should always be kept down, as they take the strength from the rest of the plant. Price on roots, 15c each; per dozen \$1.50. Express or postage extra.

RHUBARB

## RUTABAGA

### N. K. & Co's. Prize Winner

A purple top yellow fleshed variety of good size and exceedingly uniform in appearance. Valuable for table use as well as for stock feeding. Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 75c.

### American Purple Top

A hardy productive variety with a small neck; roots are large globe shaped with a very small tap root. The color is a bright yellow with a purple top, flesh solid, tender and sweet. Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 75c.

### Hurst's Monarch

Distinct in type, being of the tankard shape. Skin is a purplish red above ground and yellow below; flesh solid and fine. Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 75c.

### Large White

An excellent keeper. Desirable for table and stock. Roots are large, white, globe shaped, and have a small neck. Flesh is white, firm, and sweet. Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 75c.

## SALSIFY

Culture of Salsify is the same as Parsnips. One ounce of seed will sow 60 feet of row. 5 pounds of seed required for an acre.

### Sandwich Island.

Grows to a large size, is of fine quality and flavor. The roots when cooked are very palatable and nutritious, with a flavor similar to oysters. A very desirable Winter vegetable. Pkt. 5c; oz. 20c; ¼ lb. 60c; 1 lb. \$2.00.

### Long White French

A well known standard variety. The roots are long, white and smooth. Pkt. 5c; oz. 20c; ¼ lb. 60c; 1 lb. \$2.00.

Gould's Improved Hubbard Squash

## SPINACH

**CULTURE.** Sow just as soon as the ground will permit working in Spring. Sow in rows 12 inches apart and one inch deep. If given some protection over winter, Spinach may be sown in the Fall for early Spring use, by covering plants up on the approach of cold weather with 3 inches of straw. In the Spring, when dry, remove the litter and the plants will be ready for use in a short time.

### Bloodsdales or Savoy Leaved.

This is the quickest and earliest growing Spinach. The leaves are narrow, pointed and crinkled and very hardy. Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 50c.

### Round Thick Leaf.

A favorite with Market Gardeners. Has large thick wrinkled leaves, in large clusters. Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 45c.

### Long Standing.

The leaves are smooth and very dark green. Grows quickly and remains tender a long time. One of the best for the market and Home garden. Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 45c.

### Long Season.

An excellent sort, having very dark green tender crumpled leaves. One of the very best for early Spring and successive planting. Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 45c.

### Eskimo or Giant Thick Leaf.

A fine large quick growing, thick leaved variety. Keeps up well before going to seed. A desirable medium early variety for the Home garden as well as for the Market Gardener. Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 45c.

### New Zealand

This is a very distinct variety of spinach, and although it is not generally grown for market it gives splendid returns. The one great advantage that it has over any other variety is that it endures the extreme heat and drought and does well on poor soil; always yielding an abundance of green leaves that may be picked from the main stalks at different times, allowing the stems to remain and produce more leaves.

Should have a place in every home garden, to furnish a supply of summer vegetable greens. Spinach contains a heavy percentage of iron, and is one of the most healthful vegetables grown. Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. \$1.00.

## SQUASH

**CULTURE.** Plant in fertile soil when all danger of frost is past. For vineing varieties plant in hills 8 to 10 feet apart each way.

The early summer or bush varieties may be planted 5 feet apart. Place 8 to 10 seeds in a hill one inch deep. When plants are three inches high, thin to 3 or 4 in a hill. Dust with Corona Dry to protect from beetles. Cultivate often to retain moisture and keep free from weeds.

### SUMMER VARIETIES

#### White Bush Scallop.

Matures early and will bear quickly. The Squash are large size, somewhat flattened, pure white, with thick flesh of good quality. Pkt. 5c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.25.

#### Vegetable Marrow or

#### Long White Bush.

Long and slender, skin and flesh white of delicious flavor. The earliest of summer Squashes. Vines are vigorous and very productive. Pkt. 5c; oz. 20c; ¼ lb. 60c; 1 lb. \$2.00.

#### Cocozelle or

#### Italian Vegetable Marrow.

The fruit is long and slender, of a dark green color at first, but when maturing it changes to a lighter green with yellowish stripes. In best condition to use when 6 to 8 inches long. May be sliced and fried in oil or baked. Pkt. 5c; oz. 20c; ¼ lb. 60c; 1 lb. \$2.00.

#### Golden Summer Crookneck.

Early and prolific. The fruits are of true crookneck type, heavily warted and of light golden color. Very popular for summer use. Pkt. 5c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.50.

*All the seed I planted germinated and I had a 100% catch. I certainly am more than pleased with same, and can also say that I had a better yield than some of my neighbors who paid more for their seed than I did. Thanking you for your courtesies shown me, I am.*

Wm. Arndt,  
Rudd, Iowa.

### WINTER VARIETIES

#### Gould's Improved Hubbard.

This Squash is the favorite for long keeping. The skin is rather smooth, of a light green color. When well matured and dried, it becomes very hard and will keep well into the winter. The vines are of a strong running growth and bear large pear shaped fruit that commands a higher price than any grown from other seed. Flesh is bright orange yellow, fine grained, dry and sweet flavored. Pkt. 5c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.50.

*I had very satisfactory results. Raised 43 Hubbard Squash average weight 14 pounds from a 10 cent package of seed. 4 bushels Table Beets Detroit Blood from a package and my garden Peas were wonderful.*

Geo. W. Rash,  
Kingsdale, Minn

#### Chicago Warted Hubbard.

Very similar to Gould's Hubbard, but skin is darker and covered with heavy warts. Also a good keeper. Pkt. 5c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.50.

#### Mammoth Chili.

An extra large variety used mostly for stock feeding. Very beautiful in appearance often weighing 75 pounds each. The yield will run from 8 to 10 tons per acre, producing a very cheap and nutritious feed. Pkt. 5c; oz. 20c; ¼ lb. 60c; 1 lb. \$1.75.

#### Delicious.

A medium size Fall and winter squash of exceptional flavor. The shell is green, while the flesh is a rich orange. A very desirable Squash for Market or Home Gardeners. Pkt. 5c; oz. 20c; ¼ lb. 60c; 1 lb. \$2.00.

#### Table Queen.

A small late fall variety very desirable for serving in halves. Very prolific and a good keeper. Pkt. 5c; oz. 25c; ¼ lb. 75c; 1 lb. \$2.50.

# TURNIPS

**CULTURE:** Turnips are the easiest to grow of any root crop. Sow in early spring for summer crop, and late in July or early August for late fall crop. One ounce will sow 200 feet in drill; thin to 4 inches apart.

## Early White Model

Is very early and perfectly formed. It is round, white, has short top and a single tap root. It is solid and sweet, very desirable for home garden. Pkt. 5c, oz. 10c, ¼ lb. 25c, 1 lb. 75c.

## Cow Horn

Pure white shaded with green at the top. Carrot shaped, grows nearly half out of the ground, slightly crooked. A very heavy yielder and for that reason it is very often raised for stock feeding. Pkt. 5c, oz. 10c, ¼ lb. 25c, 1 lb. 75c.

## Early White Flat Dutch

A very early white flat turnip of medium size and fine quality. Pkt. 5c, oz. 10c, ¼ lb. 25c, 1 lb. 65c.

## Extra Early Purple Top Milan

Extremely early and of splendid quality. Bulbs of medium size, flat and white, with a bright purple top. Pkt. 5c, oz. 10c, ¼ lb. 30c, 1 lb. \$1.00.

Purple Top Strap-Leaved Turnip

N. K. & Co.  
Prize Winner  
Rutabaga

See page 29

*I take great pleasure in writing you regarding the garden seeds I bought from your house last spring also the nursery stock you furnished me. Everything grew fine. I could not ask for anything better, and do not hesitate to recommend your seeds to all my friends. Wishing you the best of success.*

C. A. Kucher, Troy, S. D.

## Extra Early White Milan

Similar to the Purple Top Milan, except that the roots are a solid clear white. Pkt. 5c, oz. 10c, ¼ lb. 30c, 1 lb. \$1.00.

## Golden Ball or Orange Jelly

The best of the yellow fleshed turnips. The tops are small, roots medium size, round, smooth and deep yellow. The flesh is firm, crisp, and of fine quality. Pkt. 5c, oz. 10c, ¼ lb. 25c, 1 lb. 75c.

## Purple Top Strap-Leaved

Rather flat and of medium size. Color; purple above ground and white below, flesh white, fine grained and tender. Pkt. 5c, oz. 10c, ¼ lb. 25c, 1 lb. 65c.

## Purple Top White Globe

The most popular sort. A general favorite with all, and more largely grown than any other turnip; will do well to sow either broadcast or in drills and will form good sized bulbs in seven or eight weeks. Of a perfect globe shape with smooth white skin; flesh pure white, firm, sweet, and crisp. Pkt. 5c, oz. 10c, ¼ lb. 25c, 1 lb. 75c.

## White Egg

An early oval or egg shaped variety. Roots are of medium size, smooth and clear white of the very best quality. Pkt. 5c, oz. 10c, ¼ lb. 25c, 1 lb. 75c.

## White Globe

Perfectly globe shaped, skin white and smooth. Flesh is white and of very good quality. Pkt. 5c, oz. 10c, ¼ lb. 25c, 1 lb. 75c.

## Amber Globe Green Top

A large round variety with solid yellow flesh. Fine for stock feeding and is also excellent for table use, being very sweet. Pkt. 5c, oz. 10c, ¼ lb. 25c, 1 lb. 75c.

## Purple Top Yellow Aberdeen

A late medium sized, long keeping variety. Roots are round, yellow, with a purple top. Flesh is tender and sweet. Pkt. 5c; oz. 10c, ¼ lb. 25c, 1 lb. 75c.

# HERBS

Most of the varieties of Herbs thrive best on sandy soil, while some are stronger and better flavored when grown on soil that is rather poor. In all cases the soil should be carefully prepared and well cultivated as the young plants are for the most part delicate and easily choked out by weeds.

**Anise.** Used for cordials, garnishings, and flavorings. Pkt. 5c, oz. 15c.

**Balm.** Leaves used for making Balm Tea. Pkt. 10c, oz. 40c.

**Basil, Sweet.** Used for flavoring soups and sauces. Pkt. 10c, oz. 40c.

**Borage.** Leaves used in salads; flowers fine for bees. Pkt. 5c, oz. 25c.

**Caraway.** Seed used for flavoring. Pkt. 5c, oz. 10c, ¼ lb. 25c, 1 lb. 90c.

**Catnip or Catmint.** Used for seasoning. Pkt. 10c, oz. \$1.00.

**Coriander.** Seed used for beverages. Pkt. 5c, oz. 10c.

**Dill.** Used to flavor cucumber pickles. Pkt. 5c, oz. 10c, ¼ lb. 25c, 1 lb. 75c.

**Fennel, Sweet.** Ornamental and also used for flavoring. Pkt. 5c, oz. 15c.

Sow as early as the ground can be made ready, taking pains that the soil is fine and pressed firmly over the seed. Or they may be planted as a second crop, the seeds sown in bed in April, and the plants set out in June.

**Horshound.** For seasoning and for cough syrup. Pkt. 10c, oz. 50c.

**Lavender.** Medical, also used as a perfume. Pkt. 15c, oz. 90c.

**Marjoram, Sweet.** Leaves used for seasoning. Pkt. 10c, oz. 40c, ¼ lb. \$1.00, 1 lb. \$3.00.

**Pennyroyal.** Agreeable odor and flavor. Pkt. 15c, oz. \$1.25.

**Rosemary.** For flavoring as well as for medical purposes. Pkt. 15c, oz. \$1.00.

**Sage.** For seasoning. Pkt. 15c, oz. 75c, ¼ lb. \$2.00, 1 lb. \$6.50.

**Summer Savory.** For flavoring soups. Pkt. 10c, oz. 25, ¼ lb. 60c, 1 lb. \$2.00.

**Thyme.** Used for a headache tea, also for flavoring. Pkt. 15c, oz. 60c, ¼ lb. \$1.75, 1 lb. \$6.00.

# TOMATO

**CULTURE.** Tomato seed should be planted in a box in the house or in hot beds or greenhouse about the 1st of March, then transplanted once or twice to develop the roots to a good size before setting out in the open. Do not set out until all danger of frost is passed, as tomatoes are easily damaged by frost.

## John Baer

Is considered the earliest and one of the best tomatoes grown. Fruit is smooth, uniform in size, nearly round, firm and of excellent quality. Will hold up well for shipping. It is a heavy bearer that will last all summer. A favorite with market gardeners, shippers and canners. **Pkt. 5c, oz. 35c, ¼ lb. \$1.00, 1 lb. \$3.50.**

## Earliana "Private Stock"

The result of ten years selection from the most perfect and earliest stock. Produces more uniform fruit of a smooth, perfect shape than any other early variety. **Pkt. 25c, ¼ oz. \$1.50, ½ oz. \$2.75, 1 oz. \$5.00.**

## Spark's Earliana

One of the very earliest sorts. Fruit of fair size, color bright scarlet. A prolific bearer, yielding fruit in clusters. **Pkt. 5c, oz. 35c, ¼ lb. \$1.00, 1 lb. \$3.50.**

## Chalk's Early Jewel

An exceptionally fine early variety, about one week later than the John Baer and Earliana. The fruit is uniformly smooth, round and solid, color is crimson. It is a good canner and a good shipper. **Pkt. 5c, oz. 35c, ¼ lb. \$1.00, 1 lb. \$3.50.**

## June Pink

The earliest of the pink fruited varieties. The fruit is borne in clusters and begins to ripen very early. The yield is heavy and continues until the vines are cut down by frost. **Pkt. 5c, oz. 50c, ¼ lb. \$1.50, 1 lb. \$5.00.**

## Livingston's Beauty

One of the smoothest skinned and best of the large sorts. The vines are large, vigorous and very productive. The fruit is large, uniform in size and very smooth. The flesh is pink; very solid and fine flavored. A fine variety for medium early or for main crop. **Pkt. 5c, oz. 35c, ¼ lb. \$1.00, 1 lb. \$3.50.**

*We purchased garden seeds from the R. L. Gould Co. of St. Paul, last spring and found them to be thoroughly reliable. We never had better results. Our garden was beyond our expectations, every seed grew and was of the best quality.* Mark Ellis, Chatfield, Minn.

Ponderosa Tomato

## Ponderosa

This is the largest fruited Tomato. It is solid with very small seed cells, of very fine quality for slicing. Some of the fruit is oblong in shape and somewhat ribbed. The color is purplish red. The vines are strong and if staked will grow to a height of 6 or 7 feet, very often bearing fruit that will weigh one pound or more. **Pkt. 5c, oz. 50c, ¼ lb. \$1.50, 1 lb. \$5.00.**

## RELIABLE SEED

*All R. L. Gould & Co. seed is carefully tested for purity and germination before it leaves our warehouse. The seeds of each sample are counted, weighed and sprouted with scientific thoroughness. By sowing seed of this kind that you know will grow, cultivation is made easier and results most satisfactory.*

John Bear Tomato

## Sterling

The best for a general crop. The fruit is large, smooth, and solid, and attractive in appearance. The vines are strong and very prolific, bearing until frost. A money maker for the market gardener and popular with the private grower. **Pkt. 5c, oz. 45c, ¼ lb. \$1.35, 1 lb. \$4.50.**

*Your seeds are fine: could not be better. I am well pleased with them.* E. Hubbard, Ashland, Wis.

## Dwarf Champion

Dwarf and compact in habit. Stands up well even when loaded with fruit, having a stiff bushy stem. May be planted close together making it desirable for small gardens. The fruit is of a purplish pink color, medium size, smooth, very attractive and fine flavored. Skin is tough and flesh solid, but has no hard core. **Pkt. 5c, oz. 45c, ¼ lb. \$1.35, 1 lb. \$4.50.**

## Livingston's Globe

A very vigorous productive medium early tomato. Fruit globe shaped, smooth, solid, fine flavored with very few seeds. Color purplish pink. **Pkt. 5c, oz. 45c, ¼ lb. \$1.35, 1 lb. \$4.50.**

## Stone

For many years the standard and favorite with market gardeners and canners. It is large and smooth and has a bright scarlet color. It is solid without a hard core, and has a fine flavor. A fine shipper. **Pkt. 5c, oz. 35c, ¼ lb. \$1.00, 1 lb. \$3.25.**

## Dwarf Stone or Tree Stone

The best of the dwarf varieties. Fruits large, smooth, round, very solid and of a deep scarlet color. Matures medium to late. **Pkt. 5c, oz. 40c, ¼ lb. \$1.15, 1 lb. \$3.75.**

# TOMATOES—Continued

## Gould's Early Standard

Gould's Early Standard Tomato is the result of many years of experimenting to obtain a meaty, heavy bearing tomato, that would produce early and continue to bear fruit until frost.

Being extensive buyers and shippers of tomatoes for more than twenty years, we found the need of a good Early tomato, when prices are high, and tomatoes in heavy demand.

When we discovered this tomato four years ago, it was far superior to any Early variety we had ever seen. Since then we have continued to propagate and select seed carefully, from the very first fruit to ripen, improving it by selecting only the most desirable fruit from strong and vigorous plants. We are greatly pleased to now be able to offer the seed for sale.

Although this tomato is not quite as early as the Earliana, it is so much better in every respect, that we feel confident to say, that anyone who gives it a trial will never plant any other. It ripens early enough to take the place of the Early crop, and continues to bear abundantly until frost; large solid fruit, of delicious flavor and color.

We believe that Gould's Early Standard Tomato will take the place of the Earliana, Bonnie Best, Chalks Jewel, and John Baer for earliness, and will surpass second early varieties such as the Beauty, for the midseason, on account of its being such a heavy bearing variety.

*I am well pleased with the garden seeds I bought from you last spring both as to quality and yield. The Gould's Early Standard Tomato and the Gould's Minnesota Yellow and Red Globe Onions are the best I ever harvested.*

*A. J. Anderson, Frederic, Wis.*

Gould's Early Standard—Actual Size

Those who have tried it out are enthusiastic and unanimous in saying that Gould's Early Standard Tomato, is the heaviest yielder of perfect fruit, and the most drought resisting of any tomato grown. This from expert gardeners who have grown tomatoes for as high as 30 years.

It has no equal for the home garden, or for market, being an excellent keeper, and shipper, fruit being firm, coloring beautifully, producing abundantly from early summer till frost. Flavor is unsurpassed. Unexcelled for canning.

No expense has been spared to make Gould's Early Standard the best tomato grown anywhere, seed having been selected from the early stock when the market was bringing from \$5 to \$10 per bushel for tomatoes. Order early to be sure of your supply. Pkt. 25c, ¼ oz. \$1.75, ½ oz. \$3.00, 1 oz. \$5.00.

## SMALL FRUITED TOMATOES

### Golden Husk Tomato or Ground Cherry

These are greatly valued for preserves or for making pies. Fruit is very sweet and mild in flavor. Pkt. 5c, oz. 50c, ¼ lb. \$1.50.

### Yellow Plum

A small yellow fruited variety, finely flavored, resembling a plum in size and form. Used mostly for preserving. Pkt. 5c, oz. 50c, ¼ lb. \$1.50.

### Yellow Pear

Fruit is pear shaped, slightly larger than the Yellow Plum, of clear yellow color. Pkt. 5c, oz. 50c, ¼ lb. \$1.50.

### Yellow Cherry

Fruits are of a light lemon yellow, about ¼ inch in diameter. Bears fruit in clusters. Fine for pickles or preserving. Pkt. 5c, oz. 50c, ¼ lb. \$1.50.

### Red Cherry

Identical with the Yellow Cherry except in color or fruit, which is of a light scarlet. Pkt. 5c, oz. 50c, ¼ lb. \$1.50.

### Red Pear

Fruit pear-shaped, of bright scarlet color and rich flavor. Pkt. 5c, oz. 50c, ¼ lb. \$1.50.

Note its very meaty appearance

# FLOWER SEED DEPARTMENT

PAGES  
34 TO 42

## BEAUTIFUL AMERICAN ASTERS

**CULTURE.** Sow indoors in March, cover lightly, keep soil moist. When all danger of frost is past prepare your soil by spading deeply, adding lime to purify. The soil should be rich sandy loam. One Stim-U-Plant Tablet placed under each plant when

setting will stimulate the growth. Use Tobacco Dust in the soil around the roots to avoid root lice. Also spray the soil at intervals of two weeks with water containing one Stim-U-Plant Tablet and 4 tablespoons of Tobacco Dust to one gallon of water.

### Queen of the Market

The earliest good Asters. Blooming two to three weeks in advance of the later sorts. Plants are 15 to 18 inches high, bearing large double blossoms on long stems. Very desirable for cut flowers.

### Rochester Giant Comet Asters

This is a new class of Asters of which the plants are like those of the Late Branching, large and strong. The flowers like all the Comet type have petals that are very long, narrow and gracefully recurved, giving them a lightness and grace that makes them the most artistic of all Asters. The immense size of the flowers—they are the largest Asters now in cultivation—their artistic beauty, delicacy of coloring and freedom of bloom make them superior to almost all others. They bloom in mid-season.

ALL FLOWER SEEDS ARE SENT POSTPAID

## Abutilon or Flowering Maple

These grow rapidly and make fine large shrubs, bearing elegant bell-shaped flowers in great profusion. Pkt. 25c.

## Ageratum

One of the best bedding and border plants, blooming from early summer until frost.  
Blue ..... Pkt. 10c    White ..... Pkt. 10c  
Pink ..... Pkt. 10c    Mixed colors .... Pkt. 10c

## Alyssum, Sweet

A very pretty plant for borders, beds or rock work.

**White Common.** Pkt. 10c.  
**Little Gem.** Very dwarf and spreading, making one mass of white blossoms from spring until fall. Pkt. 10c.

**Saxatile.** Has handsome masses of bright yellow flowers. This variety is a hardy perennial, but blooms the first season. Pkt. 15c.

## Amaranthus

Brilliant foliaged annuals used as centers of large bed or for border of tall plants. Give plants plenty of room.

**Caudatus or Love Lies Bleeding.** Blood-red: Pkt. 10c.  
**Tricolor, Joseph's Coats.** Red, yellow, green. Pkt. 10c.

**Salicifolius, Fountain Plant.** Bronzy crimson. Pkt. 15c.

**Sunrise.** A beautiful plant with long, narrow leaves of glowing crimson. Pkt. 15c.

## Anchusa or Cape Forget-Me-Not

A rare annual, grows two feet high, blooming all summer. It resembles a large, beautiful Forget-Me-Not of deep blue color. Thrives well in shade. Pkt. 10c.

## Antirrhinum or Snapdragon

For early blooms, sow indoors in March and set out in the open after all danger of frost. Seed may be sown in the open also about May 1st, for late blooming. Giant strain in separate colors, or mixed. Pkt. 15c.

## Arctotis or Blue Eyed African Daisy

A handsome new annual, forming a branching bush 2 to 3 feet high. Its flowers are large and showy, being pure white on the upper surface, the reverse of the petals being a pale lilac blue. Blooms from early summer until frost. Sow in the open ground when danger from frost is past; cover seed very lightly, but pressing down firmly with board. Pkt. 10c.

## Bachelor's Button

This is among the most attractive of all hardy annuals and one of the most popular of all old fashioned flowers. The dark blue sort is very much in demand for cut flowers. Pkt. 10c. All colors mixed, pkt. 10c.

## Balsam or Lady Slipper

An old and favorite garden flower producing an abundance of brilliant colored double flowers in great profusion. It is easy of culture, does well in good rich soil by sowing out of doors when danger of frost is over. The soil should be well pulverized and the seed covered to a depth of about 4 times their size. Press down firmly with a board and when plants are three or four inches high they should be thinned to 15 inches apart. The plants that are taken out may be transplanted into other beds.

White ..... Pkt. 10c    Yellow ..... Pkt. 10c  
Pink ..... Pkt. 10c    Spotted and striped ..... Pkt. 10c

## Brachycome or Swan River Daisy

Free flowering dwarf-growing annual covered during the greater part of the summer with a profusion of pretty blue or white flowers suitable for edgings. Pkt. 10c.

## Beans, Scarlet Runner

The well known rapid growing annual climber, producing bright red flowers from July to September. The foliage being dense, makes it splendid for porches or wherever shade is desired. Pkt. 10c.

## Calliopsis or Coreopsis

Showy and beautiful free-flowering annuals, blooming all summer, excellent for cutting and massing.

Yellow ..... Pkt. 10c  
Crimson ..... Pkt. 10c

## Calendula, Pot Marigold

Free flowering plants of easy culture, succeeding everywhere and flowering continuously. The flowers are double, showy, of large size and pleasing colors. Pkt. 10c.

## Canary Bird Vine

A beautiful rapid annual climber. The charming little canary bird-like blossoms, bear a fancied resemblance to a bird with wings half expanded. Pkt. 10c.

## Candytuft

Universally known and cultivated. When sown in April will bloom from July until frost. Very hardy and easy to cultivate.

**Tom Thumb, Dwarf white.** Pkt. 10c  
White ..... Pkt. 10c  
Crimson ..... Pkt. 10c  
Purple ..... Pkt. 10c  
Lavender ..... Pkt. 10c  
All colors mixed ..... Pkt. 10c

## Centrosema or

## Butterfly Pea

A hardy vine of rare beauty. Flowering in July from seed sown in April. Flowers range in color from rosy violet to a reddish purple, with a broad feathery-white marking through the center; inverted, pea-shaped, borne in great profusion. Pkt. 15c.

## Cobaea Scandens, or Cathedral Bells

One of the handsomest and most rapid growing of the annual climbers. Climbs thirty feet in a season. The flowers are bell-shaped. Very prolific and perfectly hardy. The vine is always clean and free from insects.

White ..... Pkt. 15c  
Blue ..... Pkt. 15c  
Mixed ..... Pkt. 15c

## Celosia Cristata, or Cockscomb

Freely blooming annuals do better in light soil that is not too rich. Pkt. 10c.

## Celosia Plumosa or Feathered Cockscomb

These are extra fine in groups, similar to the Cristata in habit of growth. Blossoms are slender, of a feathery appearance. Pkt. 10c.

## Centaurea Imperialis, or Sweet Sultan

This is without a doubt the most beautiful of all Centaureas. The beautiful, sweet scented, daisy-shaped flowers are borne on long, strong stems, and when cut will stand for days in good condition. The plant itself is much stronger than any other Sweet Sultan. It is of easy culture and one of the best annuals for cut flowers.

White ..... Pkt. 10c    Lavender ..... Pkt. 10c  
Purple ..... Pkt. 10c    All colors mixed ..... Pkt. 10c

## Marguerite Carnation

This new class of carnation blooms in about five months after sowing. The flowers are of brilliant colors, ranging through many beautiful shades of red, pink, white and variegated. About one-half the blossoms are extremely double, while balance are partly double and single. Most beautiful for cut flowers and very fragrant. Seeds should be sown indoors in February and transplanted to the open when all danger of frost is past.

White .....	Pkt. 15c	Yellow .....	Pkt. 15c
Pink .....	Pkt. 15c	Scarlet .....	Pkt. 15c
Striped .....	Pkt. 15c	Crimson .....	Pkt. 15c
All colors mixed.	Pkt. ....		15c

## Chrysanthemum

Annual varieties. These are showy and effective garden varieties. Extensively grown for cut flowers. The foliage is ornamental and finely cut. The single varieties grow 12 to 18 inches high, and produce on long stems, large flowers resembling the daisy, but of many bright colorings in distinct bands or rings.

Single mixed ....	Pkt. 10c	Double White....	Pkt. 10c.
Double mixed....	Pkt. 10c	Double Yellow..	Pkt. 10c.

## Clarkia

Bright and attractive annuals of easy culture. The long graceful sprays are valuable for table decoration. They thrive in sun or shade, growing 2 to 2½ feet high, with masses of double flowers and buds which will all open in water when cut.

Crimson Scarlet...	Pkt. 10c.	Pink .....	Pkt. 10c.
Orange Scarlet...	Pkt. 10c.	Mixed colors....	Pkt. 10c.

## Coix Lachryma or Job's Tears

An ornamental grass with broad leaves and shiny, pearly-like beads. Plant early in the spring, four or five seeds in a hill, one-half inch deep, at a distance of 12 or 15 inches apart. Pkt. 10c.

## Coleus

The most largely used of all bedding plants. Especially adapted to design work owing to the many different shades of foliage. Pkt. 25c.

## Gould's Extra Early and Mammoth Flowering Cosmos

The Cosmos is one of the most attractive of the Autumn flowering annuals. Its graceful flowers borne on long stems, rising above the feathery foliage, are very desirable for cut flowers, lasting for a week or more in water. It is a very prolific bloomer and if the plants are given enough space to develop well, will branch freely, every shoot being covered with a mass of lovely flowers. Cosmos is very effective among shrubbery and especially desirable for inter-planting with early blooming perennials, as it fills in the gaps when the latter die down. Our extra early cosmos is the earliest of its kind, growing to a height of about 4 feet and if seeded in the open as soon as the soil is in condition, or transplanted from plants after all danger of frost, it will bloom from July until frost. The Mammoth variety should be started indoors and set out about the 15th of May, coming to a bloom about the middle of August. Either the early or Mammoth types may be had in three separate colors.

White .....	Pkt. 10c	Crimson .....	Pkt. 10c
Rose .....	Pkt. 10c	Three colors mixed	10c

## Cyclamen

Giant flowering type. One of the choicest of winter flowering plants. It has a beautiful foliage as well as rich colored and fragrant flowers. Seed may be sown either in spring or autumn, indoors. Sow the seed in shallow boxes or pans filled with compost of sandy loam, leaf mould, and coarse sand. The seed should be left on top of soil and covered with wet sphagnum moss to a depth of 2 inches. Water carefully and keep temperature between 50 and 60 degrees. When plants have made two leaves transplant into small pots. Pkt. 25c.

## Cypress Vine

One of the most popular annual climbers. It has a delicate fern-like foliage and produces a mass of beautiful star shaped flowers. Pkt. 10c.

## Dianthus or Pinks

One of the most popular and magnificent flowers in cultivation producing a great variety of brilliant colors in a profusion of bloom. The annual varieties may

Marguerite Carnations.

be sown in the open when danger from frost is past and will bloom from early summer until frost.

Double annuals, mixed colors .....	Pkt., 10c
Single annuals, mixed colors .....	Pkt., 10c
Hardy garden pinks, mixed colors .....	Pkt., 25c

The hardy garden pink will come up year after year without any attention.

## Dolichos or Hyacinth Bean

A rapid growing and free blooming annual climber. It is very ornamental and useful for covering trellises, arbors, and porches. Makes a very beautiful combination when interplanted with scarlet runner beans, giving a variety of color. Sow in the open after danger of frost or sow early indoors and transplant outside later.

White .....	Pkt. 10c	Purple violet....	Pkt 10c
Both colors mixed .....			Pkt., 10c

## Echinocystis or Wild Cucumber Vine

A well known vine, common in many sections, the quickest climber known for covering verandas, old trees, houses, trellises and arbors. It will withstand the heat and drought and retain its fresh green color until frost. It blooms profusely and is never infested with insects. It will resow itself, and therefore does best if sown in fall. Pkt. 10c.

## Eschscholtzia, or California Poppy

The California Poppy is a showy free-flowering plant so popular with every one, as to scarcely need introduction.

Yellow .....	Pkt. 10c	Crimson .....	Pkt. 10c
Pink .....	Pkt. 10c	All colors mixed ..	Pkt. 10c

## Euphorbia Variegata or Snow on the Mountain

A strong growing annual suitable as a border for beds of tall growing flowers. The bloom is not very showy but the foliage is very attractive and ornamental, being veined and striped with white and green. Pkt. 10c.

## Gaillardia, or Blanket Flower

Remarkable for the profusion, size, and brilliancy of its flowers, blooming from early summer until frost. Fine for cut flowers. Pkt. 10c.

## Gypsophila, Bridal Veil or Baby's Breath

Flowers a few weeks after sowing. Its graceful panicles of dainty blossoms and feathery foliage are unequalled for making up bouquets. Sow at intervals during the summer for continuous blooming.

White .....Pkt. 10c      Carmine .....Pkt. 10c  
Pink .....Pkt. 10c      All colors mixed. Pkt. 10c

## Helichrysum or Everlasting

Large double daisy-like blooms, produced in shades of yellow and scarlet. Frequently dried and used for winter bouquets. Flowers should be cut when on the point of expanding, and hung up by the stems until dry. Giant double mixed colors. Pkt. 10c.

## Heliotrope

Is a universal favorite on account of its delightful fragrance and long duration of bloom, flowering equally well as bedding plants in Summer or as pot plants in the house in Winter. It is not generally known that Heliotrope may be raised from seed as easily as the Verbena. The best varieties mixed. Pkt. 15c.

## Helianthus. Sunflower

Hardy annuals of sturdy growth, remarkable for the size and brilliancy of the flowers, which are very useful for cut flowers. Effective in forming background of large beds or borders and for distant effect.

**Chrysanthemum Flowered.** Perfectly double, grows 7 feet high. Pkt. 10c.

**Miniature Sunflower,** 4 feet high .....Pkt. 10c  
**Cut and Come Again,** 4 feet high .....Pkt. 10c

## Hollyhocks, Annual

A comparatively new class of Hollyhocks. Blooms the first year from seed, when sown in April or May. The soil should be very rich, deeply dug, and during dry weather watered liberally.

Double Mixed. Pkt. 25c.      Single Mixed. Pkt. 25c.

## Humulus Japonicus. Japanese Hop

One of the most rapid climbers grown. Seed may be sown in the open ground in Spring and the plants will grow to an enormous size in a very short time. The foliage is luxuriant and is one of the best plants for covering verandas and trellises. It is very hardy, and not affected by heat, drought, or insects. Pkt. 10c.

## Hunnemannia

**Giant Yellow Tulip Poppy or Bush Eschscholtzia** This is a beautiful herbaceous perennial, which flowers freely the first year, and bears a great abundance of brilliant yellow, tulip-shaped flowers. The best of the poppy family for cut flowers, remaining in condition for several days and producing an abundance of blossoms from July until frost. Pkt. 10c.

## Kochia. Summer Cypress or Mexican Fire Bush

An easily grown annual, which if sown thinly in Spring soon forms a cypress-like hedge of lively green and of perfect symmetry, about three feet high.

The color of the entire plant changes to a deep red in Autumn and if allowed to mature will reseed itself. Pkt. 10c.

## Larkspurs

This is one of the best known garden annuals that is very hardy. It produces long graceful spikes of different colors, very desirable as cut flowers. Mixed colors. Pkt. 10c.

## Linum. Crimson Flax

One of the most effective and showy bedding plants. Flowers are a brilliant scarlet. Pkt. 10c.

## Marigold

A well known garden favorite of quick growth and very free-flowering habit. Seed should be sown in shallow drills in the open garden early in spring after danger of frost is over. Plants for early blooming may be started in boxes indoors in March. When plants are about 1½ inches high they should be planted into small pots until the weather permits for outdoor planting.

**French Marigold.** These are a dwarf compact plant very attractive, each being covered with hundreds of small bright flowers of various colors. Pkt. 10c.

**African Marigold** plants grow 2½ feet high and produce an abundance of large double flowers in great profusion of glowing colors. Pkt. 10c.

## Marvel of Peru or Four O'Clocks

A well known, handsome, free-flowering garden favorite. Does well everywhere. Pkt. 10c.

## Matricaria Eximia or Feverfew

The plant is covered with numerous and freely branching flower stems, which are literally covered with very double pure white flowers, one inch in diameter. Pkt. 10c.

## Mignonette Reseda

A well known fragrant favorite; no garden is complete without a bed of Mignonette. Sowings made in April and again in July will keep up a succession of bloom from early summer until frost.

**CULTURE.** Sow out of doors when danger of frost is over in the bed or border where they are to flower. The soil should be well pulverized and the seed covered to a depth of about 4 times their size. Press down firmly with a board and thin out so that the plants will not become crowded.

**Sweet Scented.** The old fashioned variety with small spikes, but the most sweetly scented of all. Pkt. 10c.

**Mile's Hybrid Spiral.** Of strong branching habit with spikes from 8 to 10 inches long; very fragrant. Pkt. 15c.

**Improved Red Victoria.** Fine spiked of brilliant red. Pkt. 15c.

## Morning Glory, Tall Mixed

One of the most free flowering and rapid growing climbers, thriving in almost any situation. The flowers are very delicate, brilliant and beautiful. Pkt. 10c.

## Japanese Improved or Giant Mikado Morning Glory

The flowers are of gigantic size, and the colorings and markings beyond description, ranging from snow-white to black-purple, with all the possible intermediate shades. They are beyond question the largest and most beautiful of this handsome family of easy grown climbers and are the Orient's best gift to flower lovers. Wherever climbers can be grown, Giant Mikado should have a prominent place. Pkt. 10c.

## NASTURTIUMS

For ease of culture, duration of bloom, brilliancy of coloring and general excellence nothing excels Nasturtiums. All they need is a moderately good soil in a well-drained sunny position, and within a few weeks from the time they are sown, until hard frost comes, there is an endless profusion of their gorgeous blossoms. No annual will produce such a lavish amount of flowers for so long a time with the same small outlay of time and labor. The maximum of bloom is produced in light or sandy soil and seldom diminishes through the hot weather. It is best to pick the blossoms almost daily.

### Dwarf or Bedding Varieties

Pkts. 10c, oz. 20c,  $\frac{1}{4}$  lb. 60c.  
**Crystal Palace Gem.** Orange yellow, garnet blotches.  
**Crimson.** Velvety crimson.  
**Cloth of Gold.** Yellow foliage, scarlet flowers.  
**Empress of India.** Crimson, dark foliage.  
**Golden Queen.** Yellow foliage, golden flowers.  
**King Theodore.** Crimson, maroon, dark foliage.  
**Pearl.** Creamy white.

All dwarf varieties mixed colors.

**Reliable Dwarf Mixed Colors.** Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c.

### Lobb's Climbing Varieties

Pkt. 10c, oz. 20c,  $\frac{1}{4}$  lb. 60c.  
**Asa Gray.** Primrose yellow, almost white.  
**Atropurpureum.** Deep crimson.  
**Brilliant.** Deep scarlet.  
**Deep Blood-Red.**  
**Ivy-Leaved.** Ivy-leaved foliage, dark blood-red flowers.  
**Lilac.** Odd shade of brownish lilac.  
**Tall Rose Queen.** Creamy white with orange scarlet blotches.  
**King of the Blacks.** Deep velvety garnet, very rich.  
**Shirley.** Brilliant scarlet.  
**Lobb's Climbing.** Mixed colors.  
**Reliable Tall Mixed Colors.** Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c.

### Nigella Damascena or Love in the Mist

A compact free-flowering plant of finely cut foliage, with curious looking flowers and seed pods of easy culture, growing well in any garden soil. It is a hardy annual, about twelve inches high. Pkt. 10c.

### Nicotiana Affinis or Tuberose Flowered Tobacco

Delightfully sweet-scented, pure white tubular flowers, blooming continually from July to October. Pkt. 10c.

## PANSIES

**PANSY CULTURE.** The seed may be sown indoors in January or February; or in Spring in the open ground, in a shady, cool spot where the plant can be protected from the strong mid-day sun. Cover the seed very lightly with fine soil and press in with a board. The soil should be very rich, and liberal applications of bone meal should be given from time to time. The seed will be up in about 10 to 15 days.

Hot-beds will be found exceedingly useful for raising Pansies. In case the plants have not been wintered over, the seed may be sown in March, following the directions given above. In about five or six weeks from the time of sowing, the young plants should be transplanted in the beds so they will be two or three inches apart each way, and later they can be set out in the garden. These beds are also very convenient for wintering over the young plants that are started in the late summer.

### Gould's Reliable Pansy Mixture

Our strain of Reliable Pansy seed is a very carefully balanced mixture of the different shades and colors selected to please the greatest number of people. Flowers of large size, good form and substance of flower, and pleasing range of shades and colors, together with a strong growing plant, are the characteristics of this special strain. Pkt. 25c,  $\frac{1}{4}$  oz., \$2.00, 1 oz. \$6.00.

### N. K. & Co's Sterling Mixture

This mixture is unrivaled for diversity of color and marking. The seed is selected from over 100 named varieties, by some of the best growers of Pansy seeds in the country. Pkt. 25c,  $\frac{1}{4}$  oz. \$2.00, 1 oz. \$6.00.

### Gould's Fancy Bedding Pansy Mixture

A mixture of many standard sorts which are admirably adapted for beds or borders. They are very hardy and free-blooming. Pkt. 15c,  $\frac{1}{4}$  oz. \$1.00.

### Violas or Tufted Pansies

Violas are not yet fully appreciated; however, nobody needs to see them more than once to realize how much they add to a garden. Purple, white, violet, pale blue, or mixed colors. Pkt. 15c.

## PETUNIA

The Petunia is peerless among annuals for effective summer bedding or window boxes. It is of easy culture, early to blossom and continues all the summer until frost. No other flower produces a greater diversity of color, or retains its freshness for so long a period. The double varieties may be perpetuated by cuttings in late summer, or winter house plants. They require rich soil and a sunny location.

### Gould's Extra Large Flowering Petunia

This mixture embodies all of the latest varieties, and will prove an agreeable surprise even to those who expect much. All colors mixed. Pkt. 15c.

### Phlox Drummondii

Large flowering, the Phlox Drummondii is unquestionably one of the most brilliant and satisfactory of all the summer-flowering annuals. Seed may be sown in the open ground any time after danger of frost is past, and in a very few weeks they will be aglow with brilliant coloring and remain so until cut by frost.

White .....	Pkt. 15c	Royal Purple ....	Pkt. 15c
Pink .....	Pkt. 15c	Blood Red .....	Pkt. 15c
Crimson .....	Pkt. 15c	All Colors Mixed.	Pkt. 15c

### Star Phlox

Of dwarf habit with very pretty star-shaped flowers. Mixed colors. Pkt. 15c.

### Portulaca, or Moss Rose

Will grow and bloom abundantly all summer in a dry, hot location, where most other plants would soon die. The flowers are of the richest colors and make a beautiful border. Single mixed colors. Pkt. 10c. Double mixed colors. Pkt. 15c.

## POPPIES

In color and form, Shirley Poppies are the daintiest, most exquisite blossoms imaginable. Poised on long stems like graceful birds, they appear to be hovering but a moment before darting away. Their silken gamine petals vary in shade from scarlet and maroon to pale rose and white. The blossoming period lasts but a few weeks, which necessitates repeated sowings at intervals for constant bloom. Sow as early in the spring as possible, where the plants are to remain, as they will not bear transplanting. As cut flowers they are short lived, but if their stems are dipped in boiling water for just one moment when cutting they will last much longer.

**GOULD'S RELIABLE SHIRLEY POPPIES.** Mixed colors. Pkt. 10c.

**GOULD'S RELIABLE DOUBLE MIXTURE.**

The flowering period of Double Poppies is very much longer than that of the Single Shirleys and the plants need more space to develop to perfection. Double Poppies make splendid cut flowers. Mixed colors. Pkt. 10c.

Have used Gould's Reliable Seeds for two seasons and have had the very best results. Have never had a failure from any Gould seeds and had a garden full of lovely flowers.

Mrs. C. H. Engelbracht,  
 St. James, Minn.

### Pyrethrum Aureum

A very popular plant for edging. It has a beautiful yellow foliage. Pkt. 10c.

**Salpiglossis (Painted Tongue).**

## Ricinus. Castor Oil Bean

Ornamental plants of stately growth and picturesque foliage with brilliant colored blossoms, producing a tropical effect. Fine for massing in lawns or as a flower bed center.

They may be started indoors and transplanted to the open when danger of frost is past, or sown in beds or border where they are to remain. The soil should be well pulverized and the seed covered to a depth of about four times their size. Press down firmly with a board and thin out so that plants will not become crowded.

### BORBONIENSIS ARBOREUS.

Very large and beautiful. The foliage is light green attaining a height of 15 feet. Pkt. 10c.

### CAMBODGENSIS.

The main stem and leaf stocks are shining ebony, and the large palm-shaped leaves are of darkest bronze maroon. Height 6 to 8 feet. Pkt. 10c.

### GIBSONI.

Dwarf branching habit, deep red foliage; height 5 feet. Pkt. 10c.

### ZANZIBAREUSIS.

The ornamental leaves beautifully lobed, are  $2\frac{1}{2}$  to 4 feet across. Each plant makes a perfect pyramid of foliage thickly set from top to bottom. Pkt. 10c.

All varieties mixed. Pkt. 10c.

## Salpiglossis, Painted Tongue

A very beautiful hardy annual plant, flowering freely from July to early autumn. Rich soil should be provided with plenty of space for plants to develop.

**GRANDIFLORA.** Mixed. Pkt. 10c.

### EMPEROR.

A large type than the Grandiflora, having only one leading stem at the top of which it produces a large cluster of beautiful flowers. Pkt. 15c.

## Salvia, Scarlet Sage

A standard bedding plant that keeps the garden bright with color until late in autumn. It is especially adapted for a border in front of tall shrubs or in back of dwarf growing plants.

### SPLENDENS.

Blooms from August until killed by frosts. Pkt. 10c.

### CLARA BEDMAN OR BONFIRE.

The spikes grow erect and stand clear above the foliage. The plants form handsome globular bushes. Pkt. 15c.

### OSTRICH PLUME.

Flowers bright scarlet and instead of each stem having but one flower spike, they produce a large cluster of gorgeous plumes, each a bouquet in itself. Pkt. 25c.

## Scabiosa or Mourning Bride

Commonly known as the Pincushion Plant. The flower stems are long and the blossoms keep well in water. When given plenty of room and the blossoms are picked off regularly they will last all through the summer. It produces many delicate shades. All colors mixed. Pkt. 10c.

## Stocks or Gilliflower

This is one of the most popular annuals, either for bedding or pot culture. For brilliancy and diversity of color, fragrance, profusion and duration of bloom it is unsurpassed. Mixed colors. Pkt. 10c.

## Thunbergia. Black Eyed Susan

A beautiful, rapid-growing annual climber. Used extensively in hanging baskets, vases, etc. and to cover low fences. Pkt. 10c.

## Verbena

The Verbena is one of the most popular garden annuals. They bloom profusely the first year from seed, the flowers lasting until late in autumn. Mixed colors. Pkt. 10c.

**Zinnia**

## Zinnia

One of the most brilliant and showy of annuals which has long been a general favorite. For massing and for borders it is unequalled. Mixed colors. Pkt. 10c.

White .....Pkt. 15c      Orange .....Pkt. 15c  
Scarlet .....Pkt. 15c      Canary .....Pkt. 15c

Zinnias listed above are of the large, double flowering type.

# Sweet Peas

No garden is too small for a row of Sweet Peas and no estate, however extensive or magnificent, should fail to include many varieties of this most popular flower. Its long blooming season usually extends from early summer until autumn. No other climber equals it for cutting, either for use in bouquets or for table decoration.

**SWEET PEAS**

Sweet Peas should be sown in spring, just as soon as the frost is out of the ground. One of the most important things when sowing Sweet Peas is to see that you have good drainage. If your soil is heavy and has a clay subsoil, it is well to dig your trench deep enough so that you may be able to partly fill it with stones or old plaster or even sticks. Then fill to about 6 inches of surface with a rich sandy loam, placing your peas in a row about 3 inches apart, and cover about one inch, and firm well.

Just as soon as peas are two or three inches above the ground, start to cultivate and at the same time keep filling trench as peas grow up, until level with surface. When the plants are 5 or 6 inches high they should be thinned to 8 inches apart, and a support should be made for them to climb on. A wire netting if well anchored on each end makes an excellent support. The roots should not be allowed to become too dry.

Water applied thoroughly once or twice a week, preferably early in the morning or in the evening is usually better than light sprinkling more frequently. The vines should be watched carefully for the aphid or plant louse, and also the red spider. These, if they appear, should be sprayed with a solution of "Black Leaf 40," mixed as per directions. Corona dusting sulphur may be applied dry on the vines to prevent mildew.

The following named varieties represent the most popular shades of the large flowering Spencer Sweet Peas.

**THE PRESIDENT.** The most brilliant, rich dazzling orange scarlet sweet pea in existence, equal in color to the Oriental Poppy; a robust grower, producing in abundance, flowers of very large size, perfectly placed on stout stems, 12 to 15 inches long.

Pkt. 10c. 1 oz. 40c.  $\frac{1}{4}$  lb. \$1.50

The following varieties we offer at the uniform price of: Pkt. 10c. 1 oz. 35c.  $\frac{1}{4}$  lb. \$1.25, 1 lb. \$4.00.

**MRS. C. W. BREADMORE:** A beautiful buff ground edged with pink, large flowers on long stems.

**MRS. W. J. UNWIN:** The ground color is white, beautifully flaked with rich orange-scarlet. A good bloomer.

**SENATOR SPENCER:** A beautiful deep scarlet and chocolate striped, flaked on light heliotrope ground.

**WEDGEWOOD:** A very fine silvery blue and a leader in its class. Free-blooming and of strong growth.

**MRS. J. BALMER:** The ground color is a rich deep cream, the back of the standard is heavily suffused with bright scarlet-pink, wings edged with pink.

**SINCERITY:** A unique, pleasing shade of bright glowing cerise. A strong grower and free bloomer that throws plenty of four-flowered sprays.

**KING EDWARD SPENCER:** A deep rich crimson. A strong and beautiful color that does not fade or scorch.

**FIERY CROSS:** The standards are a bright fire-red with wings of a rich cherry and orange blend.

**BLANCH FERRY SPENCER:** The standards are of a light rose pink, the wings are white with a slight pinkish tint.

**EMPRESS EUGENIE:** A very exceptional creamy color suffused with lavender.

**ROSABELLE:** A very beautiful deep rose with white blotches at the base of the standards and wings.

**VERMILION BRILLIANT:** Standards and wings are of intense pure scarlet. The flowers are very large, generally blooming in fours on long, strong stems.

**GEORGE HERBERT:** Flowers are of a most magnificent rich rosy carmine. The blooms are large, well waved and always carried four on a stem.

**KING WHITE:** Remarkable for the purity and perfect finish of its flowers.

**DAINTY SPENCER:** A beautiful pink edged variety with pure white ground. The flowers are large and well filled.

**MARGARET MADISON:** A beautiful clear azure-blue flower with a tint of lavender.

## **GOULD'S RELIABLE SPENCER MIXTURE.**

A mixture of selected Spencer varieties. Pkt. 10c. oz. 25c.  $\frac{1}{4}$  lb. 75c. 1 lb. \$2.50.

## **LARGE FLOWERING FANCY MIXTURE.**

Pkt. 10c. oz. 20c.  $\frac{1}{4}$  lb. 50c. 1 lb. \$1.50.

## **NITRAGIN FOR SWEET PEAS.**

Sweet Peas belong to the legume family and cannot flourish unless they have plenty of bacteria on their roots. These bacteria are necessary to furnish the plants nitrogen, which is one of the important plant foods. Where Sweet Peas have been grown before there will probably be sufficient bacteria in the soil but in other places these may be lacking and Nitragin should be used to supply them.

Nitragin is easy to use. It will not replace fertilizers, but will help you raise more vigorous, healthier Sweet Peas. Price, garden size can, each 20c, post-paid 22c.

# HARDY PERENNIAL FLOWER SEEDS

**CULTURE.** Everyone likes perennials because they are permanent—once established they increase in size and beauty. Many sorts are raised from seed, usually blooming the year after sowing. The seed bed must be well drained, fine and firm. If the soil is at all heavy cover with one inch of sand. The seed may be planted from June 10th to early July. After soaking the seed 24 hours, sow the fine sorts in rows, 3 inches apart, on the surface of sand or well sifted soil, and press down with a board. Large seeds may be covered to twice their thickness. The bed must be kept shaded constantly with a screen made as follows: Nail common laths 2 inches apart on end strips. Place this screen over the bed on 4 bricks set endwise. Water as required; when seedlings have two pairs of leaves, transplant into rows a few inches apart each way, and later when they begin to crowd transplant a second time. This involves extra work but is necessary to raise sturdy plants. Keep them shaded with the screens all summer. In September, if well developed, they may be placed in their permanent locations where they are to blossom the following year, or left in the seed beds for early Spring transplanting. After the ground freezes hard, cover with evergreen or other branches and a few inches of straw or leaves loosely piled on top. In late March, remove one-half the top mulch and loosen up the rest, to admit air. Take off the remainder gradually, as the season advances.

## Achillea or Double White Yarrow

One of the best hardy white perennials. Grows about two feet high, from spring until frost. Is covered with head of purest white double flowers. Pkt. 15c.

## Anchusa, Italian Dropmore Variety

Blue, large, for-get-me-not-like flowers. Very fine for the back of the perennial border or for a screen. Grows 4 to 5 feet high, blooms in June and July. Pkt. 15c.

## Anthemis Tinctoria or Hardy Marguerite

Grows about 12 inches high, bearing in profusion, daisy shaped, yellow flowers, that blossom in July and August. Pkt. 15c.

## Aquilegia or Columbine

Charming hardy perennial plants growing from one three feet high, bearing in countless numbers through May and June their exquisite blossoms of clear blue, white, rose, lavender, yellow and purple. For planting in permanent borders along woods or shrubbery they are unsurpassed. All colors mixed. Pkt. 15c.

## Bellis or English Daisy

Daisies are easily raised from spring sown seed, and come into flower in a very short time. They thrive best in a cool, shady place, but do well in almost any soil. Admirably adapted for edgings, borders and low beds. Height 6 to 8 inches. Double mixed colors. Pkt. 15c.

## Campanula or Canterbury Bells

Cup and saucer variety. Produces beautiful single flowers three inches in length with saucers three to four inches in diameter.

The plants form pyramids of exquisite blossoms for weeks, during the early summer. A hardy biennial, flowering the second season from seed. Pkt. 15c.

## Coreopsis Lanceolata

A hardy perennial about two feet high that produces an abundance of large, daisy shaped flowers on long stems. One of the best perennials for cut flowers. Pkt. 15c.

## Daisy, Ox Eyed

Flowers like the wild white daisy, but twice as large. Very hardy and easily grown, has long stems, making it very desirable for cut flowers. Pkt. 15c.

## Daisy, Shasta

A hardy perennial bearing large pure white flowers, in great profusion on long stems, making it desirable for cut flowers. Pkt. 15c.

## Delphinium, Hardy Larkspur

Very decorative border plants ranging in height from two to four feet. The colors run from pure white to dark blue. When plants are 15 inches high, they should be staked to prevent breaking down. Mixed colors. Pkt. 15c.

## Digitalis, Foxglove

A very interesting family of old fashioned plants, whose culture is so simple as to bring them within the reach of all. It grows in strong clumps and is one of our very fine hardy perennials. Mixed colors. Pkt. 15c.

## Gaillardia, Blanket Flower

A very fine blooming perennial bearing large yellow, or red daisy shaped flowers. Very easy to grow and will bloom all summer. Pkt. 15c.

## Gypsophila Paniculata, Baby's Breath

The blossoms are small, star like, and borne in feathery sprays, which are highly esteemed for cut flowers, as they lend a most graceful effect when combined in bouquets.

This pleasing flower should be in every garden, for it is almost indispensable in the arrangement of flowers, either in vase or bouquet work. Pkt. 15c.

Shasta Daisy

## Helenium Autumnale

A showy native perennial growing 4 to 6 feet high. Has a spreading head of golden yellow daisy-like flowers, resembling the pompon chrysanthemum. Pkt. 15c.

## HOLLYHOCKS

There is a revival of the old-fashioned flowers and Hollyhocks are among the best of the old garden favorites. Always a stately and majestic plant, the improvements in them have been so great that one would scarcely recognize in the old single Hollyhock, the parents of the magnificent and truly gorgeous flower of today.

The most marked improvement is found in the Chater's strains. These are beautiful beyond description.

The Chater's produce for the most part, flowers which are densely double, although occasionally some single blossoms are seen among them. The colors are innumerable, ranging from pure white to darkest maroon, some are bright and gay, others of the softest and most delicate shades and tints. The stalks average about four feet in height but many are 6 and even 8 feet high. These stalks are densely covered with blossoms as beautiful in texture and appearance as the rose.

The Chater's are beautiful beyond description. Hollyhocks form a capital background for a border of hardy perennials of lower growth, and are also very effective when planted in groups. Once established, as they easily are from seed, they reappear in their place each year. Hollyhocks thrive best in a rich, deep, well drained soil. As usually treated, the hollyhock is a biennial, but if planted where the water will not settle around the crown in the winter they become very satisfactory perennials. Follow cultural directions under heading "Hardy Perennial Flower Seeds."

## Single Hollyhocks

Many prefer the single-flowering hollyhocks. They are usually of freer growth than the doubles and present a very handsome appearance. Mixed, pkt. 15c.

## Hollyhock. Chater's Double

Mixed colors ....	Pkt. 15c.	Yellow .....	Pkt. 15c.
White .....	Pkt. 15c.	Bright Red .....	Pkt. 15c.
Salmon Rose ....	Pkt. 15c.	Maroon .....	Pkt. 15c.
Bright Pink ....	Pkt. 15c.		

## Honesty. Satin Flower

Early flowering, hardy biennial with purple or white flowers and flat round seed-vessels of silvery appearance. Pkt. 15c.

## Lathrus. Everlasting or Hardy Sweet Pea

Showy, free flowering, hardy perennial climber, valuable for covering old stumps, fences, etc., continually in bloom. Good for cut flowers. They require a rich deep soil. Pkt. 15c.

## Linum Perenne

A pretty plant for the border, with light graceful foliage, bearing large flowers through the entire summer. Flowers are delicate light blue to pure white, about 15 inches in height. Mixed colors. Pkt. 15c.

## Lobelia

A great favorite as a border either for beds or window boxes. Pkt. 15c.

## Lupine

This will be found a great acquisition to any garden. It forms dense bushes about four feet high, of elegant spikes completely clothed to the ground with snowy white and deep sea blue flowers, that are very fragrant. Pkt. 15c.

## Lychnis. Rose Champion

Handsome plants of easy culture, growing in any rich garden soil. Mixed colors. Pkt. 15c.

## Lythrum. Roseum Superbum

A pretty, hardy perennial. Grows three feet high and produces spikes of rosy flowers from July to September. Pkt. 15c.

## Monarda Or Bee Balm

Fine hardy plants of free growth, about three feet high, with aromatic foliage. Produces bright rose and crimson-scarlet flowers during July and August. Mixed colors. Pkt. 15c.

## Myosotis. Forget-Me-Not

Half hardy Perennial, which flowers the first year from seed if sown early. Will bloom throughout the summer and fall if sown in a somewhat shaded location. Blue and white mixed. Pkt. 15c.

## Pentstemon. Beard Tongue

Attractive plants, much used in the hardy border. The bushes are pyramidal. 2 to 3 feet high, with erect branches thickly set with flowers  $1\frac{1}{2}$  inches long, varying in all shades from rosy-white to purple with white or veined throats. Mixed colors. Pkt. 15c.

## Physostegia

These handsome plants flower from July until frost, growing 3 to 4 feet high and bear broad, dense spikes of delicate pink tubular flowers not unlike a giant Heather. Pkt. 15c.

## Platycodon. Japanese Bell-Flower

A member of the Campanula family, with handsome, branching spikes 2 to 4 feet high. Platycodon is considered by many the best bell flower. They bear these large, showy, deep-blue flowers continuously from July until frost.

**Grandiflorum.** Tall, deep-blue. Pkt. 15c.  
**Marieti.** Dwarf, deep-blue. Pkt. 15c.

## Perennial Poppies

These hardy varieties are very beautiful, blooming from June to frost.

**Iceland Poppy.** Similar to the annual Shirley Poppy but in addition to the white, red and pink shades of the latter, the Iceland Poppy is often a fine yellow or orange color. Pkt. 15c.

**Oriental Poppy.** One of the most gorgeous of all perennials, producing in June and July its enormous blossoms, often 6 inches in diameter. The colors range from soft blush and rose to flaming scarlet and richest maroon. The flower stems are long and heavy, bending gracefully under the weight of the blossoms. The culture is simple if the directions at the top of page 41 are followed. The plants are at their best when about 3 years old. Often one specimen will show 10 or 15 blooms. All colors mixed. Pkt. 15c.

### New White Oriental Poppy.

A striking novelty, and the most distinct break that has yet been made in Oriental Poppies, it being a pure satiny white, with a bold crimson blotch at the base of each petal. It is unquestionably the most important addition to the list of new hardy perennial plants this season. Pkt. 25c.

## Pyrethrum Hybridum

Bears large daisy-like flowers ranging in color from white to deep red with bright yellow centers; fine for cutting. Blooms in early spring and again in the fall. Single varieties, all colors mixed. Pkt. 15c.

## Scabiosa Caucasica

Resembling in shape the annual Scabiosa. This hardy variety bears large blossoms of a delicate lilac blue shade. The plants grow about 2 feet high, blooming from July until frost. A fine plant for borders or cut flowers. Pkt. 15c.

## Sunflower. Helianthus

Seeds sown early will produce flowering plants the first year.

**Maximiliana.** Flowers single, clear yellow, with several rows of large ray petals and full center. Blossoms late in the autumn. Height, 6 feet. Pkt. 15c.

**Mutiflorus.** Dwarf double yellow like an aster; blooming in August. Pkt. 15c.

## Sweet William. Dianthus Barbatius

A beautiful, free-blooming, hardy perennial producing a splendid effect in beds and borders with rich and varied flowers.

Single Mixed .....Pkt. 15c.  
Double Mixed .....Pkt. 15c.

## Tritoma Red Hot Poker

Although these are hardy plants, many will flower the first year if seed is sown early. They grow about 3 feet high and bear in August blazing orange-red spikes, blooming until frost. Very effective for cut flowers. Pkt. 15c.

## Veronica Speedwell

**V. Spicata.** Height, 18 inches, flowers all summer; showy spikes of bright blue flowers. Fine for cutting. Pkt. 15c.

**V. Rosen.** Bright rose-colored flowers, produced on spikes 12 to 18 inches long. Pkt. 15c.

## Wallflower

Half hardy perennials bearing dainty, yellowish, red or orange flowers, which have a delicious odor.

These new, early-flowering varieties may be treated as annuals, and if sown indoors during February or March, the plants will bloom freely through the summer and autumn. Excellent for forcing. Height 2 feet.

Single Mixed. All colors. Pkt. 15c.  
Double Finest Mixed. Pkt. 15c.

Double Hollyhocks. See page 41.

## Beautiful Gladioli

### Most Popular Cut Flower of the Day

The Gladioli are the most attractive of summer-flowering bulbs. They bloom just when the garden needs brightening up. Their bright spikes help the perennial border especially, which so often lacks color at mid-summer before its autumn revival. When used in the rose bed their season follows that of June roses.

Gladioli are highly ornamental whether growing among shrubs or in garden rows. If they are cut as the first bud expands they last a week or ten days in the house and every bud opens perfectly.

They are not delicate exotics needing protection from Summer's hot winds and scorching sun, but strong and lusty growers. Yet with all their sturdiness, many Gladioli have flowers as delicate as Orchids, as exquisite as the humming birds which dart among their brilliant blossoms.

We advise our customers to plant Gladioli in masses since they are always most effective when grown in groups of twenty-five or fifty bulbs of a kind or color, either in the perennial or shrubby border.

**CULTURE:** The Gladiolus thrives in a sunny location, protected from wind. It appears to best advantage when planted among Peonies, shrubby or in masses, or rows bordered with some lower growing plants such as Candytuft or Bachelor's Buttons. These make a pleasing contrast with the Gladioli.

Gladiolus bulbs will grow in any good garden soil, but do much better when the latter has been enriched with well rotted manure. If the bulbs are planted at intervals from April to June the blooming period will extend from July until frost. A trench should be dug five inches deep and an inch of sand placed in the bottom to absorb surplus moisture. Then set the bulb (flat or hollow side down) in the sand.

For earliest blossoms, draw 2 inches of soil over the bulbs at first, replacing the rest when the shoots appear. As the fungus develops, more earth should be drawn up around the base, to furnish support for the stalk. Keep the bed free from weeds and give plenty of water, especially during the blooming period. When the flower buds appear they should be staked.

Before the ground freezes lift the bulbs, cut off half the foliage and remove to a cool shed or cellar. Here they should be spread out to dry, leaving plenty of air space between all bulbs and tops to prevent mould. A convenient method is to stand them up in flats which are then piled in tiers.

After the tops dry up they should be cut off with a sharp knife or pruning shears. At this time also, the bulbs may be separated and the small side growths, or bulblets removed. The latter may be handled like the big bulbs. Then the bulbs are placed in paper bags, sawdust or sand to prevent them from becoming too dry. Lastly, remove to a storage room having a temperature of about 35 degrees to prevent sprouting.

**FOR CUT FLOWER USE.** The spike should be cut as soon as the first flower opens on the stalk, preferably before the dew is off in the morning but never in the heat of the day. Cut the stem about 9 inches above the ground and with as little foliage as possible. The foliage is needed for the development of the new bulb. Place the cut flowers in a deep vase, with at least 8 inches of water. Remove the faded blossoms, cut a little off the stem and change the water daily. Treated in this way the buds will open perfectly.

Gladiolus

Gladioli will be sent about April 1st, weather permitting. Order early however.

# HARDY SHRUBS

*Hydrangea paniculata grandiflora*

**Spirea Van Houttei** which is commonly called Bridal Wreath, is the most popular of all hardy shrubs. Its mass of white blossoms appearing very early in spring have a very brightening effect upon a yard which perhaps only a few weeks before was covered with snow. It is perfectly hardy and may be planted as individuals or in hedge form.

The **Spirea Anthony Waterer** is also a very desirable variety. It is a dwarf growing shrub with beautiful pinkish crimson flowers that have a very good effect when planted in front of the tall growing shrubs, as shown by the illustration on this page.

The **Double Pink Flowering Almond** is one of the most attractive of the early blooming shrubs. It produces a mass of beautiful rose-like blossoms during the month of May or early part of June.

The **Flowering Plum** and the **Flowering Crab** are very similar to the Almond blooming at about the same season.

*Spirea Van Houttei* with the Dwarf Growing *Spirea Anthony Waterer* planted in front, creates a very beautiful effect.

*Hydrangea arborescens* or **Snowball Hydrangea**

In the following assortment of Hardy Shrubs which we offer for Spring planting, we have selected those varieties which are the hardiest and most successfully grown for a general decorative and useful effect both for the city homeowner and the suburbanite. Prices will be given on our complete list of shrubs, berry bushes, roses, etc., on our special spring supplement issued about March 20th.

The **Hydrangea paniculata grandiflora** is one of the most beautiful shrubs for individual planting. Produces large cone shaped blossoms of pure white in its early stage, gradually changing to a pretty shade of pink and finally developing into a coppery red.

**Hydrangea arborescens**, or **Snowball Hydrangea** as its name implies produces a mass of snow-white blossoms, early in the summer and remains in bloom almost all summer, causing it to be very often called the **Everblooming Hydrangea**. The shoots generally dying back to the roots during the winter should be cut close to the ground in spring to permit the new growth to develop from the roots.

**Lilacs** and **Honeysuckle** need no description excepting that we carry some of the very best European varieties of Lilac. These are far superior to the common Lilac.

**Bush Honeysuckle**. A handsome upright shrub with showy flowers in white and pink, followed with bright red berries that are very attractive to all kinds of birds.

**Lilacs**, even though very common are still very popular and much in demand. They make a beautiful hedge or screen around a poultry yard. The following varieties are especially desirable: **Charles X**, redish purple, **Marie Legraye**, large white flowers, **President Grevy** and **Ludwig Spaeth**, purple.

# ROSES AND CLIMBERS

**Crimson Rambler Roses**

**Crimson Rambler.** Though perhaps the oldest variety of climbing roses it is still a great favorite and it deserves to be, for one or two Crimson Ramblers in full bloom is a delightful sight that is admired by all.

**Dorothy Perkins** is a fit companion to the Crimson Rambler. It is perfectly hardy and produces an abundance of beautiful delicate pink flowers in large clusters.

## CLIMBERS.

**Ampelopsis Englemanni** or **Engleman's Woodbine.** A very rapid growing vine with tendrils that will cling to any building, and growing 25 to 30 feet in a season.

**Dutchman's Pipe.** Very desirable for shade or screen purposes. The leaves are exceptionally large and attractive. Flowers resemble old fashioned Dutch Pipes.

**The Matrimony Vine.** A very attractive vine for low trellises, walls, stumps and fences. The blossoms are not very conspicuous but it has a great quantity of brilliant berries in autumn, along gracefully curved branches. Berries are not edible.

**Clematis Jackmannii.** This Clematis with its strong, healthy growth, is the most satisfactory of all Clematis varieties. The flowers are large, often measuring four to five inches across and are borne in great numbers during the months of July and August. The color is a rich velvety purple. The vines are of a slender wiry growth and require some support so that they can twine around, such as a pole, trellis, or wire netting.

They will do best if not exposed too much to the extreme heat of the sun. A moist and partly shaded spot is the most favorable. They should have some protection during the winter.

**Wistaria.** A strong rapid-growing vine with light green foliage of an evergreen appearance. The flower is pea shaped of a lilac purple shade, borne in long pendulous clusters.

Of all hardy plants none are so well liked, none so deserving of attention as the rose. There are Roses to suit every fancy. The Rugosa for hedges and borders. The Climbing Roses for porches and pergolas and the Hybrid Tea and Perpetual Roses for beds or gardens. Roses should be planted as early as possible in the spring, but the soil should be well prepared before hand, by spading to a depth of 12 or 15 inches; cover with two or three inches of well-rotted stable manure, or raw bone and sheep manure at the rate of  $\frac{1}{2}$  lb. to one square foot, mixing well with soil. Set roots down 5 or 6 inches spread out well and press soil firmly around them. Pruning the old wood considerably at time of planting is advisable.

In Roses we offer the most popular varieties of Climbers, Hybrid Tea and Hybrid Perpetuals. The following are a few of the varieties that we have to offer for early spring delivery: American Beauty, Magna Charta, Paul Neyron, Mrs. John Laing, Ophelia, Milady, Crimson Rambler, Excelsa, Dorothy Perkins, etc.

## CLIMBING ROSES.

The demand for Climbing Roses has always been constant and the rose covered cottage or pergola carries charms of romance mingled with the fragrance of roses that can never be forgotten.

The Climbing American Beauty Rose is a climber of strong and vigorous growth, generally growing canes of 10 to 15 feet in length in a single season. It produces an abundance of beautiful rosy crimson flowers in June, and occasionally during the season new buds and blossoms will appear that are very fragrant.

**Ampelopsis Englemanni** or **Woodbine**

Beta and the Alpha Grapes are used very extensively to plant along arbors and pergolas, where they soon produce a beautiful covering with their green leaves besides yielding abundant crops of very fine grapes.

In fruit trees, we offer some of the best varieties of apples and plums; also currants, gooseberry, and raspberry bushes and strawberry plants.

Prices will be given on\* the above Roses and Climbers in our special spring supplement issued about March 20th, along with many other varieties.

## PEONIES—For Spring Planting.

Hardy as the Oak—Once Planted, Peonies Increase in Size and Beauty with Age.

The Peony is a native of Siberia which undoubtedly accounts for its great vigor and hardiness. The ideal flower for the great Northwest since it endures the most intense cold without injury. During recent years it has been so vastly improved that now large acreages are devoted to growing cut flowers for market, but so beautiful and highly prized are the blossoms.

PEONIES.

## Dahlias

Dahlias are so well and favorably known as to require no description. No garden is complete without some of these handsome favorites. The Dahlia is a wonderful flower and rivals in popularity any other flower in existence. We offer strong, field grown roots which under favorable conditions will thrive and flourish.

**LOCATION.** The Dahlia is not as particular as most other flowers, and will succeed under a great many adverse conditions. There are, however, certain locations where Dahlias seem to outdo themselves. An open, sunny location seems to favor them at all times. Dahlias do well on high and low land, on hillsides or perfectly level land, giving good results in each location.

**TIME OF PLANTING.** The time for planting Dahlias varies according to the locality; whether your spot is sheltered or open, early or lateness of the season, and the times when the general crop of flower is desired. Dahlias can be planted any time after danger of frost is over, and under ordinary conditions will blossom in from 6 to 8 weeks after they have been planted. It is always best to wait until the ground becomes thoroughly warmed.

Cannas are deserving of a considerable amount of attention as a beautifier of home grounds and public parks.

The Cannas thrive under almost any conditions and if given a little care and attention, will produce an abundance of attractive foliage as well as large spikes of beautiful flowers of unusually bright colors.

Cannas make the best showing when planted in beds by themselves. The soil should be well fertilized and worked up thoroughly to a depth of 10 to 12 inches. The bulbs can be set about 12 inches apart and about 4 to 6 inches deep. Mulching with lawn cuttings will help retain the moisture.

Conditions of the soil, location and cultivation are important factors in growing Peonies. Peonies may be planted in the Spring during the month of April and the early part of May, or in September. Work the soil thoroughly to a depth of 8 or 10 inches, applying at the same time a generous amount of well rotted barn yard manure or commercial fertilizer, mixed well into the soil. Plant root in this prepared soil so that the crown will be about 2 inches below the surface. Press the soil firmly around the roots with the fingers so that all parts of the root will come in direct contact with the soil.

Peonies should not be planted any closer than 3 feet apart and should not be close to trees as the roots of the trees will soon take from the soil all the nourishing elements that are needed by the Peonies.

Some of the most desirable varieties that are sold at popular prices are: Festiva Maxima, Eugenie Verdier, Felix Crousse, Florence Nightingale, Mrs. Carew, Rachel, Karl Rosenfeld, Lora Dexheimer and Marie Crousse.

Prices on these and many other varieties of Peonies will be quoted on our special spring price list. It is advisable to have Peony roots forwarded by express, as a rule.

**StimUplant**  
Makes a  
Wonder Garden

**PLANTING.** Plant bulb 6 inches deep, flat down, having sprout or eye facing upward; cover with soil an inch or so, applying dressing, and cover in level.

**CULTIVATION.** Cultivation is the principal requirement of the Dahlia—the most important of all operations to insure success. Keep the soil well cultivated and free from weeds; never allow the soil to crust.

# FIELD SEEDS

Pages  
47 to 53

Owing to the uncertainty of prices at the time of printing this catalogue, no prices are quoted on Field Seeds in this book but will be given on Red Figure Spring Price Lists issued during the season.

## ALFALFA

Alfalfa is becoming so generally known and popular that it requires very little introduction, although it is impossible to say too much in its behalf.

It practically makes the soil that it grows in, not only storing nitrogen from the atmosphere, but with its long tap roots going down many feet into the subsoil it brings up the phosphates and potash and stores them near the surface, making them available as plant food for the succeeding crops.

### Gould's Reliable Grimm Alfalfa

Is undoubtedly the variety best adapted to our Northwestern climate. We know of Grimm Alfalfa fields that have been seeded ten and fifteen years ago that are still producing three good crops each year. Although the cost of the seed is generally much higher than that of ordinary alfalfa, we consider it the cheapest in the end. See our Red Figure price list for prices.

## CLOVER SEED

### Medium Red Clover

This is the recognized standard of the clover family. It produces two crops each year. The first is generally harvested for hay when in full bloom. The second crop may be harvested for seed, cut for hay, or plowed under for fertilizer. Refer to Red Figure List for prices.

### Alsike or Swedish Clover

One of the hardiest varieties known. It is perennial and does not winter kill. It will do better on moist land than any other variety of clover, and is suitable for either hay or pasture. When sown with other grasses, it forms a thick undergrowth and greatly increases the yield. It is frequently sown both with medium Red Clover and with Timothy, and the quality of hay thus produced is excellent. It is fine stemmed and leafy and quickly cured. It makes a very profit-

## LARGER CROPS in FIELD and GARDEN

19 YEARS AGO.

Alfalfa, clovers, soybeans, vetches, peas, beans, cowpeas, peanuts and other legumes should always be inoculated with Nitragin. The lack of necessary bacteria in the soil is often the cause of a poor legume crop—a weak start—or a total failure.

## A Great Price Reduction

NITRAGIN Costs Less

Nitragin now comes in Bushel sizes instead of acre sizes. This means that it costs you less per acre than inferior imitations. If you sow 12 pounds of seed to the acre it will only cost you 20 cents for your Nitragin. It means that

### Your Dollar Goes Further With NITRAGIN

Nitragin is an old, reliable inoculator. At the low price of 20 to 33 cents per acre you cannot afford to sow legumes without it. Nitragin is put up in the modern ventilated package; in a rich, soil-like packing medium. The contents are always fresh, living bacteria to feed your plants. Easy to use.

able seed crop in many sections of the Northwest. Sow 8 to 10 lbs. per acre. See Red Figure price list for prices.

## SWEET CLOVER

### White Blossom Sweet Clover

This variety is most generally referred to when sweet clover is mentioned. It lives for two years only, but will reseed itself if allowed to mature.

Sweet Clover will grow well on most any kind of soil, and will improve the soil for future crops. See Red Figure price list for prices.

### Yellow Blossom Sweet Clover

Is of the same family as the White Blossom Sweet Clover, but is not so prolific in growth. It is about ten days earlier. Refer to Red Figure list for prices.

### Mammoth Red Clover

This variety is grown mostly for pasture and for soiling. It is a very vigorous grower, but is not desirable for hay unless cut when quite young. Prices quoted on Red Figure price list.

### White or Dutch Clover

A low close growing clover, with round white heads. Very fragrant and desirable for beautifying the lawn. It will stand close cutting and very rapidly throws up an abundance of leaves and blossoms. It is usually better to sow with other grasses. Does well on most any soil. Prices given on Red Figure list.

## GRASSES

### Kentucky Blue Grass

Will outlive any other grasses for pasture or lawn, but should not be cut or pastured too closely in extremely hot, dry weather. The seed is very slow in germinating, therefore, it is advisable to plant with other varieties of quicker growing habits. Makes a sweet and nutritious pasture for all stock. See Red Figure list for prices.

### Italian Rye Grass

Is a very quick growing grass and for that reason makes an excellent pasture. It thrives on rich, moist land, where from three to four cuttings may be made in a season. Grows very quickly and will stand close pasturage. See Red Figure price list for prices.

### Red Top

As a hay crop Red Top is next to Timothy in importance. It will do the best on rather moist soil, but will thrive on most any soil. It is a good variety to sow with Timothy or Clover for meadow or pasture, and is more permanent than either of the other two. Prices quoted on Red Figure price list.

### Meadow Fescue

Especially suited for pasture and is also fine for hay. Succeeds even in poor soil and will endure severe freezing. The hay is very nutritious and cattle thrive on it whether it is dry or green. Prices quoted on Red Figure price list.

### Orchard Grass

Is an early fibrous rooted perennial. Its rapid growth makes it very desirable for pasture. Withstands droughts better than most grasses. Will thrive in the shade such as in orchards and lanes. When closely cropped it grows up quickly, and is ready for grazing again in 10 to 12 days. See Red Figure list for prices.

### Bromus Inermis

This is a grass that has no equal for hardness and drought resistance. It will grow in any kind of soil and in any kind of weather. Produces an abundant hay crop, and makes an excellent pasture. Bromus Grass thickens up rapidly by underground roots or stems. A thin stand thus improves quickly. It forms a dense sod six to eight inches thick, thus binding the soil together and preventing it from being wind blown. For prices see Red Figure price list.

## SUDAN GRASS

Sudan Grass belongs to the Sorghum family. It is an annual, lacking underground root stalks. Two cuttings can be obtained under favorable conditions, and may yield from 2 to 5 tons of cured hay per acre. It should be seeded about corn planting time. If for hay, sow about 25 to 30 pounds to the acre broadcast. Cut just before it comes to a head. If wanted for silage, sow about 10 pounds to the acre in rows and cultivate the same as corn, or it may be sown with fodder corn if preferred. Sudan, if cultivated, will grow to a height of 8 or 10 feet. See Red Figure price list for latest quotations.

## TIMOTHY

The principal thing to look at when about to sow Timothy, is the quality of the seed. Our reliable seed is tested, and is of superior quality. Ten pounds of good Timothy seed is sufficient for one acre making an inexpensive crop to seed. Prices given on Red Figure price list.

### Timothy and Alsike Mixed

For those who prefer to sow Alsike Clover and Timothy together, we have a mixture that has the right proportions for growing a splendid hay crop. See Red Figure list for prices

## GOULD'S ANNUAL PASTURE MIXTURE

Is a mixture of quick growing grains and forage plants, the majority of which will grow again as fast as they are fed down. Makes an elegant pasture for hogs, sheep or cattle. If planted about May 20th to June 1st, it will be in the best of condition when the hot dry weather reduces the other pastures. See Red Figure list for prices.

## SORGHUM

As a soiling crop, sorghum will always prove of great value, since at least two crops can be obtained from one sowing. Milch cows are exceptionally fond of sorghum. It is excellent for milk production and a given area furnishes a large quantity of succulent food. An acre of sorghum yielding 15 tons of green forage would feed 50 head of stock for 10 days. It should be fed sparingly at first, to avoid bloating. As a fodder crop it furnishes an enormous amount of feed. Sorghum outyields fodder corn, producing a richer, and more nutritious feed of greater value. Thus it will be seen that utilized as a pasture, as a soiling and fodder crop, it may be made to furnish feed nearly the whole year round.

Sorghum

### Minnesota Sorghum

This is the earliest and best for growing in Minnesota. It is of the best quality for syrup, and should be grown more extensively for that purpose. The cost of raising sorghum is small compared to the large returns. Latest prices quoted on Red Figure price list.

### Southern Amber Cane

Is very desirable if grown for fodder, but is not suitable for making syrup when grown in the North. It yields much heavier than the Minnesota Sorghum, but will not mature so quickly. It is fine for cutting in silos with other ensilage. Also makes a good pasture for hogs, sheep or cattle. All kinds of stock eat it readily. Prices given on Red Figure list.

## SUNFLOWER, MAMMOTH RUSSIAN

Are especially useful in the poultry run, as the large leaves furnish shade for young chicks, also the seeds make a good addition to the poultry ration. Prices given on Red Figure price list.

## FIELD CORN

Seed corn is without a doubt the most particular seed crop to be handled of any farm seeds. And it is very important that it receive the care and attention that it should have. The selection of good seed corn is

not a matter of picking a few large ears of corn, placing them in a corner of the barn or granary and leaving it there until seeding time. Then later stand the disappointment when only  $\frac{1}{4}$  of your corn grows.

We have men growing corn for us who make a specialty of growing corn for seed. They give it their attention from the time it is out of the ground until it is ready to go back in the ground to produce the next crop. Our selected seed corn will not disappoint you.

### DENT VARIETIES

#### Gould's Reliable Yellow Dent

Is considered to be the best and the safest corn to insure a good crop of well matured corn.

It is an improved strain of Minnesota No. 13, having been selected for several years before it was offered for sale, with the result that it is larger and earlier than the Minnesota 13. This year, owing to the severe dry weather, our stock will be very limited, and we advise anyone who wishes to try it, to order early. **Prices are given on Red Figure price list.**

#### Wisconsin No. 25

An extra early Yellow Dent corn resembling the Minn. No. 13. The stocks are about 8 to 12 inches shorter; the ears are produced nearer to the ground, and mature about 10 days earlier than Minn. No. 13. **See Red Figure list for prices.**

#### Minnesota No. 13

Is so well known that it is unnecessary to devote any space to its description. It is the standard Yellow Dent for Minnesota, produces a nice uniform ear of fairly good size, and maturing about Sept. 1st. **See Red Figure price list for prices.**

#### Minnesota Ideal

One of the largest yielders of the Yellow Dent type, that will mature in this locality. Although not as early as Minnesota 13, or Gould's Reliable, it will as a rule mature in good season. **Prices quoted on Red Figure price list.**

#### Early Murdock

Is a corn that has given very good results, in the last few years. It produces a large ear and large leafy stalk. A very desirable corn for cutting in silos, besides being a heavy yielder. **For prices see our Red Figure price list.**

#### Gould's Reliable White Dent

This is by actual test the earliest of all White Dent varieties. The stalks are very leafy and grow to a height of about 8 ft., each producing a large well shaped ear. **See our Red Figure list for prices.**

#### Northwestern or Smoky Dent

The earliest Dent corn for the Northwest. This corn is in a class by itself, having red kernels with a yellowish cap, being a cross between the red flint and a yellow dent. It has inherited the earliness of the flint, and the size of the dent corn. Even though there are some objections to the color, its earliness, productiveness and high feeding value, have made it very popular in many of our Northern States and Canada. **Refer to Red Figure price list for prices.**

#### Minnesota King

In appearance the Minnesota King is remarkably distinct, being a half Yellow Dent. The kernels are very broad and of an extremely rich golden color. The ear is of good size, eight rowed, with small cob. Average height of stalks is 7 feet. This corn will resist any weather extremes better than any other corn that we know of. **Prices given on Red Figure price list which will be mailed on request.**

#### Rustler's White Dent

This early White Dent corn is one of the best for early ripening in any of our Northern States. The ears are large, having from 14 to 18 rows of well shaped deep kernels. The average height of the stalks is 8 feet. **See Red Figure price list for latest quotations.**

#### Pride of the North

A Dependable Early Yellow Dent Corn. In some sections of the Northwest it equals other varieties in yield and quality. The stalks are well proportioned, being short jointed and leafy. Two or more well developed ears are frequently found on a single stalk. The kernels are very deep and closely set on the ear. Pride of the North shells more Corn in proportion to cob than most other varieties grown in the West. It is specially valuable to stockmen, to feed in the bundle thus saving the expense of husking. Average height of stalk 8 feet, average distance base of ear from ground, 3 feet. **Please Refer to Red Figure list for prices.**

Gould's Reliable Yellow Dent Corn

The seed I bought from you last spring grew better than any other seeds that we have tried. We surely recommend your seed to everybody.

Mrs. M. G. Madsen,  
Harwood, N. D.

## FIELD CORN—Continued

### FLINT VARIETIES

#### King Philip

Is an extra early red Flint corn that is extremely hardy. Ears average about 10 inches in length. One of the best and most reliable early sorts. Refer to Red Figure price list for prices.

#### North Dakota White Flint

The result of many years' selection of squaw corn. It is now much better than squaw corn, and matures in about 75 days. Stalks average 5 ft. in height with ears about 8 inches long. See Red Figure list for prices.

#### North Dakota Yellow Flint

Is identical with the White Flint in earliness and growth, differing only in color. Prices quoted on Red Figure list.

#### N. K. & Co.'s Triumph Flint

Was introduced in 1899 by Northrup King & Co. of Minneapolis, as the largest eared and most productive of all early Flint varieties. It matures in from 90 to 100 days from date of planting. The ears average about 11 inches, and are 12 to 16 rowed. The stalks are tall and leafy generally producing two ears to the stock. See Red Figure price list for prices.

#### Longfellow Flint or Canada Flint

Its a very early 8-rowed Yellow Flint. The stalks grow about 7 ft. high with ears about 11 inches long. This corn is adapted to the Northwest, and is a very heavy yielder. Prices are given on Red Figure price list.

*Your seeds were all good. Every seed grew and produced as good as could be expected on account of the dry weather.*  
Walter Jensen, Princeton, Minn.

## FODDER CORN

Many stock raisers are growing Early Dent Corn as it gives a large proportion of fairly well matured ears, producing a very nutritious feed.

#### Early Yellow Dent Fodder Corn

When sown thickly in drills, at the rate of one to one and a half bushels to the acre, this seed will give a surprising amount of rich feed, relished by all stock. It can be cut and run through an ensilage cutter for the silo just before maturity or it may be fed in the rack. See Red Figure price list for prices.

#### Early White Dent Fodder Corn

May be planted the same as the Yellow Dent Fodder Corn and matures at about the same time. While the early Dent Fodder Corn does not yield so heavy a tonnage an acre, the resulting crop in most cases is of greater feeding value. For prices see Red Figure Price list.

Longfellow Flint Corn

#### Gould's Reliable Red Cob Fodder

Is a tall growing southern corn that will produce an abundance of feed per acre. The kernel is white, and grows on a red cob, thus deriving its name. Prices given on Red Figure price list.

#### N. K. & Co.'s Elephant Fodder

Of the yellow dent type, but grows taller and more leafy than the average yellow dent corn, therefore producing a very heavy yield. See Red Figure price list for prices.

#### Gould's Southern Giant Fodder Corn

This is a very tall growing leafy variety of southern white corn. A very heavy yielder, often producing from 10 to 25 tons of green feed per acre.

We recommend sowing this corn very thick in order to prevent stocks from becoming too large and coarse. From one to two bushels per acre in drills may be sown with very good results. Refer to Red Figure list for price.

*We are very much satisfied with the Clover you sold us last spring. We recommend your seeds to all farmers who wish to have good grade of seed.*  
H. Herman Pfaffendorf, Stacy, Minn.

## POP CORN

### ITS PROFITABLE USES

It yields of shocked Corn of the very best feeding value at the rate of 8 to 10 tons an acre.

The small ears which mature early, are very valuable for pigs, calves and young stock generally, especially during the Fall and Winter months.

The yield of ear Corn to the acre is quite equal to any of the larger and later varieties, as it can be planted much more closely than the larger varieties of Corn.

Popcorn brings a very much higher price either shelled or on the ear than any other Corn and usually a ready market is easily found for any quantity, while in event of an inactive market, it can always be fed. A farmer cannot raise better feed.

Boys and girls can grow an acre or two of Popcorn and dispose of the product to their neighbors or to the merchant. There is usually a demand for this article and in this way considerable money can easily be earned. Why not plow up an acre or two and turn it over to the children. It will afford them pleasure and profit.

Plant at the rate of 4 to 6 quarts to the acre. We have a very choice lot of this Popcorn carefully chosen and tested for seed purposes.

*Can say that Gould's Reliable Seeds are all that their name implies. They surely did wonderful under the dry conditions. A satisfied customer.*

W. E. Singer, Bennett, Wis.

#### Black Beauty

A very early variety of a blue-black color. The kernels are large and smooth, popping to a very large size, and becoming very crisp and tender. Refer to Red Figure price list for prices.

#### White Rice

This is the most popular of the pop corn family. The kernels are white and pointed, popping to a pure snow white. See Red Figure list for prices.

#### Japanese Dwarf Rice

Very tender and almost hullless. Ears are short and chunky. Although the kernels are very small they pop to a large size, being very tender and brittle. Prices quoted on Red Figure price list.

#### Golden Nugget

Produces long slender ears of perfectly shaped golden colored kernels, which when popped, have that rich creamy tint. The most beautiful popcorn grown. Is a very heavy yielder, and matures early. See Red Figure list for prices.

## OATS

### Gould's Selected Swedish Oats

These oats we do not hesitate to place among the best for our Northern climate. It is a heavy yielder of large, plump, white kernels. The straw grows quite tall, and does well on medium or light soil. Its habit of growth is so vigorous that on heavy soil it is likely to lodge. Our seed this year will be of the usual high standard. See Red Figure list for prices.

### Sixty Day Oats

Is recognized as being the quickest maturing oats on the market. It is a good yielder and a sure cropper, being very often sown after other crops have failed. It is a small yellowish oat that weighs about 34 pounds to the bushel; the hull is very thin. It is so early that it may be harvested with barley, and is three weeks ahead of most other sorts. See Red Figure price list.

### N. K. & Co.'s Lincoln Oats

Is another oat that has given very splendid results. Owing to its strong stiff straw it very seldom lodges and may be raised with marked success in very rich soil. The hull is very thin and has a heavy meat. The color is a bright clean white. N. K. & Co.'s Lincoln Oats are grown in the Northwest and are well acclimated to the extreme weather conditions which exist here in spring and summer. Oats that will grow and thrive and produce big yields in the Northwest will do well anywhere and under nearly all conditions. Matures between the small early, and the late varieties. Refer to Red Figure list for prices.

### Silver Mine Oats

This variety is too well known to need an extended description. It is a heavy yielder, has a large, strong, white straw and a large grain with medium thin hulls. This variety is in big demand by those who supply manufacturers oats for making Rolled Oats. Prices are given on Red Figure price list.

*The oats we bought from you was very satisfactory. We were very much pleased with it. It yielded 50 bushels to an acre, on poor soil. Two neighbors have gotten seed from us already.*

Geo. Knott, Cologne, Minn.

*The Lincoln oats pleased me very well, as it was clean and yielded about 230 to 250 bushels from the 12 bushels of seed we had from you, and I am selling and keeping it most all for seed again.*

Otto Urbach, Waconia, Minn.

## WHEAT

### Marquis Wheat

**EARLINESS.** Marquis Wheat is from one week to ten days earlier than Red Fife and this fact alone should induce many of our customers to grow it this Spring. Farmers everywhere appreciate earliness and what it means to the wheat grower at a time when rust, smut, drought or hot winds may take his crop at any time. This week or ten days may save his entire crop from loss.

**PRODUCTIVENESS.** Marquis Wheat has out-yielded all other Spring Wheats grown under the same conditions of soil, cultivation and climate. The increased yield varies from 5 to 10 bushels per acre. Threshing reports from the three, big, hard Spring Wheat states this past season indicate the same favorable increase in yield of Marquis over other varieties, as has been the case every year since Marquis was introduced.

**APPEARANCE.** Marquis Wheat is similar in appearance to Red Fife, but the heads, as a rule, are heavier and the straw shorter, making it less likely to lodge. The kernel is flinty, a little darker in color than Red Fife, being dark red, and more plump than that variety. It is beardless, having smooth, yellow chaff. Under certain climatic conditions a small percentage of the heads sometimes show a reversion to the Hard Calcutta parent by bearing beards. Otherwise these heads are identical with the bald heads, maturing at the same time and containing the same size and shape of kernel. It weighs from 64 to 66 pounds to the measured bushel. For latest price, see Red Figure price list.

#### We Recommend FORMALDEHYDE

**FOR WHEAT.** Dip, sprinkle and shovel, so all of the grains become damp over the entire surface to kill the Smut Spores, which are on the outside of grain. Avoid using too much solution. Too much only softens and swells the grain and is of no use. Use three-fourths to one gallon of solution per bushel of wheat.

**FOR OATS, BARLEY AND MILLET.** In these grains, the smut spores are lodged inside the chaff scales, so the treatment must be thorough enough to allow the solution to soak between the scales. Shovel the grain over several times to insure the even distribution of the liquid. Use about one and one-half to two gallons of the solution per bushel. See page 64 for prices.

N. K. & Co.'s Lincoln Oats

Marquis Wheat

### Macaroni or Durum Wheat

Is recognized as being the wheat that will produce a crop even in the hot dry regions of the country, where other varieties would be almost a total failure. It is a bearded variety, and produces under ordinary conditions a large glossy, yellowish kernel of beautiful appearance. See Red Figure price list for latest quotations.

### Turkey Red Winter Wheat

A standard red, bearded wheat. Has very strong straw and is a heavy cropper. Without question the best type of bearded winter wheat. Prices given on Red Figure price list.

## BARLEY

### Gould's Improved White Hulless Barley

Is not a malting variety, but is recognized as the best for feeding. It is earlier than other varieties and produces more to the acre. The kernels are long and plump, having some resemblance to macaroni wheat. It is highly recommended by all who have tried it. We advise ordering early as we have never been able to obtain enough seed to supply the demand. Prices are given on Red Figure price list.

### Manshury Barley

Is early and very vigorous in growth. It has a strong, stiff straw which very seldom lodges. The heads are long and well filled with grain of fine quality and color. It yields abundantly. For prices see our Red Figure price list.

### Oderbrucker or Wisconsin No. 55 Barley

A stiff-strawed, heavy yielding, six-row bearded variety. Of very good quality. It matures at about the same time as Manshury, but produces a plumper and heavier kernel. Those desiring to obtain seed to replace run out varieties will do well to purchase at least one or more bags of Oderbrucker. See Red Figure list for prices.

Gould's Improved  
White Hulless  
Barley

## BUCKWHEAT

Buckwheat can be used to very good advantage in a great many different ways. Can be sown as late as July and still produce a crop, or it may also be plowed under for soiling. Sow  $\frac{1}{2}$  to 1 bushel per acre, as late as possible, and still have crop well developed before severe frosts occur. Light, well-drained soils are best for this crop.

### Silver Hull

Is a decided improvement on the old common varieties. It stays in bloom longer, therefore, is better for bees. The kernel is of a beautiful light gray color, with a thin hull. Is a very good yielder. Millers prefer Silver Hull, there being less waste and it makes whiter, better and more nutritious flour than other varieties. Silver Hull is more productive and the grain meets with a more ready sale, bringing higher prices than the Japanese. Under favorable conditions it will yield 40 to 50 bushels an acre. Latest market prices given on Red Figure price list.

### Japanese

Will produce a larger growth and will stand dry weather better than any other variety. The kernel is large, dark brown and matures very early. As much as 40 bushels to the acre have been harvested of this variety, making it very profitable to raise. Refer to Red Figure price list for prices.

## FLAX

Flax can be sown only about once in six or seven years on the same ground. It is a splendid crop to grow on new breaking, for it not only produces a good paying crop but it also helps to prepare the soil for future crops, leaving ground in a nice mellow condition. Before sowing, it is especially important to have the ground well firmed. Also be sure that there are no open spaces in the bottom of the furrows, as these are likely to cause the roots to rot. Sow 25 to 30 pounds to the acre, as early as possible and yet avoid the last killing spring frost. For prices see Red Figure price list.

### Primost or Minnesota No. 25 Flax

Is considered one of the best and surest croppers, and will resist wilt to a great extent. Supply of seed is very limited. Order early. Prices quoted on Red Figure price list.

### Common Flax

Is used to a great extent on entirely new soil with very good results. We take special care of securing seed that is entirely free from foul seeds. See Red Figure list for prices.

## RYE

### Spring Rye

Makes an excellent crop for sowing where winter grain has been killed off or for soiling. It can also be grown for a grain crop by being seeded early in the spring and harvested in the same season. Like wheat or oats. Does not grow quite so large a straw as winter rye, but usually yields well. Sow about  $1\frac{1}{2}$  bushels to the acre. Latest prices are given on Red Figure list.

### Rosen Rye

Has proven itself to be so far superior to any other winter rye, that we would consider it a waste of space to list any other variety. It is a heavy yielder with a nice large kernel. The straw is big and strong and will stand the weather better than any other variety. Refer to Red Figure list for prices.

## SPELTZ

Speltz is coming to the front in great strides as a standard crop. It thrives under most unfavorable conditions and produces an abundance of very nutritious feed. It is readily eaten by all kinds of stock and has shown itself to be especially adapted when fed to milch cows. It is better to mix it, however, with bran and shorts as it is a pretty heavy feed when fed alone. As a swine feed, we think very well of it, especially for brood sows. While not quite equal to oats, it makes a fair horse feed. It yields more than wheat or barley and even the straw if cut slightly green has a good amount of feeding value. To all those who have not tried Speltz, we would say try an acre or two. Next season you will plant ten or twenty acres. Prices are given on Red Figure price list.

## VETCH

### Sand or Winter Vetch

This is a very valuable forage plant and is rapidly becoming more popular each year, as the farmers and gardeners learn more of its great value. Not only does it produce an enormous amount of very valuable feed, but it at the same time restores to the soil a great amount of fertility which is so much needed. From 50 to 60 lbs. of seed is required to the acre. Prices quoted on Red Figure price list.

### Spring Vetch

Known also as Tares, English Winter Vetch, Oregon Winter Vetch or Common Vetch. Used for the same purpose as the Sand Vetch but must be planted in the spring where ever the winters are severe as this variety is not so hardy as Winter Vetch. It succeeds wherever Canada Field Peas thrive. If sown alone, use 60 lbs. of Vetch per acre and if with oats, 60 lbs. of Vetch and 40 lbs. of oats are usually seeded.

Spring Vetch thrives in a well-drained soil, doing best in loams or sandy loams though excellent crops are grown both on sandy and gravelly soils. On poor soils special care should be taken to provide thorough inoculation. Refer to Red Figure list for prices.

## MILLET

Millet is grown almost exclusively in these Northern states for hay only, and we find that southern grown millet seed will produce a much heavier crop of finer hay than that grown from northern seed. We therefore offer none but true southern grown seed in any of our millets.

### Golden Millet

This variety is the most in demand of all millets. It should be cut when in full bloom, at which time it is most tender and sweet. When fed to dairy cows, it produces a larger amount of milk. Grows to a height of four to five feet on rich soil. Sow about three-fourths of a bushel to the acre. See Red Figure list for prices.

### Hungarian Millet

Is favored by some on account of its rapid growth, maturing about a week or ten days earlier than Golden Millet. Makes excellent hay, growing from two to four feet high. Prices listed on Red Figure price list.

### Japanese Millet

This is entirely distinct from any other millet. It grows from five to nine feet in height, and produces enormous crops of fine hay. If sown broadcast, fifteen to twenty pounds may be sown to the acre. It will however produce better results if sown in drills at the rate of ten pounds per acre and cultivated while small. It does best on low, moist ground. Refer to Red Figure list for prices.

### Siberian Millet

Earlier than either Golden Millet or Hungarian. Very valuable for the North and yields remarkably. It is extremely hardy, withstanding drought wonderfully. The leaves are very tender, making it excellent for hay. The plant stools to a remarkable degree, as many as thirty to forty stalks have been grown from one seed, and is not subject to rust. For prices see Red Figure price list.

## SOY BEANS

**CULTURE.** For silage, the usual amount of corn is planted and Soy Beans added at the rate of 10 lbs. per acre. Seed may be mixed in the planter box and stirred at each row end or planted from separate boxes. The two crops may be grown separately and mixed in the silo cutter three loads of corn to one of Soy Beans. The beans should be almost ripe when cut. 36 inches hay, plant 60 to 80 lbs. per acre in rows 20 to 26 inches apart. Harvest when pods are well filled and leaves commence to turn. Allow to wilt in swath then rake up and place in small cocks. Curing sometimes requires several days and should be thorough. Soy Beans drop their leaves quite easily and should be cut before any number have fallen. They should be handled as little as possible to retain the most leaves.

For hogging off, plant 30 to 60 lbs. per acre in rows 20 to 42 inches apart. 20 inch rows can be made by straddling every other row with the corn planter. As soon as the beans are matured, turn in the hogs to harvest the crop.

### Early Black

Have given very gratifying results in the past few years. When planted with fodder corn, they add materially to the yield and quality of the silage. They also make a splendid hay crop when planted broadcast at the rate of 60 to 90 lbs. per acre. As a soil builder the Soy Beans are almost equal to Clover and Alfalfa. See Red Figure price list for prices.

### Early Brown (Northern Grown)

A little later and trifle taller than Early Black. Especially adapted for silage and for hay. Grows from 24 to 36 inches high with very fine branching stems, and especially leafy. Grow erect, eliminating difficulties in harvesting, experienced with some varieties that lodge badly.

There are many late Southern varieties of brown Soy Beans which mature too late to make good quality silage or hay. Be sure to get the genuine Early Brown Northern Grown. Prices quoted on Red Figure price list.

A Plot of Golden Millet.  
Raised from True Southern Grown Seed. Note the Heavy Growth.

## FIELD PEAS

Are not only profitable as a dry shelled crop, but may also be used for hay, pasture, or soiling with excellent results.

Peas are second only to Clover in their soil enriching properties and can be grown under almost any condition of soil or climate.

### Canada Yellow Field Pea

The standard field pea of the Northwest, and needs no description. It is always in demand either as a dry pea for cooking, or for pigeons. Prices given on Red Figure price list.

### Canada Green Field Pea

Is of the same general character as the yellow, is used in the same way, and gives the same results, the only difference being in the color of the seed. See Red Figure price list for prices.

### Cow Peas

Northern grown cow peas make an elegant pasture crop for cattle, sheep or hogs. May also be used to very good advantage as a hay crop, or for plowing under as a fertilizer. See Red Figure price list for prices.

## RAPE

**CULTURE.** Rape is best adapted to moist, rich soil in which there is plenty of humus. Slough lands are especially good. It grows best in cool, moist weather and the time for sowing depends upon when the crop is to be used. When wanted for pasture, allow 8 to 10 weeks for it to attain maximum growth. Sow 1 to 2 pounds of seed per acre in drills and cultivate, for a weed-cleaning crop. For broad-casting, use 5 pounds per acre on rich, weed-free soil so that the Rape will not be choked by weeds. For continued hog pasture, sow Rape early and at successive intervals. It may well follow any grain crop and is always splendid to plow under for green manure.

### Dwarf Essex

Rape is one of the surest crops for late pasturing. The leaf resembles the rutabaga very much, but will produce a heavier growth, that is relished by hogs, sheep and cattle. It may be sown as late as July 1st, and produce a very fine fall pasture. Prices given on Red Figure price list.

Prices subject to change without notice.

# INSECTICIDES AND FUNGICIDES

Prices subject to change without notice.

## Prices on Paris Green, Arsenate of Lead, and Bordeaux

Owing to the unsettled conditions of the Insecticide market at the time of printing this catalog, prices are quoted in this Book only on small packages, of Paris Green, Arsenate of Lead, and Bordeaux. Lowest market prices in larger quantities will be given on our Red Figure Price List during the spring and summer months. Please write us if you have not received your copy.

### Corona Dry Arsenate of Lead

There is no purer form of Arsenate of Lead than Corona Dry. It is the most effective poison known for leaf eating insects. For years it has been used by prominent commercial growers in dust form, and now it is available for the home garden. May be applied in dust form or diluted with water and used as a spray. Full directions are on every package.

1/2 lb. 30c; 1 lb. 50c.

### Corona Dry Bordeaux

1/2 lb. 25c; 1 lb. 45c.

### Corona Tobacco Dust

1/2 lb. 15c; 1 lb. 25c; 5 lbs. 75c; 10 lbs. \$1.40.

### Corona Dusting Sulphur

1/2 lb. 15c; 1 lb. 25c; 5 lbs. 75c; 10 lbs. \$1.40.

### White Hellebore

A mild insecticide for general use in garden, especially used for the currant worm. 1/4 lb. 20c; 1/2 lb. 35c; 1 lb. 65c.

### Lime Sulphur Solution

Especially for the control of San Jose Scale and similar scale or sucking insects on apple trees, plum trees, etc. Used principally when trees are in their dormant stage, that is, after the leaves drop in Fall, or before the buds appear in spring, at the rate of one gallon of Lime Sulphur to 50 gallons of water. For a summer spray it is used at the rate of one and one half gallons to 50 gallons of water in addition to 1 pound of Powdered Arsenate of lead. Prices: 1 qt. 40c; 2 qt. 60c; 1 gal. \$1.00; 5 gal. \$3.75.

### Slug Shot

Is a very effective insecticide. For cabbage and cauliflower worm, Slug Shot has no equal. 1 lb. sifter top can 20c; 5 lb. pkg. 65c; 10 lb. pkg. \$1.20.

Slug Shot

### Dry Lime Sulphur

A standard Lime Sulphur Solution in powdered form. It has all the advantages of Liquid Lime Sulphur and eliminates the disadvantage of buying the water and paying freight on it. Price: 1 lb. 30c; 5 lbs. \$1.10; 10 lbs. \$2.00; 25 lbs. \$4.00; 100 lbs. \$15.00.

### Formaldehyde

Recommended by Government experts for treating various kinds of seeds before planting as a preventative for smut in wheat, oats, barley and millet. It has proved very successful. For potatoes it is the only practical cure for scab and other destructive potato diseases. It is also used to prevent mould in seed corn. Prices: 2 oz. 20c; 4 oz. 30c; 1 lb. 50c; 5 lbs. \$2.00; 1 gal. \$3.50; 125 lb. keg \$30.00.

### Paris Green

Paris Green is the old reliable Potato Bug Poison. It is so well known that little needs to be said about its uses. But still a slight reminder or warning may be well taken.

An inexperienced person will very often do more harm than good when applying Paris Green, especially if applied in dry form; but a person who understands its qualities and defects will obtain the very best results. 1/4 lb. 20c; 1/2 lb. 35c; 1 lb. 60c; 2 lbs. \$1.10.

### Pyrox

Pyrox is a combination insecticide and fungicide in paste form. It is easy and convenient to use by simply adding the necessary amount of water and applying with a sprayer. Pyrox may be used to kill the apple-worm, currant worm, caterpillars, potato bugs and any other leaf eating insects, which harm and destroy many garden crops. As a fungicide it may be used on any vegetable, fruit or flowering plants that are subject to blight or other diseases. Put up in the following convenient sizes:

1 lb. jar .45 25 lb. can .65  
5 lb. can 1.75 50 lb. can 10.25  
10 lb. can 3.00 100 lb. keg 20.00

### Black Leaf 40 or Nicotine Sulphate

Is recognized as the spray for all kinds of sucking insects, such as Aphids, Plant Lice, Leaf Spider, Onion Thrips, etc. It is also recommended as an animal and sheep dip. 1 oz. bottle.....\$0.35 1/2 lb. tin.....\$1.25  
2 lbs. ....3.50 10 lbs. ....13.50

### Nico Fume Liquid

A highly refined solution of free nicotine and is used more for green house, indoor spraying and fumigating. The labels contain complete directions. 1/4 lb. tin 75c; 1 lb. tins \$2.25; 4 lb. tins \$8.00; 8 lbs. \$15.00.

### Nico Fume Paper

For Fumigating Greenhouses. This paper deteriorates with age, so to be sure of giving you fresh stock, we have your order sent direct from the factory. Put up in three sizes. Postpaid 24 sheets, \$1.25; 144 sheets, \$5.50; 288 sheets, \$10.00.

### Nico Fume Tobacco Powder

1 lb. tin, \$1.25; 5 lbs., \$4.75; 10 lbs., \$8.50.

### Spray-Tabs

An Insecticide and Fungicide combined as a perfect spray. Put up in convenient form especially for the home gardener. 30 tablets, 30c.

### Tree Tangle Foot

Tree Tangle Foot is a sticky compound similar to that used in making sticky Fly Paper. It is easily applied and is the most effective and economical protection for fruit, shade and ornamental trees against crawling insects. Particularly recommended against Canker Worm, Climbing Cuts Worms, Ants, Tussock Moth, Browntail Moths and Gypsy Moths. Full directions for use on every can.

1 lb. ....\$ .50 10 lb. ....4.25

5 lb. ....2.25 25 lb. ....9.75

All insecticides being of a poisonous nature cannot be sent by mail, therefore all prices quoted are net F. O. B. St. Paul, Minn., to be shipped by express or freight

## FLY, ANT, AND ROACH KILLERS

### War On Flies

One of the best powders we have ever used against ants, cockroaches, potato bugs, flies, flees, moths, lice, bed bugs, etc. Is sure death to these, when they come in contact with "War On Flies," but is harmless to humans, animals, or fowls. Carton 10c each. By mail 15c, 2 for 25c.

### Magic Fly Killer

This is a very neat little tin pan with a saucer cover containing poison enough to last all summer. All that is required is to fill it with water about once a week. There is no danger of spilling and no danger of children drinking the poison as it is tightly corked. The flies have access to the poison by means of small wicks which come through the top. If once tried, always used.

Price, each 15c.

### Tanglefoot Roach and Ant Powder

If you are troubled with these pests, there is no better preparation than Tanglefoot Roach and Ant Powder to get rid of them. Powder is odorless and not injurious to human beings or pets. 2 oz. tin 10c; postpaid 15c. ½ lb. tin 25c; postpaid 30c.

## PLANT FOOD

### Hoover's Plantlife

A food that promotes growth, health and vigor in plants of all kinds.

A plant shut up in a pot or box, soon eats all the food from the ground and will die if not fed in some way.

If you re-pot your plant, you retard its growth, because you have disturbed the little roots that reach out for food.

Hoover's PLANTLIFE takes the place of re-potting. All you need to do is put a little PLANTLIFE under the surface of the soil and keep the ground loose and moist. One application will take care of your plant from three to six months or more. Can 50c; Postpaid 55c.

### Stim-U-Plant Tablets

These tablets are a plant food, something that every small gardener should have on hand at all times. You can feed the plants as they need food throughout the season, and keep the development absolutely under control. Stim-U-Plant tablets increase production, hasten maturity, and improve the quality of the plants and their products at a very small cost.

Stim-U-Plant tablets have a guaranteed analysis of 11 per cent Nitrogen; 12 per cent Phosphoric Acid; and 15 per cent Potash, all water soluble and immediately available for Plant food.

15 tablet size 15c, postpaid 20c. 30 tablet size 25c; postpaid 30c. 100 tablet size 75c; postpaid 80c. 1,000 tablets \$3.50, postpaid \$3.65.

### "Red Snapper" Plant Food

This is an organic fertilizer containing a nourishing, properly balanced food, in the richest and most nutritious form, for house plants, climbing vines, rose bushes, etc. Flowering plants need food of an organic nature, and the lack of it makes house plants colorless and lifeless unless new organic food is supplied them. The "Red Snapper" Plant Food fed to the plants will make them blossom out with a profuseness and rich color. Interesting and instructive leaflet sent on request.

"Red Snapper" Plant Food in large cans, enough for 120 quarts solution, including 3 oz. Package, "Red Snapper" Plant Tonic, and 16-page Book of Instructions, 50c.

"Red Snapper" Plant Food, 12½ lbs. in strong fiber sacks, with 2-pound package of Plant Tonic, \$1.50.

## DRY POWDER DUSTERS

### The Champion Duster

Has been the real champion of Dusters for many years in applying insecticides in dry powdered form. It will dust two rows at a time just as fast as the operator can walk. Best results are obtained with dry insecticides when applied early in the morning while there is dew on the plants. Price, each \$14.00.

### The Little Giant Insecticide Duster

This duster is of the same type as the Champion but slightly smaller. Machine weighs 6 pounds; furnished with three 16-inch tubes, five nozzles and strap. Weight, cased, about 15 pounds. Capacity about one quart. For low growing crops only.

Will green one or two rows of potatoes, tomatoes, etc., as fast as you walk. Price, each \$11.00.

### Duster Brown Duster

An excellent general purpose duster for handling dry powdered chemicals. Can be used in gardens, on small trees and shrubs. It is double acting, throwing dust on both the up and down strokes. Each \$2.75.

### Hudson Bellows Gun

This Dust Sprayer is popular for dusting Paris Green, Arsenate of Lead, Hellebore, Persian Insect Powder, and all insecticides in their dry state. By unscrewing the funnel the powder is put directly inside of Sprayer and is kept constantly agitated by the action of the bellows insuring a uniform discharge with each operation. Price, each \$1.50.

# PLANET JR. GARDEN TOOLS

## Planet Jr. No. 2 Seed Drill

No. 25.  
Planet Jr.  
Combined  
Hill and  
Drill  
Seeder.

An old time standard garden seeder which is still considered by many to be the best on the market. Price, each, \$13.00.

## Planet Jr. No. 25 Combined Hill and Drill Seeder

Double Wheel Hoe Cultivator and Plow. This is a splendid combination for a family garden. Price, each, \$22.00.

## Planet Jr. No. 4 Combined Hill and Drill Seeder

It will soon pay for itself in a family garden as well as on a larger acreage. Sows all garden seed in hills or drills. Plows, hoes and cultivates, opens furrows and covers them. Price, complete, \$18.00. As a seeder only, \$14.00.

## Planet Jr. No. 16 Single Wheel Hoe, Cultivator, Rake and Plow

No. 16. Planet Jr.  
Single Wheel Hoe,  
Cultivator, Rake  
and Plow.

This is the highest type of single wheel hoe. It is light but strong and is very easily handled. Price, \$9.25.

PRICE,  
\$9.25

## Planet Jr. Nos. 17, 17½ and 18

Are identical with No. 16, except in the equipment. The No. 17 is equipped with one pair of 6 inch hoes, three steel cultivator teeth, and one large garden plow. Price, each, \$8.75. No. 17½ has only the hoes and cultivator teeth. Price, \$7.00. No. 18 has one pair of hoes only. Price, \$5.75.

## Planet Jr. No. 90. 12 Tooth Harrow, Cultivator, and Pulverizer

This tool has rapidly grown in favor with gardeners and farmers. It is especially adapted to close cultivation of small plants, such as strawberries, sugar-beets, onion and cabbage. Beet-hoes, sweeps of all sizes and strawberry runner cutter may be attached to the No. 90, making it possible to shift much of the hand labor onto this horse drawn implement. Price with Pulverizer, \$17.50.

## Planet Jr. No. 82. Seven-Tooth Horse Hoe and Cultivator

The best all around walking cultivator made. May be used for cultivating, hilling or furrowing. Price \$17.00.

No. 3. Planet Jr. Hill & Drill Seeder

PRICE  
\$17.50

## No. 3 Planet Jr. Hill and Drill Seeder

We recommend customers to buy separate Seeders and Wheel Hoes where they have enough work to warrant it. No. 3 sows in hills 4, 6, 8, 12 or 24 inches apart or in a continuous row. A favorite among onion growers and market gardeners. Holds 3 quarts. Price, \$17.50.

## Planet Jr. No. 13 Double Wheel Hoe

Same as Nos. 11 and 12 with only one pair of 6 inch hoes. Price, each, \$8.25.

PRICE,  
EACH,  
\$14.75

No. 11. Planet Jr. Double  
Wheel Hoe  
Cultivator  
Plow and  
Rake.

## Planet Jr. No. 11 Double Wheel Hoe, Cultivator Plow and Rake

A single and double wheel hoe in one. Will straddle the row or work between. Price, each, \$14.75.

## Planet Jr. No. 12 Double Wheel Hoe, Cultivator and Plow

The same as No. 11, less rakes, and one pair of hoes. Price, \$11.50.

PRICE,  
COMPLETE,  
\$5.00

No. 119. Planet Jr.  
Garden Plow and  
Cultivator.

## Planet Jr. Garden Plow and Cultivator No. 119

This is a new member of the Planet Jr. family and in the short time that it has been on the market, it has become very popular. Its high wheel makes it very light running. Price, complete, \$5.00.

# MISCELLANEOUS GARDEN TOOLS and SUPPLIES

We aim to carry a complete assortment of Garden tools, such as Trowels, Weeders, Hoes, etc. We also make a specialty of Gardener's supplies, such as Paper Pots, Plant Bands, Cotton Gloves, Mastic for hotbed or greenhouse glazing, Glazing points, Raffia, Reed

Baskets of all sizes, Measures and Berry Boxes. Owing to the unsettled market conditions, we are not inserting prices on the above named articles, but we shall be pleased to quote prices at any time on request.

The Moe garden tools are made in one piece, from pressed steel, making them doubly durable.

Garden Trowel

Each 35c.  
By Mail 40c.

Transplanting Trowel

Each 35c.  
By Mail 40c.

Garden Weeder

Each 35c.  
By Mail 40c.  
All 3 of the above sets  
sent postpaid for \$1.10.

The Lang weeder is a labor saver. No gardener should be without one. Postpaid 25c.

Lang's Ideal Weeder

Asparagus Knife

Asparagus Knife. Each 40c, postpaid 45c each.

## Natural Raffia.

The best tying material for plants. Also used extensively in basket making in combination with Basketry, Reed or Rattan. Prices, 1 lb. 35c; 5 lbs. \$1.50; 10 lbs. \$2.50. Postage extra.

## Cahoon Seeders

A broadcast seeder that will last a life time. The bag and hopper will hold about 22 quarts. It will seed all kinds of grass seeds and grains, also turnip, rutabaga or rape seed. Price, each, \$5.00.

## Cyclone Seed Sower

Has proven that it is the most accurate, most convenient to operate and most economical machine for sowing Clover, Timothy, Alfalfa and all other farm seeds that can be sown broadcast. It runs easily and will distribute any desired quantity of seed per acre. Price, each, \$2.00.

## Neponset Waterproof Paper Flower Pots

These pots are used in transplanting any kind of plants in the greenhouse and hotbeds, allowing them to become well rooted in the pot before setting in the open ground, thereby avoiding all set-back from outdoor planting.

## Rainbow Lawn Sprinklers

Guarantee attached to each sprinkler

The Rainbow Sprinkler is one of the very best lawn sprinklers made—guaranteed to give perfect satisfaction. Works from artesian well or tank pressure with ease. Throws a spray-like mist and rain combined over an area of from 40 to 50 feet, watering every inch of ground. Rainbow Sprinklers will last indefinitely without care. \$3.00. Postage extra. Mailing weight 3 lbs.

Rainbow Brass Lawn Sprinkler

Write for Prices on Ton Lots

# FERTILIZERS

Special Prices on Large Lots

One of the most important factors in gardening and farming is the use of commercial fertilizer.

Stable manure is used to a great extent, but it is not so valuable as plant food. It is relatively low in phosphorus and potash.

We recommend the factory mixtures, for fertilizers must be thoroughly blended and in a proper mechanical condition and available to the needs of the plant. The three essential elements for plant food in fertilizers are nitrogen, phosphoric acid and potash.

**NITROGEN.** Ammonia is the equivalent term for nitrogen. It produces leaves and stalks and gives vigor to the plant. Stunted plants, spindling stalks and pale green leaves clearly indicate that additional available ammonia is needed.

**PHOSPHORIC ACID.** Phosphoric Acid is the plant food element that develops root system, hastens maturity, makes plump, heavy kernels, solid corn, large cotton balls and gives strength and productive power to the plants.

**POTASH.** Potash stiffens straw and stalk, promotes cellular growth, aids in starch formation of grains, and juiciness and sweetness of fruits.

## Special Lawn and Garden Fertilizer

This specially prepared fertilizer is the result of careful study, experiments, and experience of many years. It contains in the right proportions, a concentration of the elements which nourish and feed grass into luxuriant growth. It produces a rich green color, and insures a permanent evenness over the whole surface of your lawn. It is not unpleasant to handle, as it is odorless, dry, and fine, and is easily put on. Two or three applications in a season, at the rate of a pound to every ten square feet, will keep your grass in flourishing condition—perfectly healthy and able to stand any amount of sun if watered.

### FOR THE LAWN.

The first application should be in the early Spring—just as soon as frost is out of the ground. Use from 10 to 15 lbs. on every 100 square feet, or 400 to 500 lbs. to the acre. Scatter it carefully and evenly by hand just before the rain or wet it well with a hose after applying.

### FOR THE VEGETABLE GARDEN.

Apply in the early Spring at the rate of 15 lbs. to 100 square feet. Scatter carefully over the ground and fork it in well. For late use, carefully scatter around the plants and between the rows and work well into the soil. See Red Figure price list for prices.

## Steamed Bone Meal

This is finely ground and of first quality. It starts to decompose quickly and continues for a long time and its improvement in the soil fertility. It is less likely than other fertilizers to leach or waste. With bone there is no danger of burning the plants. Use three to five pounds of bone meal for each tree and vine when setting it out, working it around the roots.

Analysis: Nitrogen, 3.75 per cent; equal to Ammonia, 4.50 per cent; Phosphoric Acid (from bone), 23.00 per cent.

**Lawns.** For new lawns, use 500 lbs. of bone meal with a ton of sheep manure per acre. This should be plowed under or spaded in, several weeks before sowing the seed. Old lawns, top dress very early in Spring with sheep manure and bone meal mixed, at the rate of 2,200 lbs. per acre or 50 lbs. per 1,000 sq. ft.

**Field and Garden Crops.**  $\frac{3}{4}$  to 1 ton broadcasted and harrowed in. This is especially desirable for use with sheep manure, which is rich in nitrogen.

**Permanent Pasture and Meadows.** Use  $\frac{1}{2}$  to 1 ton per acre before growth starts in the Spring.

**Roses and Flowering Plants.** Ground bone is one of the most useful forms from which to furnish both Nitrogen and Phosphoric Acid in slowly available forms. A good mixture for both the field and prepared soils is four parts of ground bone and one of muriate of potash, applied at the rate of four pounds per square rod, and preferably worked into the soil previous to setting the plants; a second application may be made in the Fall at the same rate. For pot plants use one part bone meal to 50 of soil.

Prices given on Red Figure price list.

## Raw Bone Meal

This is a high grade valuable fertilizer prepared especially for R. L. Gould & Co. It is useful for all crops, but especially for grass lands, fruit trees, shrubbery, and flowers. While it is not as quick acting as our Steamed Bone Meal, it is more lasting and is better suited for garden purposes. The proportions and method of applying are similar to those given above on Steamed Bone Meal. Refer to Red Figure list for prices.

## Sheep Manure

Is the best and strongest in fertilizing and enriching elements, as it contains Nitrogen, Phosphoric Acid, and Potash in liberal proportions. Produces immediate and lasting results, and promotes steady and rapid growth. Sheep Manure is dried, pulverized and screened, making it very convenient and easy to use; the most effective and practical fertilizer of today. Springtime is the best season of the year to apply Sheep Manure. The amount to apply depends largely on the condition of the soil, but a spread of 100 pounds to every 1,000 square feet of soil will in many instances be the proportion needed. See Red Figure price list for prices.

## Vegetable and Beet Grower

This brand is the best for all garden crops, used with splendid results by private or market gardeners. It is made of dissolved bone meal, and acid of soda, dried blood, with potash in the form of sulphate, added, so easily applied either before or after planting, by sprinkling the surface of the soil and raking in. Applied especially during the Springtime, 100 pounds to every 1,500 square feet of garden space, insures a vigorous yield of vegetables under normal weather conditions. Prices quoted on Red Figure price list.

## Nitrate of Soda

A fertilizer very quick in action and used for the nitrogen it contains. It creates rapid growth, is odorless, very quick and entirely soluble. It should be applied only when the plants are above ground, usually in combination with other chemical fertilizers. Nitrate of Soda is the best form in which nitrogen can be restored to the soil. It is of special value for early crops such as Peas, Corn, Beets, Cabbage, etc., when rapid maturity is essential, and of great benefit to hay and forage crops. Nitrate of Soda is a great stimulant for the production of Sugar Beets, Potatoes and Sorghum, also small fruits.

Use as a top dressing at the rate of 100 lbs. per acre on the following vegetables when plants are well established, viz.: Beet, Cabbage, Cauliflower, Cucumber, Celery, Egg Plant, Lettuce, Spinach and Onion.

For Asparagus use at the rate of 250 lbs. per acre as a top dressing after the first shoots make their appearance.

For Strawberries use 100 lbs. per acre as a top dressing after the plants have blossomed.

For Grass and Grain use at the rate of 100 lbs. to 200 lbs. per acre when growth is well established.

For the home garden, apply in soluble form, using one ounce to 2 gallons of water.

Nitrate of Soda should be applied directly to the soil and should not be allowed to touch the foliage. Prices given on Red Figure price list.

## Acid Phosphate

Valuable for Winter Wheat, Rye, Barley, Clover, Alfalfa, Field Beans, Field Peas and all crops needing available phosphoric acid. Should be sown broadcast at a rate not to exceed five hundred pounds to the acre. Acid Phosphate added to stable manure is the most effective fertilizer known. While greater crops may be grown with large amounts of commercial fertilizers the greatest economical returns and average yields come from phosphated manure. This new fertilizer is made by simply adding about forty pounds of acid phosphate to a load of manure when it is removed from the stable or barn. 100 pounds to 1,000 square feet, is the usual amount needed on small garden space. Refer to Red Figure list for prices.

## Gypsum or Land Plaster

The best form in which to apply Lime as a neutralizer for acid soils. Excellent for mixing with fresh manure to neutralize the nitrogen. 100 pounds of Gypsum to a ton of manure forms a very good fertilizer. See Red Figure price list for prices.

## Potash

To be used with bone meal and pure dried blood, or natural fertilizers, in soil growing fruits, celery, asparagus, corn, oats, turnips cucumbers, grapes, carrots, onions, peas, clover and beans. It should not be used on soil growing potatoes, flax, sugar beets, cabbage or cauliflower. 100 pounds to every 1,500 square feet is about the right proportion to use. Prices are quoted on Red Figure price list.

# SPRAYERS

The Ideal is a high pressure portable outfit. Exceptionally handy for the orchardist or fruit-grower. It is also a great favorite for use around the stock barns, cattle pens, poultry houses, etc., and is a practical outfit for whitewash, coldwater paints, and other commercial purposes. Maintains a working pressure of 200 pounds.

No. 31—Ideal Spray Outfit. Each ..... \$35.00

## The Manyuse

For Poultry

Is a very serviceable sprayer, made of heavy tin. The pointed end makes it very handy in getting into corners. Has about a 1 quart capacity. Price 50c. Postpaid 65c.

## The New Misty

The Misty is a universal favorite for use in and around the house, yard, small garden, chicken house, etc. Pump is made of heavy charcoal tin. Liquid capacity one full quart. Price 50c. Postpaid 65c.

## The Junior Whitewash

Made entirely of brass and novel in construction. Will last a life time. Place in a tub or pail of solution, a slight pressure on the handle forces out a strong and steady spray as desired. Very handy for spraying small orchards, etc. Sprayer \$4.00. Extension 65c.

## The Rapid Double Tube

Spreads the spray from two tubes, making it very useful when needed for covering large surfaces at one operation. Made of galvanized tin to hold 1 quart. Price 60c. Postpaid 75c.

The Junior  
White Wash Sprayer paid 75c.

For work of any kind requiring a high pressure compressed air sprayer, the Perfection is supreme. It is an easy and economical means of whitewashing, disinfecting, deodorizing, cold water painting, etc.

Tank is either of heavy galvanized or brass sheets, capacity 4 gallons, shipping weight 11 lbs.

Galv. Tank, each ..... \$6.00

Brass Tank, each ..... \$9.00

## Hudson Junior Sprayer

The Hudson Junior Sprayer is made for the man who needs a high pressure compressed air sprayer smaller than the Perfection. It is particularly adapted for the backyard garden, small truck farm, or around the chicken house. It will do any work the larger model can, for it differs from it only in capacity. Holds about 2½ gallons. Shipping weight 8 pounds.

With galvanized tank. Price each \$4.50.

With brass tank. Price each \$7.00.

## Magic Bucket Pump

This is one of our big sellers and popular sprayers. Unequaled for applying white-wash, Carbola, or disinfecting poultry houses or barns. Is easy to work and maintains a high pressure and steady discharge with little effort. Made of brass, excepting handle and foot rest. Can be used for washing automobiles, windows, spraying flowers, shrubs, trees, etc. Complete with 3 feet of ½ inch hose and special nozzle for spray or solid stream, at \$4.75.

The Crescent

Magic Bucket Pump

Made of heavy charcoal tin, fitted with double discharge tubes which throw a wide fan-shaped spray. Desirable for covering large areas quickly. Capacity of glass jar one full quart. Each 60c. Postpaid 75c.

# POULTRY FEED AND SUPPLIES

**T**HE various products listed under this heading have been added only after convincing proof of their value in making for more scientific, cost reducing, and profitable, raising of poultry. Selling Gould's Reliable Feeds, Darling's Meat Scraps, Pratt's Baby Chick Food, Blatchford's products; Pratt's, Lee's and Dr. Hess's remedies, and products of similar high repute is what has built up Gould's reputation for quality.

Items that have price quoted are subject to change without notice, but only if our stocks must be replenished at a changed market price. Any change in price will be shown on Red Figure Price List issued monthly. And our cash-with-order policy which reduces the big expense of book-keeping and eliminates credit losses, permits us to sell these high grade products on a very small margin of profit.

## Scratch and Growing Grain Feeds

THAT ARE PURE, WHOLESOME, AND OF THE BEST QUALITY.

**Prices** See our Red Figure price list for prices on all feeds. These lists are corrected and issued at least monthly, and oftener if there are many

or radical changes, so that our customers may be kept informed of prevailing market prices. All quotations are F. O. B. St. Paul. If goods are to be sent parcel post, add postage to remittance.

### Gould's Reliable and Red Ribbon Scratch Feeds

Good, wholesome grains of enough variety to supply the nutritive value to meet the needs of the body of the fowl in maintaining good health, is very important.

Feeding any one grain in excess does not follow the principle of meeting the requirements of the hen, for maintaining good health.

A fowl gets much more nourishment from a mixture of several grains, than from a feed containing only one or two kinds. This is a proven fact and is the difference between success and failure of many raisers of poultry. Gould's Scratch Feeds have the correct variety to insure full feeding value, for increasing the egg yield.

Gould's Reliable Scratch

Feed is composed of high grade wheat, cracked corn, milo maize, buckwheat, barley, oil cake and sunflower seed, thoroughly screened, and in proper proportion to be scientifically correct, for supplying all the needs of the fowls, in maintaining good health and vigor.

Gould's Red Ribbon Scratch Feed is composed of the same high grade seeds and grains as contained in Reliable, but differs in the mixture, in that it has a smaller percentage of sunflower seed and contains no oil cake.

Gould's scratch feeds can be fed in less amount than in most other scratch feeds, for it contains only the most wholesome grains, that give the greatest food value.

## Gould's Starter, Chick and Developing Feeds

### Gould's Baby Chick Starter

The first few weeks are the most critical ones in the life of a chick. Certain feeds are hard to digest and do not agree with the delicate organs of the small chicks; and unless an easily digested food is given, sickly chicks are the result. If they live they will be nothing but an expense. Instead of producers.

Gould's Baby Chick Starter is a mixture of pure wholesome grains, screened to proper size, and containing a scientific mixture, easy to digest, that has all the different feeds needed to build up the chick and make rapid growth. As a rule, baby chicks do not exercise enough for the amount of food they eat. A little grit is therefore added to Gould's Baby Chick Starter, as grit helps in digesting and assimilating the food. Feed the Starter until chicks are about three weeks old, then change to a coarser mixture, Gould's Chick Feed. See Red Figure Price List for prices.

### Gould's Developing Feed

Gould's Developing Feed has a greater variety of grains than the Starter or Chick Feed, and is milled to a larger size. Feed from the time chicks are six weeks old to when Gould's Reliable Scratch feed can be fed. Gould's Developing feed does not contain any grit, for by this time the growing birds should be active enough to digest and assimilate their food. Grit should, however, be accessible in a hopper at all times. Refer to Red Figure Price List for prices.

### Gould's Chick Feed

This Mixture to be fed when chicks are three weeks old and up to six weeks is also high in protein and similar to the Baby Chick Starter, differing only in that the grains are of a little larger size. Giving the chicks the feed in proper size is the best economy and prevents waste. Gould's Chick Feed also contains a small percentage of grit. A perfectly balanced feed to promote rapid growth and build good health. Prices are given on Red Figure List.

# MASH—CHICK, AND GROWING FEED

## POULTRY MASH

Has been proven by scientific and practical poultry breeders to be the one feed that makes poultry raising profitable. A reliable mash will cut the feeding cost to a minimum, yet being so rich in protein, it increases the egg yield to the very limit, by the egg producing food material it contains. Scratch feed alone does not increase the egg yield.

## Gould's Reliable Egg Mash

Reliable has the highest percentage of protein of any Mash on the market, scientifically balanced as to fat and fibre material qualities. Results are sure and surprisingly quick in making the hens lay. Has in many instances increased the egg yield 50% in a very short time. Contains high quality Meat and Fish Scraps, Bone Meal, Gluten Meal, Oil Meal, Corn Meal, Wheat Middlings, Wheat Bran, Crushed Oats, Ground Barley, Alfalfa Meal, Buttermilk, Salt and Mustard in proper proportion.

GOULD'S RELIABLE MASH IS SOLD WITH OUR GUARANTEE TO PRODUCE RESULTS.

See Red Figure price list for prices.

## Gould's Buttermilk Growing Mash

In raising chicks great care is necessary to obtain the proper feed. More chicks die from white diarrhea than from any other disease, mostly due to improper feeding.

Grain feed alone is hard to digest. The chicks need a soft feed or mash nicely balanced and easy to digest.

Feed with great care during the first few weeks and you are sure to have a much easier time in raising strong and vigorous birds. Much depends on good feeding. Gould's Buttermilk Growing Mash will save many a chick for you, and give you strong and healthier birds.

Gould's Buttermilk Growing Mash contains a good percentage of pure dried Buttermilk, which furnishes lactic acid; an aid to digestion, and a preventative of the dreaded white diarrhea. Also contains corn-meal, middlings, bran, meat scraps, fish scraps, gluten meal, bone-meal, ground oats, and charcoal, all the food elements needed to build the frame of the growing chick, and for making good rich blood, flesh, and feathers.

Keep Gould's Buttermilk Growing Mash before the chicks all the time after the third day, and until the birds are 6 months old, when Gould's Reliable Mash should be substituted. See our Red Figure list for prices.

## Pratt's Buttermilk Baby Chick Food

This "baby food for baby chicks" is made of sweet, wholesome, purest ingredients, and mechanically predigested. Every ounce is full of bone, muscle, feather and health builders. Chicks grow strong, vigorous, and sturdy, and are free from leg weakness and digestive troubles.

Millions of pounds of Pratt's Buttermilk Baby Chick Food are used annually by successful poultrymen all over the world. Use it for your chicks for the first month or six weeks and see the results. You'll pay for the food in the chicks you will save. Pratt's is a perfect food for young fowls. Equally good for young turkeys, guineas, ducks, pheasants, etc.

Sold in cartons; and in 14, 25, 50, and 100 lb. bags. See Red Figure price list for latest prices.

# BLATCHFORD'S PRODUCTS

## Chick Mash

Formally Known as Milk Mash.

Is perhaps without an equal as a first feed for the baby chick and as a developing food for the growing chicks. Is a complete milk equal feed, easily digested and guaranteed to prevent bowel trouble, leg weakness and the dreaded white diarrhea. Composed of the right combination of milk substitutes, meat and grains, forming a perfectly balanced ration, that produces at a low cost healthy and sturdy chicks. Refer to Red Figure list for prices.

## Pig Meal

Is a milk equal feed for little pigs, that will carry them over the critical weaning period, and start them right in growing big, husky hogs at a bigger saving in cost, than by feeding dairy milk. It gives the infant pig a gradual and safe change from sow's to the full grain ration or pasture. See Red Figure price list.

## "Fill the Basket" Egg Mash

Supplies the surplus nourishment the hen needs for continuous egg production. Is every bit food, containing just the right combination of milk substitutes, meat and grains, carefully ground to the correct degree of coarseness necessary for complete and easy digestion. Prices quoted on Red Figure price list.

## Calf Meal

Is a complete milk-substitute that will raise as good or better calves than if they had been allowed to run with the cows, at about one third the price that milk can be sold at. One pound of Calf Meal will make one gallon of sweet, wholesome, and nutritious milk-equivalent that builds up fine, handsome calves with fat, sleek bodies in much less than the usual time. See Red Figure price list.

# MEAT SCRAPS—OYSTER SHELL—GRIT, ETC.

## DARLING'S

### Meat Scraps

Has long been recognized by poultry experts as being the best meat scraps on the market. Is made from clean, fresh trimmings of meat, thoroughly cooked, with every possible amount of water and grease extracted. This is why it contains more protein, and less fat moisture and waste than any other brand of meat scraps. Is free from any obnoxious odor and remains sweet and clean as long as a grain feed, kept under similar condition. Guaranteed analysis: Protein 50%; Fat  $\frac{1}{2}$  of 1%; Fibre 3%. See Red Figure price list for prices.

## DARLING'S

### Meat Crisps

Is the highest grade meat feed that it is possible to produce. Is ground in three sizes, fine, medium, and coarse. Put up only in 25 pound bags, 3 or  $6\frac{1}{2}$  lb. cartons. Three pounds of Meat Crisps contain about as much feeding value as 5 pounds of meat scraps. Has over 50 per cent more protein than ordinary meat scraps. Contains less fat, bone and fibre. Guaranteed analysis: Protein 75%; Fat  $\frac{1}{2}$  of 1%; Fibre 3%. Refer to Red Figure list for prices.

## Fish Scraps

Is recognized by leading poultry men to be superior to Meat Scraps as a poultry feed. Its increased demand each year is due to the good results and large amount of protein it contains. See Red Figure price list. Analysis: Protein 45.54%; Fibre 1%; Fat 2%.

## CHARCOAL

Charcoal is one of the greatest disease preventatives for poultry. It aids in digestion, purifies the blood and regulates the bowels and it is absolutely necessary that fowls, young and old have access to it at all times. We have charcoal in three sizes; fine, medium or hen size, 25 lbs. \$1.00; 50 lbs. \$1.90. 100 lbs. \$3.75.

Genuine Eastern Shore

## OYSTER SHELL

Contains carbonate of lime, of the same composition as egg-shell. As other feeds contain very little of this mineral matter, the hens need Oyster Shell at all times to produce eggs. Our Eastern Shore shell is the best and purest to be had, but has many imitators of inferior quality. Many dealers sell Poultry Shell when Oyster Shell is ordered, while Poultry Shell is nothing but Clam Shell, which acts only as grit, nothing more. Buy our genuine Eastern Shore Shell and notice the difference.

25 lbs., 40c; 50 lbs., 70c; 100 lbs., \$1.35.

## GRIT

### Mica Crystal Grit

Is a necessary aid in digestion for both small and large birds. Should be before the fowls in a hoppers at all times. Contains iron, lime and other mineral elements that are needed as a tonic, shell and yoke maker. Ground in three sizes; chick, pigeon, and hen. 25 lbs., 40c; 50 lbs., 70c; 100 lbs., \$1.35.

### "Two in One" Poultry Grit

Contains a large percentage of limestone. It not only furnishes the lime for the egg shell, but aids the digesting and assimilation of the food, which is so necessary in getting a maximum egg production. Two-in-one grit is a big help in developing the all-the-year-round egg layer. Price: 25 lbs., 35c; 50 lbs., 65c; 100 lbs., \$1.25.

### Foust's Pigeon Health Grit

Has proven invaluable for 30 years in giving health, vim, and vigor to both young and old birds. Thousands of raisers have found it unequalled as a tonic and for fattening squabs. 25 lbs., 75c; 50 lbs., \$1.40; 100 lbs., \$2.75.

## Ground Bone

Furnishes the chick or grown fowl with the necessary element needed to produce bone and help build up the frame. Is made from fresh, clean bone, with the fat and moisture extracted. Should be before the birds at all times. Ground in three sizes, meal, chick and hen. A very valuable feed during the growing and moulting period. 25 lbs., \$1.10; 50 lbs., \$2.15; 100 lbs., \$4.25.

## French's Poultry Mustard

Materially helps to increase the egg production and improves fertility and stamina of fowls. Its continued use has nothing but good effect on the birds, but ordinary mustard should not be confused or fed to poultry.  $1\frac{1}{2}$  lb. carton 45c; 3 lbs., 80c; 5 lbs., \$1.30; 10 lbs., \$2.50.

## DRIED BUTTERMILK

Dried Buttermilk is pure fresh buttermilk with water only, removed, and nothing else added. Buttermilk resembles milk in composition except that it has less fat and contains lactic acid. Dried Buttermilk supplies not only protein but other very valuable foodstuffs not found in grains, meat scraps, fish scraps, etc. Dried Buttermilk contains practically all the foodstuffs necessary for rapid growth. Is best to feed it dry mixed in with the mash; adding from 5 to 10% of the Buttermilk to the mash. Can also be fed in liquid form, one pound of the Dried Buttermilk to 6 quarts of water is a good mixture. We also have the coarse size for Hopper Feeding. See Red Figure price list for prices.

## UNMIXED GRAINS

See Red Figure Price List for prices on all feeds. **ALFALFA MEAL** is a substitute for a green feed in the winter time, fed either dry or steamed.

**BARLEY** is a builder and good as a variety feed.

**WHEAT BRAN** is a needed feed in keeping the birds healthy, although containing little protein.

**CORN MEAL** used largely in the form of a mash.

**COTTON SEED MEAL** is rich in protein and used extensively in dry mash.

**CRACKED CORN** recleaned, in three sizes, coarse, medium or fine, for every age of the fowl needed.

**GLUTEN FEED** is rich in vegetable protein.

**KAFFIR CORN** good for either poultry or pigeons.

**MIDDINGS** very valuable in mash mixtures.

**GROUND OATS** is used largely for mixing with other feed. Highly nourishing.

**STEEL CUT OATS** or pin head oats for small chicks.

**HULED OATS** are produced by removing the outside shell, making it highly nourishing and valuable as a bone and body builder.

**OIL MEAL** aids digestion, also contains about 36% of protein. Should be fed in the form of a mash or with other ingredients.

**DOWNY SEED** is a rich and valuable feed especially at moulting time. Improves the plumage.

**WHEAT** perhaps the best and most nourishing scratch grain to be had.

**CRACKED WHEAT** for the small chicks.

# We Guarantee **Pratts** REMEDIES AND TONICS To do exactly what we claim for them.

**Pratt's Poultry Regulator** builds up the vitality, digestion, and appetite also increases the egg production. Packages 25c, 50c, \$1.10. Bags 12 lbs. \$1.40; 25 lbs., \$2.50.

**Pratt's Healing Ointment** gives speedy relief and cure to sores, cuts, scratches, wounds, burns, scalds, barbed wire cuts, eruptions, eczema, and itching. For man or beast. 30c and 60c packages.

**Pratt's Head Lice Ointment** is non-poisonous to the chick yet it will kill those blood sucking insects that weaken the chick so that it becomes an easy prey to disease. Also good for Scaly Leg. Tins at 35c.

**Pratt's Poultry Disinfectant** is a wonder worker for spraying chicken houses, roosts, dropping boards, etc. and is sure death to lice and mites. 60c a qt.; \$1.00 2 qt. size; \$1.75 for 1 gallon can.

**Pratt's White Diarrhoea Tablets** can be depended upon to protect the young chicks from this life taking disease if given in the drinking water from the first. 25c and 50c packages.

**Pratt's Special Compound** is administered in the drinking water, and is guaranteed to cure cholera, sour crop, indigestion and bowel troubles in short order. 25c and 50c packages.

**Pratt's Roup Tablets or Powder** works quickly as a preventative or remedy against roup, colds, catarrh, etc. Purifies the system, reduces fever, and allays inflammation speedily. 25c, 50c, \$1.00 packages.

## DR. HESS'S PREPARATIONS

**Dr. Hess Poultry Pan-a-ee-a** comes as near being a cure-all as any remedy on the market. Acts as a corrective and tonic on the dormant egg organs as well as on the digestive organs. Contains internal antiseptics that counteract disease. Is invaluable to the poultry raiser. 25c, 75c, and \$1.50 packages; 25 lb. pail \$3.00; 100 lb. drum \$10.00.

**Dr. Hess White Diarrhoea Remedy** is guaranteed to give satisfaction in the treatment of diarrhoea in either chicks or large fowl. 25c and 50c packages.

**Dr. Hess Roup Cure** will cure the most obstinate case of this very troublesome disease. Sold in packages at 25c and 50c.

**Pratt's Red Mite Special** is guaranteed to kill those blood sucking pests. Perches, dropping boards, sides of houses, and roof near perches should be sprayed weekly. 1 qt. 55c; 2 qt. 95c; 1 gal. can \$1.60.

**Pratt's Scaly Leg Ointment** kills the parasites which cause the trouble, and will effect a complete cure in a few days. Also promotes a new and healthy growth of skin to take the place of the diseased parts. Sold in 35c and 70c packages.

**Pratt's Sorehead Chicken-Pox Prescription** will clear up the ugly looking chicken-pox sores, smooth out the plumage, and restore to health and vigor very quickly. In 35c and 70c packages.

**Pratt's Lice Killer** (in powder form) kills all lice on fowls very quickly, also rids horses, cattle, hogs, dogs and cats of lice, and destroys ticks on sheep. Packages 25c and 50c.

**Pratt's Bronchitis Remedy** will relieve this sickness among poultry instantly, and will also act as a preventative for colds and simple catarrh. Sold in 25c and 50c size packages.

**Pratt's Condition Tablets** have a very bracing effect and add flesh to birds who are run down through colds and similar troubles. At 25c and 50c a package.

**Pratt's Lice Salve** is an ointment more powerful than the Head Lice Ointment and is intended for use on almost or full grown birds. One application is effective for a long time. Price 25c and 50c.

**Pratt's Gape Compound** is unfailing and expels quickly the worms that cause gape. Packages at 30c and 60c.

**Lee's Lice Powder** is a destroyer of vermin yet perfectly harmless to the chick or fowl. For the setting hen, dog, horse or cow during mid-winter a little of the powder applied and well rubbed in, effects wonders, if they are infected with vermin. Put up in convenient sprinkler top cans at 25c and 50c.

**Lee's Lice Killer** is put up in liquid form. It kills both by vapor and by contact. It gives double service. Painted on the roosts, it kills insects with which it comes in contact, and the vapor arising from it kills lice on the bodies of the chickens as they roost over it at night. Qt. 60c; 2 qt. size, 90c; 1 gallon \$1.50.

**Lee's Egg Maker** is a very nourishing feed for panned up poultry for chicks of over ten days, and for pullets during the moulting season. Put up in package form at 40c, 90c and 12 lb. pail at \$2.00.

## Lee's Germozone

Is one of the very best remedies for poultry affected with colds, cholera, roup, bowel trouble, sour crop, sore head, etc. Being soothing and non-irritating it is especially valuable in treating diseases of the delicate mucous membrane. Equally as useful for man, beast or fowl. Many poultry raisers keep their flocks healthy by adding Germozone to the drinking water once a day, or twice a week, thereby killing the germs that cause disease.

## Carbola

Is a disinfecting white-wash put up in powder form, ready to use when mixed with water. As a white-wash it is far superior to the ordinary kind, yet it also disinfects at one operation. Is easy to apply, with brush or sprayer.

Carbola when used as a white-wash will not blister, flake or peel off. Makes cellars of homes, garages, factories, outbuildings, poultry houses, barns, etc., light, sweet smelling and sanitary.

Carbola is neither poisonous nor caustic, yet it kills lice, mites, fly eggs, etc. The dry powder is unexcelled by the poultry raiser in making war on lice.

By sprinkling the Carbola powder in the nests, on the roosts, and in the corners of the hen-house, the poultry can be kept practically free from vermin, which is a hard job, yet important in making the hens lay. Lice infested hens will not lay.

Carbola is used by thousands of farmers, poultry breeders, dairymen, and by the U. S. Experimental Station and Agricultural Colleges. One pound of Carbola covers 200 square feet when used as a white-wash.

## Stanfield's Lice-Kill

One of the cheapest and best lice-killers; guaranteed to kill every louse on the fowl or money will be refunded. One application of the Lice-Kill will sometimes be enough to keep the fowl free from lice for a whole year. Twice a year is however, the usual treatment in keeping the birds absolutely free from vermin.

Small size tube, for 200 fowls.. 50c

Large size tube, for 500 fowls. \$1.00

Postpaid.

## Zenoleum

Is a disinfectant of unusual merit, highly recommended by authorities.

Kills lice, destroys mites, prevents white diarrhoea, cures roup and disinfects the coop. Zenoleum is unequaled as a preventive of contagious diseases.

Being non-poisonous and not inflammable makes it an ideal disinfectant for the home. It should be used in drains, out-houses, barns, poultry houses, kitchen sinks, garbage pails, cesspools. For these purposes use 2 tablespoonfuls to 1 quart of water.

## Oculum

Is a scientific germicide that destroys disease germs in the bowel and keeps the fowls healthy. Every poultry raiser should have Oculum on hand, ready for use at all times. Is a sure cure and preventive for Cholera, Roup, White Diarrhoea, Sorehead and Gapes. Gives truly wonderful results.

In 50c and \$1.00 sized packages. 5c additional for postage. Pint size \$2.00. Postpaid \$2.10.

## Egg-O-Hatch

Is a powder to be mixed with water and applied to eggs by either dipping or spraying during the hatching period. Greatly strengthens the chick by directly supplying it with oxygen and absorbing the carbon dioxide given off. This results in a greatly strengthened chick. Also weakens the shell. 50c a jar. Postage 5c additional.

## Egg-O-Latum-for Preserving Eggs

Is a preservative of eggs of the highest order, far superior to water glass, in preserving eggs. Egg-O-Latum is an ointment that is easy to apply to the eggs, from 6 to a dozen a minute being an easy matter, and if eggs are fresh when Egg-O-Latum is applied, they will stay that way for a year if necessary. It protects the eggs from air, moisture, odors, germs and decay. Eggs coated with Egg-O-Latum can be boiled, fried, poached or whipped the same as fresh eggs, in reality they are fresh eggs. Egg-O-Latum is colorless, odorless, tasteless and non-poisonous, but up in convenient 50c and \$1.00 jars. Add 5c for postage.

## POULTRY DISEASES

Poultry diseases are generally caused by unsanitary conditions, improper feeding, impure drinking water or exposure. The diseases of Poultry are in many respects similar to those of the human family and in almost every instance you will find the cause

### BRONCHITIS

**SYMPTOMS:** Loss of appetite, rapid breathing and cough, at first whistling sound, later rattling or bubbling in throat. Usually the eyes are very bright and the combs very red.

**CAUSE:** Exposure to dampness, to cold, to drafts of cold air, and to sudden or extreme changes of temperature are the most frequent causes of the disease.

**TREATMENT:** Give Pratt's Bronchitis Remedy according to directions on package.

### CANKER

**SYMPTOMS:** The first symptom is difficulty in swallowing, the neck becomes stiff and the throat swollen. These symptoms are usually followed by a cheesy-like growth in the mouth and throat.

**CAUSE:** Canker is usually a complication developing from severe distillings, Roup, and Chicken Pox, although it may occasionally appear independent of these and quite a disease in itself.

**TREATMENT:** See that birds have clean litter in which to scratch for the grain you feed them. Remove canker with small stick and apply Pratt's Roup Remedy to canker patches with small swab. Tone the birds up with Pratt's Poultry Regulator or Dr. Hess Poultry Pan-a-ce-a.

### CHICKEN POX OR SORE HEAD

**SYMPTOMS:** This disease is very contagious, frequently fatal, and is very annoying and disgusting. The symptoms are scabs or warts on the comb, lobes and face. When opened will discharge a thick yellow fluid.

**CAUSE:** It is frequently caused by filth and dampness, but may be brought upon the premises by infected birds.

**TREATMENT:** Remove sick birds and disinfect premises with Pratt's Poultry Disinfectant. Use Pratt's Sore Head Remedy according to directions.

### CHOLERA

There is but little genuine Asiatic Cholera in this country. Bowel trouble, indigestion, Diarrhoea and Dysentery commonly come under this head.

**SYMPTOMS:** The first symptom is that of diarrhoea, the droppings usually show a yellowish discoloration, but are also frequently green. The fowls will develop a fever, eat but little, drink lavishly will become sleepy and weak; will withdraw from flock and seek a dark, cool secluded spot. The comb and even the face will become very dark, the skin assumes a discolored appearance, and the feathers will be ruffled. In last stages the fowl apparently drops into a deep sleep lasting a day or two before death.

**CAUSE:** The cause can be traced to filthy houses, impure drinking water and foul feed or may be brought upon the farm by affected birds or on tools, feet of the attendant, etc.

**TREATMENT:** Separate sick birds from balance of flock as soon as the first symptoms are noted. Move healthy birds to new grounds if possible. Disinfect with the utmost care, houses, furnishings, tools, pails, everything used about the birds with a strong solution of Pratt's Poultry Disinfectant. Give entire flock Pratt's Poultry Regulator or Dr. Hess Poultry Pan-a-ce-a and sick birds two feeds each day, one consisting of stale bread soaked in warm milk. Give cholera Remedy in the drinking water.

### HEAD LICE

Almost every chick is afflicted with Head Lice. A very few or even a single one can cause the death of a young chick. They fasten on the head and throat of young chicks and are often mistaken for new feathers. Use Pratt's Head Lice Ointment according to directions.

### LEG WEAKNESS

**SYMPTOMS:** Walking or standing is difficult. The chicks sit and consume all food within reach, will move a few steps and sit down again.

**CAUSE:** To much under heat in brooders, poorly balanced rations, damp houses and improper ventilation.

**TREATMENT:** If the cause is improperly heated brooder, change it. Give nitrogenous food, such as oatmeal, bran, middlings, meat scraps or curd of milk. If possible, put chicks out on ground for an hour or so in a box without bottom. A window should be placed on top of the box to protect them from the wind. You will be surprised how quick the chicks will recuperate. Rubbing the bottom of the feet with a little vaseline will also help. Leg weakness can be prevented by giving baby chicks a good starting food the first three weeks, such as Pratt's Baby Chick Food.

to be the same. Much can be done in preventing diseases by frequent use of some good disinfectant. Pratt's Disinfectant or Dr. Hess Dip if used according to directions will prevent most diseases.

### FROSTED COMBS

Frosted combs must be treated at once before they are allowed to thaw out. Apply snow or ice cold water to the frosted parts until the frost is drawn out. Then anoint with Pratt's Healing Salve.

### LIMBER NECK

**SYMPTOMS:** Drowsiness, lack of appetite, fowls cannot hold their heads straight, they twist them around and stagger.

**CAUSE:** It is caused by fowls eating putrid animal matter.

**TREATMENT:** Give the sick birds a teaspoonful of turpentine mixed with an equal amount of sweet oil. Give soft feed to which add some good tonic. Keep birds in a warm dry place.

### ROUP

**SYMPTOMS:** When first contracted the nostrils and eyes will be watery, breathing will be difficult and fowl will frequently shake its head and sneeze. In advanced stages the nostrils will become closed and the face will begin to swell between the eye and the beak.

**CAUSE:** Roup is probably the most prevalent contagious disease affecting fowls. Cold, damp quarters are the most frequent cause of roup.

**TREATMENT:** Separate the sick birds from the well. Place the sick birds in dry well ventilated quarters free from drafts. Give birds Pratt's or Dr. Hess Roup Cure or Lee's Germoxone according to directions on package. In bad cases individual treatment with roup tablets is recommended. In bad cases it is well to make a warm solution of roup remedy about four times as strong as used for drinking, and with a medicine dropper or small oil can, squirt the solution into the nostrils of the bird.

### SCALY LEG

**CAUSE:** This disease is caused by a parasite which burrows under the scales of the legs and feet. Close examination will show the legs covered with a thick white crust. The disease is very contagious.

**TREATMENT:** Wash legs thoroughly with soap, water and brush. Then apply Pratt's Scaly Leg Ointment.

### SOUR CROP

**SYMPTOMS:** The symptoms are a distended crop, usually soft, foul breath and offensive water running from the mouth. Unless prompt action is taken the poison developed will quickly kill.

**CAUSE:** It is due either to too ravenous feeding; the taking of sour food, or stagnant water or too slow digestion—due to absence of grit.

**TREATMENT:** Follow the treatment of Crop Bound as far as is necessary. The contents of the crop can however, usually be removed through the mouth. Give a little baking soda in the drinking water, feed nothing for 24 hours, then feed lightly on soft foods in which Pratt's Poultry Regulator or Dr. Hess Pan-a-ce-a have been placed.

### WHITE DIARRHOEA

**SYMPTOMS:** The symptoms are a white pasty discharge which pastes the feathers together and closes up the vent. The afflicted chicks stand around in a listless manner, oftentimes with eyes closed, wings drooping, and refusing to eat. They usually seek the warmth of the hovey or mother hen and chirp almost constantly, they die in a short time.

**CAUSE:** White Diarrhoea claims millions of little chicks every year, in fact more chicks die of this disease than of all other diseases combined. It is caused by exposure to cold, overheated brooders, improper ventilation, improper feeding and by filth. It is very contagious.

**TREATMENT:** Not much can be done to chicks already affected, the main thing is to keep it from spreading. Seek the cause and remove it if possible. Give Pratt's White Diarrhoea Remedy or Lee's Germoxone in the drinking water according to directions on package. These remedies should be given as a preventative. Disinfect runs, hovers and coops thoroughly with Pratt's Disinfectant.

### WORMS

**SYMPTOMS:** Fowls usually mope around from no apparent cause. Comb and wattles are pale, plumage rough, the bird is thin, dull and stiff in walking. Finally birds will lose all control of the legs and will be down flaccid. Birds will always be hungry and will eat ravenously until they die. Begin treatment at once using Conkey's Worm Remedy. Premises should be thoroughly disinfected with Pratt's Poultry Disinfectant.

# DRY MASH HOPPERS

## Dry Mash Hopper

With its latest improvement gives you a feeder that prevents any possibility of waste. Never gets clogged up, yet it can feed coarse as well as fine mash. Has lid that will keep the rats and mice out at night.

No. 35—8½ inches wide..\$1.60  
Shipping weight 7 lbs.

No. 36—12 inches wide.. 2.20  
Shipping weight 9 lbs.

No. 37—24 inches wide.. 3.00  
(No. 37 is too large for parcel post.)

## "Bar-Nun" Dry Mash Hopper

Made of heavy galvanized steel, is cheap in price, a permanent and reliable hopper that will save you its cost many times over by the feed it saves. Is inaccessible to rats or mice, yet easy for the poultry to feed from. Feeds automatically. Holds 16 quarts of dry mash at a time. Each, \$3.00. (Shipping weight 9 lbs.)

# GRIT & SHELL BOXES

## Gould's Reliable Grit and Shell Box

As a feed saver is practically indispensable to the poultry raiser. This box will not clog up. Feeds automatically, so that there is absolutely no wasting of grit or shell. Can also be used for feeding chick feed or any whole grain. Well constructed in every way.

3 comp. size .. \$1.25

Weights 7 lbs.

## Eclipse Feeding Trough

A popular priced trough, made of galvanized iron for feeding chicks and pullets. Sliding top in a k e s

them very convenient and easy to fill and keep clean.

No. 27, 10 inches long.....30c, postpaid 35c.

No. 28, 20 inches long.....50c, postpaid, 60c.

## Feeder and Exerciser

Is not only a labor saver in feeding, but gives the birds the needed exercise to keep them in a healthy condition, which means that you will get the maximum amount of eggs from them. Manufactured of heavy galvanized iron in two sizes.

8 qt. size (wt. 5 lbs.) \$1.50

16 qt. size (wt. 6 lbs.) 2.10

## Carter's Green Food Feeder

Green food is the most essential ration. Keeps your hens healthy, makes eggs more fertile and produces more eggs. Carter's Green Food Feeder keeps the green feed clean and wholesome while being fed. This gives you a sanitary feeder that prevents vegetables from becoming unfit for food as is the case often times when spread on the floor or ground. Hang one of Carter's Green Food Feeders in each pen at just the proper height for hens to reach, fill it with any green food and watch the hens hustle. 50c each. Postpaid.

Fountains can as a rule be sent more cheaply by Parcel Post.

## DRINKING FOUNTAINS

Include postage when ordering goods sent by Parcel Post.

### Beise Fountains

3 gal. size (weighs 6 lbs.) ..... \$1.00  
4 gal. size (weighs 7 lbs.) ..... 1.25

5 gal size		5.50
10 gal size		9.25

5 and 10 gal. sizes too large for parcel post.

### Ellison's Anti-Freeze Fountain

Is also one of the best makes on the market today. Has four layers of insulating that will keep the water warm in winter and cool in summer. No ice or lamp necessary. Holds nine quarts of water. Shipping weight about 25 pounds. Measure 14 inches in diameter and height. Price each \$6.00.

### "Best Ever" Wall Fountain

Is one of the most convenient and durable fountains on the market. Almost impossible to become polluted or clogged up. 1 qt. size (weighs 3 lbs.) \$ .60  
1 gal. size (weighs 4 lbs.) 1.25  
1½ gal. size (weighs 5 lbs.) 1.70

# EGG CARRIERS, SHIPPING COOPS, ETC.

## Bullis Egg Cartons

Are made light, yet safe for sending eggs by Parcel Post. The outside corrugated box and inside egg filler makes it doubly safe in shipping eggs. Cartons are sent to you folded, but can be put into shape in a second. Makes a strong and safe carton for sending domestic or hatchery eggs.

Size	Each	Dozen	Case of	Each Carton weights
1 doz.	\$ .15	\$1.50	50—\$5.00	10 ounces
2 doz.	.20	2.25	25—4.00	18 ounces
3 doz.	.30	3.00	25—5.50	1½ ounces
4 doz.	.35	3.50	25—6.90	1¾ pounds
10 doz.	.65	7.00	10—5.60	4 pounds

## Continental Folding Egg Carton

Is the cheapest carton on the market yet its cushion-like construction makes it very safe for the protection of eggs against breaking.

1 dozen (weighs 3 lbs.)	\$ .25
100 (weighs 22 lbs.)	1.45
1,000	13.00

## Sefton's "Eyrie" Shipping Coop

Is made especially for shipping large fowls. Constructed of wooden top and bottom and heavy paper sides. It is light, yet very durable, that will protect the birds from drafts and not injure the plumage.

"B" for single bird, each 85c, per dozen \$9.00.

"D" for 2 large or 3 medium size birds, each 1.10, per doz. \$11.75.

## Farmer's Friend Egg Crate

Is one of the most popular and convenient carriers made for shipping eggs by Parcel Post or Express. Its solid wood walls protect eggs against breakage even in rough handling. Is light in weight, yet very durable.

Capacity	Weight	Each
6 dozen	5 lbs.	\$0.85
12 dozen	8 lbs.	1.00
15 dozen	9 lbs.	1.15

## Master Breeder Chick Box

Is a favorite among poultry raisers for shipping Baby chicks long distances safely. Is made of strong corrugated paper that will protect the chicks from getting chilled, also ventilated to prevent suffocation.

25 chick size, each \$ .20, dozen, \$1.75.	Weight per doz. 6½ lbs.
50 chick size, each \$ .30, dozen \$2.50.	Weight per doz. 14 lbs.
100 chick size, each \$ .40, dozen \$3.50.	Weight per doz. 22 lbs.

## Petty's Baby Chick Poultry Punch

For punching identification hole in web between the toes. All steel, nickle-plated, punching a clean hole that will not bruise the foot. Each 25c. postpaid.

## Roger's Baby Chick Poultry Punch

Is guaranteed to give satisfaction or money will be refunded. Is easy to operate, and cuts a clean neat hole. Each 45c post paid.

Diagram for marking chicks gives you 16 different ways.

# SPROUTERS, BROOD COOPS, NESTS, ETC.

## Gould's Reliable Oat Sprouter

Fills the demand and need for a sprouter that grows oats quickly. The double side walls and trays are made of galvanized steel, well constructed, that will stand many years of use. Lamp and thermometer furnished with each sprouter. No poultry raiser should be without one of these sprouters, for they contribute much in the successful raising of poultry and in getting of the maximum amount of eggs from your flocks. Will pay the cost of the sprouter many times over during a season in the lowering of the feeding cost.

No. 1 has 4 trays, measuring 18x13 each, that will furnish a feeding capacity for 100 to 150 hens. Price \$8.50.

No. 2 has 5 trays that measure 18x18 each, with a feeding capacity for 200 to 300 birds. Price \$12.00.

Gould's Reliable Oat Sprouter

## The "Lawn Park" Brood Coop

Made entirely of galvanized materials, and is as perfect and safe a coop as one would want. Protects chicks against rats, cats, vermin, cold and bad weather. The park feature permits the chicks to have plenty of sunshine and fresh air, also to range on the grass. Coop is easy to move from place to place as desired. Coop is roomy, being 18 inches wide, 19½ inches high, and 43 inches long, with park extended. The overhead ventilating system keeps the coop cool without chilling. A dandy coop that will pay for itself in the chicks it will save many times over. Also an ideal coop for the setting hen. Price \$4.00.

## The Economy Patented Trap Nest

Made of galvanized iron. Is by far the cheapest, simplest and most practical trap nest on the market. Simple in construction, it can be used also as an ordinary nest if so desired. Each \$2.00. Dozen \$22.00.

Economy Trap Nest

## Economy Trap Nest Fronts

Meet the demand of those who desire to attach them to their own make nest, but are not as sanitary when put on this way instead of the complete iron Economy Nest. But it has placed the trap nests within the reach of all, as an old orange box can easily be converted into a double trap nest at a small expense. Each 60c, or \$6.75 a dozen.

## Economy Oat Sprouter

Needs no lamp or stove, sprouting the oats by a natural process. Can be placed in kitchen, basement, or anywhere that is light and the temperature is fairly even to produce growth. Simplicity is its biggest asset, yet it gives genuine satisfaction. The frame of the Economy Oat Sprouter is of iron, heavily japanned. Pans seamless galvanized; cannot get out of order. All pans have perforated bottoms except the lowest which catches the drippings. Requires floor space only 17 inches square. Fits into almost any out-of-the-way place. It is effective and economical to the highest degree. Price, complete .....\$7.00

Economy Oat Sprouter

## W. K. Galvanized Brood Coop

Protects the little chicks from rats, weasels, etc., and although it will last a lifetime, this coop will pay for itself in a very short while. Made of galvanized iron that will not rust, makes it sanitary for lice and mites cannot find any resting place in it. Well ventilated so that ordinary warm nights are cool in these coops. Is also a rain proof. This coop measures 17x22½ inches and 17 inches high, giving plenty of room for a hen and 25 chicks, till old enough to shift for themselves. A very satisfactory coop. Each \$2.00.

W. K. Brood Coop

Knudson's Steel Nests

## Knudson's Galvanized Steel Nests

Are strong in construction sanitary, and easy to clean. Mite and lice find no resting place in these nests. Are durable and very popular with poultry breeders. Three Compartment .....\$3.25  
Six compartment ..... 6.00

## Opal Nest Eggs

Stop hens from laying eggs on the floor. Are made of the best white flint and will last a long time. Each 5c; set of 3, 10c; ½ dozen, 20c; dozen, 35c.

## Lice Killing Nest Eggs

Are almost an exact imitation of a hen's egg, containing a powerful disinfectant which will expel lice and vermin. Lice keep hens from laying. Each 15c, or \$1.25 per dozen.

## The Oakes Economy Brooder Hover

Can be used anywhere with perfect safety. Is made of steel throughout, yet is light, strong and durable. Is built for convenience, safety and economy. Although the lamp box is fireproof, the O. K. Safety Burner makes it doubly so.

No. 1 Hover (18-inch drum) without cage .....\$6.50

No. 2 Hover (22-inch drum) without cage .....\$10.00

Oakes Economy Brooder Hover

### "Tycos" Incubator Thermometer

Is the most accurate and reliable thermometer on the market. Incubators are useless without a reliable thermometer. No. 5770 is made with metal legs and can be adjusted to almost any position desired. Each 90c. No. 5774 is made to hang up or lay on top of eggs. Each 80c. Add 10c for postage and insurance.

### "Tycos" Brooder Thermometer

Its magnifying lens makes it easy to read accurately. Each 60c. Add 10c for postage and insurance.

### "Tycos" Incubator Hygrometer

Gives you an accurate record of the moisture in your incubator, preventing loss of chicks from improper moisture conditions. Each \$1.75. Add 10c for postage and insurance. Extra wicks 15c each.

## Queen Brooder Stove

In its new and improved design will protect your chicks from exposure and death. The Queen stove provides constant and correct distribution of the heat, which makes the chicks develop quickly into strong, healthy fowls. Stove is made of the best cast iron, and will last a lifetime, with ordinary care. Has all the features needed to make it the best brooder stove made. Burns either wood or coal.

Queen Brooder Stove

No. 1—600 chick capacity .....\$21.50  
No. 2—1,200 chick capacity .....26.50

## LEG BANDS

### Leader Adjustable Leg Bands

Made of aluminum, come in two sizes that can be adjusted to meet the size of any bird. Are numbered.

1 doz. 20c; 25, 35c; 50, 50c; 100, 80c; 250, \$1.85; 500, \$3.50; 1,000, \$6.75.

### Economy Colored Poultry and Pigeon Band

**The Best Band For Exhibition Purposes.**

On account of the large numbers on the colored celluloid facing, can be easily seen. Bands are made of aluminum and form a very secure and permanent fastening. Sizes 0 and 1 for Pigeons; number 3 for Mediterranean; number 4 for American breeds; and number 5 for Asiatics in the following colors: Red, Blue, Pink, White, Yellow, Green and Purple.

Sizes 0 and 1 for Pigeons; 5, 10c; 10, 20c; 25, 40c; 50, 65c; 100, \$1.25. Size 3 for Mediterranean; size 4 for American breeds; size 5 for Asiatic; 5, 15c; 10, 25c; 25, 60c; 50, \$1.10; 100, \$2.00.

## Champion Dog Biscuits

Are famous as a perfectly balanced ration that will keep dogs healthy, vigorous and in good coat. Is made of clean, sweet meat, cereals and flour perfectly blended. Breeders of large kennels, find Champion Dog Biscuits the cheaper, and better food in feeding their animals. Sold in 2½ lb. cartons at 35c; 5 lbs. 65c; 50 lb. bags \$5.00.

## Black Hawk Corn Sheller

Is large enough for home purposes, yet it meets the every requirement of the farmer. Is easy to turn, with enclosed hopper and separator that prevents scattering of shelled corn. Easy to attach. Can be clamped to a barrel, tub, box, or bin, by two strong clamps attached. Price .....\$2.75

## Standard Egg Tester

Is made to fit any lamp. All eggs for hatching should be candled with one of these testers. The Standard Egg Tester is the best on the market for this purpose. Each .....35c.

## Model Grinding Mill

Can be easily adjusted to grind grains for flour, or in coarse or cracked form, as well as dry bone, shells, roots, bark, rock salt, etc. You can adjust the feed to any size with a model grinding mill as needed for the growing chicks. A very handy machine for both the home and poultry raiser. Each:  
No. 1 Hand Power-mill \$4.50.  
No. 2 Hand Power-mill \$8.00.  
No. 3 Hand Power-mill \$11.50.  
No. 4 Run by Power-mill \$15.00. (Requires one to two horse power.)

## CAPONIZING SETS

### Philadelphia Caponizing Set

Has given satisfaction to its users for more than 50 years. Set is complete to the smallest detail, and easy to handle. Book of instructions with each set. Price \$3.00. Add 10c for postage.

### George Buoy Capon Set No. 20

Is recognized by caponizers to be one of the few best makes of caponizing sets. Many say there is none better. Makes increased profits easy and sure, by the simple effort it takes with these sets. Instructions are made so plain in the book furnished with each set, that a boy can perform the work very easily. Set complete at \$5.50. Add 10c for postage.

## Drop Board Scraper

REVERSIBLE—DOES THE JOB WITHOUT REMOVING ROOSTS.

Made from heavy gauge steel, handle can't come off, cleans any flat or smooth surface and makes a very fine sidewalk scraper. Satisfactory or money refunded. With 5½ ft. hickory handle, \$1.35 prepaid.

## Schroeter Mole Trap

The Schroeter Improved Mole Trap is designed particularly for trapping Ground Moles. This trap is held in an elevated position by a latch or trigger mechanism that is adapted to be tripped by a mole traveling through a furrow in the ground at a point where the trap is located. One of the very best and successful mole traps on the market today. Price \$2.50. (Weight, 5 lbs.)

## Mole Trap Peerless Automatic Mouse Trap

A wonder trap in ridding any place of mice in a sanitary, quick and effective way. A dozen mice will often find their way to a watery grave in one of these traps over night. It leaves no tell-tale smell, and fools them all.

Has no complicated parts to get out of order. As soon as a mouse smells the bait and enters the trap, it closes, and the startled mouse climbs up to the top landing. The weight of the mouse pushes down the chute and drops the mouse into the tank of water, and automatically opens the door below for the next victim. Works like a clock, yet the method is simple and sure.  
Mouse Trap, price (Weight 3 lbs.).....\$3.00

## Felix Girard's Red Cross Rat and Mouse Embalmer

Exterminates rats and mice in a single night with no after odor or fear, as it dries them up. Has been used successfully for over 13 years. In 25c, 50c, \$1.00 and \$3.00 sized packages. (Cannot be sent by mail.)

## French Killing Knife

Made of finely tempered steel, will last a life time. Each 65c.

## Angular Killing Knife

Severs the Jugular vein and spinal cord in one operation, thereby bleeding the fowl which makes removal of feathers easy without the need of water. Each 65c.

A nice lawn gives the home a beautiful setting.—The above grounds of a St. Paul lake home, sown with Gould's lawn seed

## LAWN GRASS SEED

### Gould's Reliable Lawn Grass Seed

This seed is the result of our many years' experience in the mixing of different grass seeds for a quick and permanent lawn. The Kentucky Blue Grass, which is the foundation of this mixture, is a very slow grower, and if sown alone would give very little results the first two months. We have therefore blended with it grasses of a quick growing nature to produce a green lawn in from two to four weeks. Also to take the place of a nurse crop, for the slow growing varieties, shading and sheltering their delicate sprouts as they appear above the ground.

The most important thing to consider in selecting seed for lawn grass is to obtain a proper mixture of several varieties. By properly choosing early, medium and late grasses, a smooth, even, green lawn is assured from early spring to late autumn. A given area can support only so many grass plants of one kind for they all absorb the same sort of food, but if several varieties are sown, the same area will support many more plants, as different sorts live on various elements in the soil. This will give a much thicker and more luxuriant turf all over the lawn.

From early spring until late in the fall, lawns sown with Gould's Reliable Lawn Seed remain green and fresh.

Not only is Gould's lawn seed suitable for making new lawns, but it is equally valuable for quickly renewing old, worn-out areas.

1/2 lb. ....30c	5 lbs. ....\$2.35	25 lbs. ....\$10.00
1 lb. ....50c	10 lbs. ....\$4.50	100 lbs. ....\$38.00

### N. K. & Co's Sterling Lawn Grass

We have handled the Sterling Lawn Grass Seed for many years and have had very gratifying comments upon its high quality. It is not only suitable for making new lawns, but is also adapted for the renewal of old, worn-out areas.

1/2 lb. ....30c	5 lbs. ....\$2.35	25 lbs. ....\$10.00
1 lb. ....50c	10 lbs. ....\$4.50	100 lbs. ....\$38.00

### Gould's Shady Lawn Mixture

A mixture of grasses that does not require a great amount of sunshine. There are, as a rule, some spots on every lawn that are shaded during the greater part of the day, where the ordinary lawn grasses will not do well and create an eyesore in an otherwise perfect lawn. In such cases we recommend using a generous amount of Land Plaster, and sowing with Gould's Shady Lawn Mixture.

A smooth velvety lawn surrounding a house adds not only to the value, but enhances the enjoyment of every home. When properly made, a lawn is as satisfactory as any investment a home owner can make.

1/2 lb. ....30c	5 lbs. ....\$2.35	25 lbs. ....\$10.00
1 lb. ....50c	10 lbs. ....\$4.50	100 lbs. ....\$38.00

### Gould's Terrace Mixture

A combination of deep rooted grasses that will form a quick heavy matting of roots. The tops should not be mowed too soon or too often in order to give the roots a chance to develop quickly to prevent washing out.

1/2 lb. ....30c	5 lbs. ....\$2.35	25 lbs. ....\$10.00
1 lb. ....50c	10 lbs. ....\$4.50	100 lbs. ....\$38.00

### SUGGESTIONS FOR MAKING A LAWN.

To make a good lawn takes time. Careful preparation of the soil is very essential, the first step is to grade the plot properly allowing a slight raise at the center to permit proper drainage. After the grading is complete a heavy dressing of well rotted manure should be applied and same should be spaded in thoroughly.

If unable to obtain the manure, we would advise using our Special Lawn and Garden Fertilizer at the rate of 50 pounds per 1,000 square feet and after mixing thoroughly with the soil, pulverize the surface with the harrow or rake. Now the seed may be sown at the rate of 3 pounds per 1,000 square feet raking in immediately after, and firming the soil with a heavy roller.

The uncertainty of the market makes it necessary to quote our prices in this catalog subject to change. Any future variation in price will be shown on our Red Figure price list.
